equally concerned that their hearts not become science less in the future In this volume the authors respect both viewpoints and attempt to weave these notions together Throughout this book different types of emotions in psychotherapy unfold For instance Harry Aponte presents a thoughtful piece on the issue of client therapy intimacy while Doug Flemons and Shelley Green a married couple share a humorous yet sensitive article on sexual concerns in couples and finally Daniel Handel provides a powerful story of the use of hypnosis with a dying adolescent In addition to the emotional side of psychotherapy the authors include the scientific aspects of psychotherapy A discussion about various models of brief therapy is given emphasizing that the therapeutic effects of the treatment models are attributable to the non treatment specifics of the therapeutic interaction A review of empirical data on the key elements of Ericksonian hypnosis and the social psychological aspect of Ericksonian hypnosis are discussed as well Finally an important and perhaps controversial essay on ethics in the general non therapeutic use of hypnosis by lawyers and its use in recovering memories is presented
