Norell,1995 Through a combination of descriptive text and exercises this book presents an accessible framework for the planning and critical evaluation of epidemiologic studies It describes the principal sources of error their impact on the results and the research strategies used to prevent errors These strategies are the building blocks of epidemiologic study design which generally seek to obtain accurate results despite the employment of limited resources The volume is illustrated with examples and exercises from studies published in international journals It starts with an introduction of basic concepts followed by a discussion of the basics of selecting the study population and follow up period asking the right questions obtaining information on exposures and analyzing disease occurrence Separate treatment is given to strategies specific to case control or experimental studies Each step in the planning or critical evaluation of a study is illustrated by exercises covering a wide range of exposures dietary factors tobacco alcohol drugs radiation and occupational hazards among others and diseases such as cancer cardiovascular disease diabetes and psychiatric disorders The book concludes with an overall review of the different aspects of study design and a set of answers to the exercises The text will equip students with a clear and thorough understanding of the design and accuracy of epidemiologic studies *Current Catalog* National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1965 **Basic Epidemiological Methods and Biostatistics** Randy M. Grimmer,Centers for Disease Control (U.S.),1983 **Clinically Applied Anthropology** N. Chrisman,T. Maretzki,2012-12-06 like other collections of papers related to a single topic this volume arose out of problem sharing and problem solving discussions among some of the authors The two principal recurring issues were 1 the difficulties in translating anthropo logical knowledge so that our students could use it and 2 the difficulties of bringing existing medical anthropology literature to bear on this task As we talked to other anthropologists teaching in other parts of the country and in various health related schools we recognized that our problems were similar Similarities in our solutions led the Editors to believe that publication of our teaching experiences and research relevant to teaching would help others and might begin the process of generating principles leading to a more coherent approach Our colleagues supported this idea and agreed to contribute What we agreed to write about was Clinically Applied Anthropology Much of what we were doing and certainly much of the relevant literature was applied anthropology And our target group was composed mostly of clinicians The utility of the term became apparent after 1979

when another set of anthropologists began to discuss ainal Anthropology They too recognized the range of novel behaviors available to anthropologists in the health science arena and chose to focus on the clinical use of anthropology We see this as an important endeavor but very different from what we are proposing Catalog of Copyright Entries.
