Enzyme Engineering Volume 3:

Enzyme Engineering E. Pye, 2013-03-09 The recent worldwide explosion of interest in enzymes as catalysts in industrial processes has arisen primarily because of the potential of major innovative advances which have taken place over the last two decades foremost among these being novel methods of enzyme immobilization and affinity chromatography for rapid enzyme purification This interest is now being further stimulated by the remarkable commercial success of several enzyme based industrial processes particularly the production of high fructose syrup in the U S and amino acid production in Japan With the initiation of these and other processes together with the readying for commercialization of several other enzyme based operations interest has expanded in other areas in which enzymes may play a useful role particularly in medicine and analytical chemistry The development of this technology has required the cooperative efforts of practitioners of several disciplines primarily chemical engineers biochemists and other life scientists Indeed from this cooperation is arising the new interdisciplinary field of Enzyme Engineering To stimulate communication information exchange and advancement of knowledge in this new field on an international level the Engineering Foundation through the efforts of Lemuel B Wingard Jr initiated in 1971 a series of international conferences on Enzyme Engineering to be held biannually The first two conferences were held in Henniker New Hampshire in the summers of 1971 and 1973 respectively while the third conference from which these proceedings derived was held in August 1975 in Portland Oregon Enzyme Engineering E. Pye, 2013-01-23

Considerable worldwide interest has arisen in recent years in the controlled use of enzymes as catalysts in industrial processing analytical chemistry and medical therapy This interest has generated the new interdisciplinary field of Enzyme Engineering which includes both the scientific and technologic aspects of the production purification immobilization and application of enzymes in a variety of situations and reactor configurations A series of Engineering Foundation conferences on Enzyme Engineering was initiated to provide an international forum for the exchange of ideas and information over the entire range of this new field The outstanding success of the first two conferences attests to the vigor and potential of this field to contribute significantly to a better understanding and resolution of some of the major problems faced by mankind The first conference which was held August 9-13 1971 at Henniker New Hampshire U S A aided significantly in molding the several traditional disciplines that interact to form the field of Enzyme Engineering The conference was highly successful mainly because many of the key scientists and engineers from the several facets of Enzyme Engineering were brought together for the first time at a single residential meeting The result was an exchange of ideas and education of one another in the pertinent principles of the diverse disciplines which contribute to this field The second conference held August 5-10 1973 at Henniker New Hampshire U S A **Enzyme Engineering** Ichiro Chibata, Saburo Fukui, Lemuel B. Jr.

Wingard, 2013-03-14 Presently intensive and global attention is being devoted to biotechnology the technology utilizing marvelous capacities of living things for human welfare Each country is strongly promoting its development In particular

enzyme engineering whose purpose is to utilize efficiently enzymes microorganisms and cultured plant as well as animal cells as organic catalysts is one of the main themes in the field of biotechnology Under these circumstances the Sixth Enzyme Engineering Conference was held at Kashikojima Mie Prefecture Japan from September 20 to 25 1981 under the joint auspices of the Engineering Foundation of New York and the Japanese Society of Enzyme Engineering This series of international conferences has been held biannually since 1971 The first three and the fifth conferences were held in the United States and the fourth one was in the Federal Republic of Germany This sixth conference was the first to be held in Asia and it was significant that a number of participants could visit Japan which has produced successful achievements in the field of biotechnology
