Equity And Excellence In Higher Education The Decline Of A Liberal Educational Reform:

Equity and Excellence in Higher Education Alan R. Sadovnik, 1994 Compensatory higher education programs developed as part of the liberal educational reforms of the 1960s and 1970s Their goal was to compensate for unequal pre college education and provide equal opportunities for economically and educationally disadvantaged students This book provides a sociological and historical analysis of the rise and fall of one educational opportunity program that began as an off campus branch of a state college in the late 1960s moved to the main campus in the late 1970s and was eliminated in 1983 The analysis relates to the larger policy questions in higher education with special reference to issues of equity and excellence

Durkheim and Modern Education W.S.F. Pickering, Geoffrey Walford, 2002-09-11 This volume explores Durkheim's place in modern educational thought at three different levels Durkheim's ideas on education are analyzed and placed in the context of modern society current educational issues are explored using a Durkheimian framework Durkheim's thought is related to that of modern educational theorists to reveal his enduring influence In discussing Durkheim's modern relevance the contributors stress his desire to integrate the practical and theoretical aspects of education They identify particular pertinence in his focus upon the moral base of education and his insistence upon the importance of the social and society

Developing Scholars Domingo Morel, 2023 Over the past fifty years debates concerning race and college admissions have focused primarily on the policy of affirmative action at elite institutions of higher education But a less well known approach to affirmative action also emerged in the 1960s in response to urban unrest and Black and Latino political mobilization The programs that emerged in response to community demands offered a more radical view of college access admitting and supporting students who do not meet regular admissions requirements and come from families who are unable to afford college tuition fees and other expenses While conventional views of affirmative action policies focus on the identification of high achieving students of color to attend elite institutions of higher education these programs represent a community centered approach to affirmative action This approach is based on a logic of developing scholars who can be supported at their local public institutions of higher education In *Developing Scholars* Domingo Morel explores the history and political factors that led to the creation of college access programs for students of color in the 1960s Through a case study of an existing community centered affirmative action program Talent Development Morel shows how protest including violent protest has been instrumental in the maintenance of college access programs He also reveals that in response to the college expansion efforts of the 1960s hidden forms of restriction emerged that have significantly impacted students of color *Developing Scholars* argues that the origin history and purpose of these programs reveal gaps in our understanding of college access expansion in the US that challenge conventional wisdom of American politics

Higher Education in the United States James J. F. Forest, Kevin Kinser, 2002-06-21 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student

diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study discuss and grapple with on a daily basis

Resources in Education ,2000-10 **Dynamics of the Contemporary University** Neil J. Smelser,2013-03-15 This book is an expanded version of the Clark Kerr Lectures of 2012 delivered by Neil Smelser at the University of California at Berkeley in January and February of that year The initial exposition is of a theory of change labeled structural accretion that has characterized the history of American higher education mainly but not exclusively of universities The essence of the theory is that institutions of higher education progressively add functions structures and constituencies as they grow but seldom shed them yielding increasingly complex structures The first two lectures trace the multiple ramifications of this principle into other arenas including the essence of complexity in the academic setting the solidification of academic disciplines and departments changes in faculty roles and the academic community the growth of political constituencies academic administration and governance and academic stratification by prestige In closing Smelser analyzes a number of contemporary trends and problems that are superimposed on the already complex structures of higher education such as the diminishing public support without alterations of governance and accountability the increasing pattern of commercialization in higher education the growth of distance learning and for profit institutions and the spectacular growth of temporary and part time faculty

Gender in Policy and Practice Amanda Datnow,Lea Hubbard,2013-10-23 This book exposes the complexity of single sex schooling and sheds new light on how gender operates in policy and practice in education The essays collected in this volume cover a wide range of institutions including K 12 and higher education public and private schools and schools in the US and beyond Detailing the educational experiences of both young men and women this collection examines how schooling shapes and is shaped by the social construction of gender in history and in contemporary society

Educational Reform Jordan T. Ville,2001 This book brings together the literature in a field which may define the 21st century Can economic and technological progress continue with educational systems which seem to answer to no one but themselves and which output graduates who can barely read and write and who have only the faintest clue how to use a map This bibliography provides access via Title Author and Subject Indexes Contents Educational
