Guy Standing

Eroding The Commons:

Eroding the Commons David Anderson, 2002 Colonial Baringo was in many respects an unexceptional place a backwater in the semi arid Rift Valley of Kenya lacking in cash crops and distant from larger markets But in the middle years of colonial rule Baringo's anonymity gave way to notoriety Prolonged drought and localized famine in the district from the mid 1920s led to claims that Baringo was a land of dramatic decay brought on by overcrowding and livestock mismanagement In response to the alarm over erosion the state embarked upon a programme for rehabilitation conservation and development Baringo's experience became a point of reference for similar programmes elsewhere in British Africa especially in the 1950s when state led rural development encompassed not just economic growth but an accelerated transformation of African society The politics of African nationalism was fuelled by opposition to colonial development policies and in Baringo the politics of the nationalist era was the politics of ecology The longevity of colonial interventions in Baringo provides an excellent focus for the study of the broader evolution of colonial ideologies and practices of development These ideologies and practices are fundamental to an understanding of the history of development in all parts of Africa *The Digital Condition* Felix

Stalder, 2018-03-16 Our daily lives our culture and our politics are now shaped by the digital condition as large numbers of people involve themselves in contentious negotiations of meaning in ever more dimensions of life from the trivial to the profound They are making use of the capacities of complex communication infrastructures currently dominated by social mass media such as Twitter and Facebook on which they have come to depend Amidst a confusing plurality Felix Stalder argues that are three key constituents of this condition the use of existing cultural materials for one's own production the way in which new meaning is established as a collective endeavour and the underlying role of algorithms and automated decision making processes that reduce and give shape to massive volumes of data These three characteristics define what Stalder calls the digital condition Stalder also examines the profound political implications of this new culture We stand at a crossroads between post democracy and the commons a concentration of power among the few or a genuine widening of participation with the digital condition offering the potential for starkly different outcomes This ambitious and wide ranging theory of our contemporary digital condition will be of great interest to students and scholars in media and communications cultural studies and social political and cultural theory as well as to a wider readership interested in the ways in which culture and politics are changing today

The Blue Commons Guy Standing, 2022-07-07 A FINANCIAL TIMES BEST ECONOMICS BOOK OF 2022 A landmark book The Blue Commons is at once a brilliant synthesis a searing analysis and an inspiring call to action David Bollier With remarkable erudition passion and lyricism Guy Standing commands the reader to wake up to the threat posed by rentier capitalism's violent policies for extraction exploitation and depletion of that which is both common to us all but also vital to our survival the sea and all within it Ann Pettifor Shines a bright light on the economy of the oceans directing us brilliantly towards where a sustainable future lies Danny Dorling This is a powerful visionary book

essential reading for all who yearn for a better world Jason Hickel The sea provides more than half the oxygen we breathe food for billions of people and livelihoods for hundreds of millions But giant corporations are plundering the world's oceans aided by global finance and complicit states following the neoliberal maxim of Blue Growth The situation is dire rampant exploitation and corruption now drive all aspects of the ocean economy destroying communities intensifying inequalities and driving fish populations and other ocean life towards extinction The Blue Commons is an urgent call for change from a campaigning economist responsible for some of the most innovative solutions to inequality of recent times From large nations bullying smaller nations into giving up eco friendly fishing policies to the profiteering by the Crown Estate in commandeering much of the British seabed the scale of the global problem is synthesised here for the first time as well as a toolkit for all of us to rise up and tackle it The oceans have been left out of calls for a Green New Deal but must be at the centre of the fight against climate change How do we do it By building a Blue Commons alternative a transformative worldview and new set of proposals that prioritise the historic rights of local communities the wellbeing of all people and with it the health of our oceans

Resilience and Collapse in African Savannahs Michael Bollig, David M. Anderson, 2018-10-11 This book assesses the causes and consequences of environmental change in East Africa asking whether local African communities are sufficiently resilient to cope with the ecological and social challenges that confront them It focuses on the savannahs of the Baringo Bogoria basin and the surrounding highlands of Kenya's northern Rift Valley that form the social ecological system of the specialised cattle pastoralists and niche agricultural farmers who occupy these semi arid lands Historical studies of resilience spanning the past two centuries are linked with analysis of current environmental challenges and the ecological social economic and political responses mounted by local communities The authors question whether the most recent challenges confronting the peoples of eastern Africa's savannahs intensified conflicts mounting poverty driven by demographic pressures and dramatic ecological changes brought by invasive species might soon lead to a collapse in essential elements of the specialised cattle pastoralism that dominates the region requiring a re-orientation of the social ecological system This book was originally published as a special issue of the Journal of Eastern African Studies

The Commons and a New Global Governance Samuel Cogolati, Jan Wouters, 2018-12-28 Given the new found importance of the commons in current political discourse it has become increasingly necessary to explore the democratic institutional and legal implications of the commons for global governance today This book analyses and explores the ground breaking model of the commons and its relation to these debates

Plunder of the Commons Guy Standing, 2019-08-29 One of the most important books I've read in years Brian Eno We are losing the commons Austerity and neoliberal policies have depleted our shared wealth our national utilities have been sold off to foreign conglomerates social housing is almost non-existent our parks are cordoned off for private events and our national art galleries are sponsored by banks and oil companies This plunder deprives us all of our common rights recognized as far back as the Magna Carta and the Charter of the Forest of

1217 to share fairly and equitably in our public wealth Guy Standing leads us through a new appraisal of the commons stemming from the medieval concept of common land reserved in ancient law from marauding barons to his modern reappraisal of the resources we all hold in common a brilliant new synthesis that crystallises quite how much public wealth has been redirected to the 1% in recent decades through the state approved exploitation of everything from our land to our state housing health and benefit systems to our justice system schools newspapers and even the air we breathe Plunder of the Commons proposes a charter for a new form of commoning of remembering guarding and sharing that which belongs to us all to slash inequality and soothe our current political instability **Routledge Handbook of the Study of the**

Commons Blake Hudson, Jonathan Rosenbloom, Dan Cole, 2019-01-04 This comprehensive Handbook serves as a unique synthesis and resource for understanding how analytical frameworks developed within the literature assist in understanding the nature and management of commons resources Such frameworks include those related to Institutional Analysis and Development Social Ecological Systems and Polycentricity among others The book aggregates and analyses these frameworks to lay a foundation for exploring how they apply according to scholars across a wide range of disciplines It includes an exploration of the unique problems arising in different disciplines of commons study including natural resources forests oceans water energy ecosystems etc economics law governance the humanities and intellectual property It shows how the analytical frameworks discussed early in the book facilitate interdisciplinarity within commons scholarship This interdisciplinary approach within the context of analytical frameworks helps facilitate a more complete understanding of the similarities and differences faced by commons resource users and managers the usefulness of the commons lens as an analytical tool for studying resource management problems and the best mechanisms by which to formulate policies aimed at addressing such problems Chapter 26 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Population, Tradition, and Environmental Control in Colonial Kenya Martin S. Shanguhya, 2015 Examines land management programs pushed by the colonial government in western Kenya between 1920 and 1963 analyzing how those programs were negotiated or contested by the local community Resource Efficiency Complexity and the Commons Bruce Lankford, 2013-09-05 The efficient use of natural resources is key to a sustainable economy and yet the complexities of the physical aspects of resource efficiency are poorly understood In this challenging book the author proposes a major advance in our understanding of this topic by analysing resource efficiency and efficiency gains from the perspective of common pool resources applying this idea particularly to water resources and its use in irrigated agriculture The author proposes a novel concept of the paracommons through which the savings of increased resource efficiency can be viewed In effect he asks who gets the gain of an efficiency gain By reusing economising and avoiding losses wastes and wastages freed up resources are available for further use by four destinations the same user parties directly connected to that user the wider economy or

returned to the common pool The paracommons is thus a commons of and competition for resources salvaged by changes to the efficiency of natural resource systems The idea can be applied to a range of resources such as water energy forests and high seas fisheries Five issues are explored the complexity of resource use efficiency the uncertainty of efficiency interventions and outcomes destinations of freed up losses wastes and wastages implications for resource conservation and the interconnectedness of users and systems brought about by efficiency changes The book shows how these ideas put efficiency on a par with other dimensions of resource governance and sustainability such as equity justice resilience and access

Capitalism and the Commons Andreas Exner, Sarah Kunnig, Stephan Hochleithner, 2020-12-30 Capitalism and the Commons focuses on the political and social perspectives that commons offer how they are appropriated or suppressed by capital and state and how social initiatives and movements contest these dynamics or build their struggles on commoning The volume comprises theoretical and empirical approaches that engage with three main themes conceptualizing the commons analyzing practices of commoning and exploring commons politics In their contributions the authors focus on the development of anti capitalist commons and explore the issue of practice and politics through case studies from Colombia the Democratic Republic of Congo South Africa and Africa more broadly Austria Germany and South Korea ranging from peri urban and rural agriculture to urban commons and how they manifest in the Global South as well as in the Global North The book engages with different discourses on the commons in regard to their relevance for social change and thereby reinvigorates the political meaning of the commons It provides an original and important approach to the topic in terms of conceptualization detailing diverse empirical realities and analyzing potential perspectives In so doing the book transcends narrow disciplinary boundaries and expands the focus to the global Providing a fresh perspective on the commons as a decisive component of alternatives this title will be relevant to scholars and students of resource management social movements and sustainable development more broadly

Governing the Commons in China Yan Zhang, 2017-01-20 The idea of the commons is a long standing concept in the English speaking world and in English law A similar concept occurs in China How different from or similar to the English idea of the commons is the idea in China and how is the concept applied This book explores this important subject It examines the subject from a philosophical and theoretical perspective considers the commons widely including tangible commons of resources intangible commons of culture identity and social capital and institutional commons of welfare security and public goods and goes on to examine the concept as it applies to the hydropower developments along the Lancang River outlining the different competing interests of local people central and provincial government and environmental considerations It argues that the concept of the commons in China is dual dimensional with a vertical dimension of public authority and a horizontal dimension of commonly sharing that power structures in China have often been flexible and polycentric and that correctly applied this approach will do much to serve the common interest of the people ensuring positive impacts for shared prosperity for multiple stakeholders whilst mitigating

the negative impacts involved in the delivery of such positive impacts **Knowledge, Power, and a Region** Getnet Bekele, 2005 From Capital to Commons Hannes Gerhardt, 2024-11-12 A Choice Outstanding Academic Title in Economics 2023 In this stimulating analysis Hannes Gerhardt outlines the potentials and challenges of a technology enabled commons focused transition out of capitalism The book shows that openness and cooperation are more beneficial in today's economies and societies than competition and profit seeking Driven by this conviction Gerhardt identifies key imperatives for overcoming capitalism from democratizing our digital material and financial economies to maintaining a robust political mobilization Using clear examples he explores tactical openings through the lens of compeerism a newly constructed framework that highlights the latent counter capitalist possibilities but also limits of our emerging technological landscape This is an accessible contribution to counter capitalist discourse that is both inspiring and pragmatic for academics and activists alike **Implementing the Endangered Species Act on the Platte Basin Water Commons** David M. Freeman, 2012-10-15 Water users of the Platte River Basin have long struggled to share this scarce commodity in the arid high plains ultimately organizing collectively owned and managed water systems allocating water along extensive stream systems and integrating newer groundwater with existing surface water uses In 1973 the Endangered Species Act brought a new challenge incorporating the habitat needs of four species the whooping crane piping plover least tern and pallid sturgeon into its water management agenda Implementing the Endangered Species Act on the Platte Basin Water Commons tells of the negotiations among the U S Department of the Interior the environmental community and the states of Wyoming Colorado and Nebraska that took place from the mid 1970s to 2006 Ambitious talks among rival water users environmentalists state authorities and the Department of the Interior finally resulted in the Platte River Habitat Recovery Program Documenting how organizational interests found remedies within the conditions set by the Endangered Species Act describing how these interests addressed habitat restoration and advancing sociological propositions under which water providers transcended self interest and produced an agreement benefiting the environment this book details the messy process that took place over more than thirty years Presenting important implications for the future of water management in arid and semi arid environments this book will be of interest to anyone involved in water management as well as academics interested in the social organization of common property **The Art of the Creative Commons** Miłosz Miszczyński, 2022-05-09 The Art of the Creative Commons is a book about peer to peer production providing a unique model of commons from the creative industries The book expands the knowledge about the role in which an alternative framework of copyright protection Creative Commons regulates and establishes norms and conventions within the commons The book gives insight into a vibrant community that fosters creative projects and a variety of works from elementary school plays to exhibitions in the Smithsonian or multimillion dollar Hollywood films Taking up the perspective of the creative workforce involved in production and collaboration permits understanding the rules of production that follow an alternative model of

production By analyzing issues of media production this book engages with current scholarship on critical management political economy and cultural studies **The Commons in History** Derek Wall,2017-09-08 An argument that the commons is neither tragedy nor paradise but can be a way to understand environmental sustainability The history of the commons jointly owned land or other resources such as fisheries or forests set aside for public use provides a useful context for current debates over sustainability and how we can act as good ancestors In this book Derek Wall considers the commons from antiquity to the present day as an idea an ecological space an economic abstraction and a management practice He argues that the commons should be viewed neither as a tragedy of mismanagement as the biologist Garrett Hardin wrote in 1968 nor as a panacea for solving environmental problems Instead Walls sees the commons as a particular form of property ownership arguing that property rights are essential to understanding sustainability How we use the land and its resources offers insights into how we value the environment After defining the commons and describing the arguments of Hardin s influential article and Elinor Ostrom s more recent work on the commons Wall offers historical case studies from the United States England India and Mongolia He examines the power of cultural norms to maintain the commons political conflicts over the commons and how commons have protected or failed to protect ecosystems Combining intellectual and material histories with an eye on contemporary debates Wall offers an applied history that will interest academics activists and policy makers

Against the Commons Álvaro Sevilla-Buitrago,2022-09-27 An alternative history of capitalist urbanization through the lens of the commons Characterized by shared self managed access to food housing and the basic conditions for a creative life the commons are essential for communities to flourish and protect spaces of collective autonomy from capitalist encroachment In a narrative spanning more than three centuries Against the Commons provides a radical counterhistory of urban planning that explores how capitalism and spatial politics have evolved to address this challenge Highlighting episodes from preindustrial England New York City and Chicago between the 1850s and the early 1900s Weimar era Berlin and neoliberal Milan lvaro Sevilla Buitrago shows how capitalist urbanization has eroded the egalitarian convivial life worlds around the commons The book combines detailed archival research with provocative critical theory to illuminate past and ongoing struggles over land shared resources public space neighborhoods creativity and spatial imaginaries Against the Commons underscores the ways urbanization shapes the social fabric of places and territories lending particular awareness to the impact of planning and design initiatives on working class communities and popular strata Projecting history into the future it outlines an alternative vision for a postcapitalist urban planning one in which the structure of collective spaces is ultimately defined by the people who inhabit them The Commons ,2001 This cd rom is for high school and up and is correlated with National Science Education Standards Commons, Sustainability, Democratization Hans Peter Hansen,Birger Steen Nielsen,Nadarajah Sriskandarajah,Ewa Gunnarsson,2016-01-22 This book presents theoretical discussions and practical examples of Action Research from Scandinavia Latin America and Africa primarily dealing with how

to combine nature conservation and management with local democratic community development seeing the renewal of Commons as a way to transcend the present dichotomy between these two dimensions Underneath the Knowledge Commons J. Berry Slater, 2005-11 The struggle to protect the so called Knowledge Commons against the current regime of IP enclosures is gathering momentum Referencing the shared popular ownership of common lands in the pre capitalist era today s knowledge commoners want to build a resource a life source of intellectual wealth to sustain people living under informatic capitalism
