*Enzymatic Basis of Detoxication Volume 2* William B. Jakoby, 2012-12-02 *Enzymatic Basis of Detoxication Volume II* reviews the state of knowledge on foreign compound metabolism at the level of what specific enzymes can do. The book attempts to provide a holistic view of the information gleaned from work with specific purified enzymes encompassing as many mammalian sources as have been studied. The book is organized into two parts. Part I on conjugation reactions and related systems includes studies on the properties of glucuronide formation, the physiological function assay and purification of function of bilirubin glucuronoside glucuronosyltransferase, the roles of N and O methylation reactions and glutathione transferases in detoxication and amino acid conjugation. Part II presents studies on hydrolytic systems covering the role of epoxide hydrolase, carboxylesterases and amidases in detoxication and the regulatory effects of these enzymes. This book provides pharmacologists and toxicologists with the biochemical view of detoxication and biochemists with the corresponding pharmacological and toxicological aspects. *Enzymatic Basis of Detoxication Volume 1* William B. Jakoby, 2012-12-02

*Enzymatic Basis of Detoxication Volume I* focuses on the catalytic mechanisms and physiological expression of the enzymes that are involved in the detoxication of foreign compounds. The book explores foreign compound metabolism at the level of what specific enzymes can do. This book is organized into three sections and comprised of 17 chapters. The discussion begins with an overview of detoxication and covers both catalytic and non catalytic removal of foreign substances along with the general properties of the enzymes that are active in detoxication. The reader is then introduced to the physiological aspects of detoxication, paying particular attention to the kinetic aspects of metabolism and elimination of foreign compounds in animals, human genetic variation in detoxication enzymes and how such enzymes are induced. The next section focuses on mixed function oxygenase systems and includes chapters on cytochrome P 450 and the detoxication reactions it catalyzes. The book also considers other oxidation reduction systems with reference to alcohol dehydrogenase, aldehyde reductase, aldehyde oxidizing enzymes, ketone reductases, xanthine oxidase and aldehyde oxidase, glutathione peroxidase and superoxide dismutases. The final chapter is devoted to monoamine oxidase, its properties, substrate specificity, inhibitors, kinetics and mechanism and multiple forms. Pharmacologists, toxicologists and biochemists will find this book extremely helpful.

Langenbach, 2013-11-21 The Symposium on Organ and Species Specificity in Chemical Carcinogenesis was held March 1981 in Raleigh North Carolina Dr James Miller concluded this Symposium with these remarks Without a doubt all of us would agree this has been a very successful symposium in illustrating a very wide range of chemical stereochemical biochemical metabolic molecular and biological factors in chemical carcinogenesis I think it is noteworthy that many of the discussions

have dealt with pharmacodynamic or toxicodynamic factors that can influence the biological activities of the extremely wide range of structures that we choose to call chemical carcinogens I sincerely hope that after this symposium everyone here will realize the very great need we have for further information on these agents in the species we profess to be working for the human species We badly need an adequate data base on human organs human tissues human cells human subcellular preparations and human body fluids I don't think we can rely on extrapolations of data on chemical carcinogenesis from experimental animals to humans no matter how sophisticated or plausible these extrapolations may seem until we know far more about chemical carcinogenesis in humans Now I'd like to add a somewhat personal note As many of you know my wife and I have shared a joint career of some 40 years in this field and I'd like to emphasize in these closing remarks the factor of youth
