Hardie,Mary Whitby,1987-01-01 **Resemblance and Reality in Greek Thought** Arum Park,2016-09-13 Resemblance and Reality in Greek Thought follows the construction of reality from Homer into the Hellenistic era and beyond Not only in didactic poetry or philosophical works but in practically all genres from the time of Homer onwards Greek literature has shown an awareness of the relationship between verbal art and the social historical or cultural reality that produces it an awareness that this relationship is an approximate one at best and a distorting one at worst This central theme of resemblance and its relationship to reality draws together essays on a range of Greek authors and shows how they are unified or allied in posing similar questions to classical literature **A Companion to Greek and Roman Sexualities** Thomas K.

Hubbard,2013-11-21 A Companion to Greek and Roman Sexualities presents a comprehensive collection of original essays relating to aspects of gender and sexuality in the classical world Views the various practices and discursive contexts of sexuality systematically and holistically Discusses Greece and Rome in each chapter with sensitivity to the continuities and differences between the two classical civilizations Addresses the classical influence on the understanding of later ages and religion Covers artistic and literary genres various social environments of sexual conduct and the technical disciplines of medicine magic physiognomy and dream interpretation Features contributions from more than 40 top international scholars

posterity From noble deaths in civil war mortal combat between gladiators political execution and suicide to the deathly dinner of Domitian the harrowing deaths of women such as the mythical Lucretia and Nero's mother Agrippina as well as instances of Christian martyrdom Edwards engagingly explores the culture of death in Roman literature and history

Virgil Recomposed Scott McGill, 2005-07-28 The Virgilian centos anticipate the avant garde and smash the image of a staid sober and centered classical world This book examines the twelve mythological and secular Virgilian centos that survive from antiquity The centos in which authors take non consecutive lines or segments of lines from the Eclogues Georgics and Aeneid and reconnect them to produce new poems have received limited attention No other book length study exists of all the centos which date from ca 200 to ca 530 The centos are literary games and they have a playful shock value that feels very modern Yet the texts also demand to be taken seriously for what they disclose about late antique literary culture Virgil's reception and several important topics in Latin literature and literary studies generally As radically intertextual works the centos are particularly valuable sites for pursuing inquiry into allusion Scrutinizing the peculiarities of the texts allusive engagements with Virgil requires clarification of the roles of the author and the reader in allusion the criteria for determining what constitutes an allusion and the different functions allusion can have By investigating the centos from these different perspectives and asking what they reveal about a wide range of weighty subjects this book comes into dialogue with major topics and studies in Latin literature
