depends on the development of a stronger commitment to evaluation of CE by its providers But a significant part of the answer might be provided through the improvement of methods used in evaluation of continuing education for health professionals To address this last concern the Development and Demonstration Center in Continuing Education for the Health Professions of the University of Southern California organized and conducted a meeting of academicians and practitioners in evaluation of continuing education During a three day period participants heard formal presentations by five invited speakers and then discussed the application of the state of the art of educational evaluation to problems of evaluation of continuing education for health professionals
