Epistemic Knowledge A Survey Of The Log:

Epistemic Logic Nicholas Rescher, 2005-02-27 Epistemic logic is the branch of philosophical thought that seeks to formalize the discourse about knowledge Its object is to articulate and clarify the general principles of reasoning about claims to and attributions of knowledge This comprehensive survey of the topic offers the first systematic account of the subject as it has developed in the journal literature over recent decades Rescher gives an overview of the discipline by setting out the general principles for reasoning about such matters as propositional knowledge and interrogative knowledge Aimed at graduate students and specialists Epistemic Logic elucidates both Rescher's pragmatic view of knowledge and the field in general

The Logic of Epistemology and the Epistemology of Logic Jaakko Hintikka, Merrill B.P. Hintikka, 1989-02-28 somewhat like Henkin's nonstandard interpretation of higher order logics while the right semantics or logical modalities is an analogue to the standard of type theory in Henkin's sense interpretation Another possibility would be to follow W.V. Quine's

advice to give up logical modalities as being beyond repair Or we could also try to develop a logic of conceptual possibility restricting the range of our possible worlds to those compatible with the transcendental presuppositions of our own conceptual system This looks in fact like one of the most interesting possible theories I have dreamt of developing but undoubtedly never will Its kinship with Kant's way of thinking should be obvious Besides putting the entire enterprise of possible worlds semantics into a perspective we can also see that the actual history of possible worlds semantics is more complicated than it might first appear to be For the standard interpretation of modal logics has reared its beautiful head repeatedly in the writings of Stig Kanger Richard Montague the pre Montague semantics theorist and Nino Cocchiarella

Kudankulam Raminder Kaur,2020-02-14 Since the 1980s the Kudankulam Nuclear Power Plant in the south Indian state of Tamil Nadu has faced multiple forms of resistance Women and men from different walks of life fishers farmers environmentalists activists writers scholars teachers journalists doctors and lawyers among many others have come together to combat the deadly radioactive repercussions and repression that come with the development of a high security nuclear installation Drawing upon their experiences this historical and ethnographic study accounts for the anti nuclear campaign s part in right to lives movements while engaging with the re production of knowledge and ignorance in the understanding of radiation and efforts to create an evidence base in response to the otherwise unavailable or insufficient data on the environment and public health in India Tracing the grassroots struggle for energy justice off and on line the author looks into the larger questions of development democracy and nationalism These have marked not just parts of India identified for large scale constructions but also other regions of the world where state functionaries have much to gain from corporate collaborations at the cost of local residents who lose their livelihoods and are forcibly displaced persecuted or even killed in order to execute governmental designs in the name of the nation Instituting Nature Andrew S. Mathews,2011-11-04 A study of how encounters between forestry bureaucrats and indigenous forest managers in Mexico produced official knowledge about forests and the state Greater knowledge and transparency are often promoted as the keys to solving a wide array of governance problems In Instituting Nature Andrew Mathews describes Mexico s efforts over the past hundred years to manage its forests through forestry science and biodiversity conservation He shows that transparent knowledge was produced not by official declarations or scientists expertise but by encounters between the relatively weak forestry bureaucracy and the indigenous people who manage and own the pine forests of Mexico Mathews charts the performances collusions complicities and evasions that characterize the forestry bureaucracy He shows that the authority of forestry officials is undermined by the tension between local realities and national policy officials must juggle sweeping knowledge

claims and mundane concealments ambitious regulations and routine rule breaking Moving from government offices in Mexico City to forests in the state of Oaxaca Mathews describes how the science of forestry and bureaucratic practices came to Oaxaca in the 1930s and how local environmental and political contexts set the stage for local resistance He tells how the indigenous Zapotec people learned the theory and practice of industrial forestry as employees and then put these skills to use when they become the owners and managers of the area s pine forests eventually incorporating forestry into their successful claims for autonomy from the state Despite the apparently small scale and local contexts of this balancing act between the power of forestry regulations and the resistance of indigenous communities Mathews shows that it has large implications for how we understand the modern state scientific knowledge and power and for the global carbon markets for which Mexican forests might become valuable
