*Membrane Function: short-term and long-term* J.M. Ritchie, P. Magistretti, L. Bolis, 2012-12-02 A critical factor in cell to cell interactions is the presence in the cell membrane of highly specific ion channels controlled by specific receptors that are bound to and activated by a gamut of external hormones and neurotransmitters Through both this action on ion channels and action on other membrane components such as G proteins extracellular signals alter intracellular events usually through the mediation of second messengers and so provide the basis for the transduction mechanism connecting extracellular signals with intracellular effectors This volume deals with the various ways that such membrane function is controlled *Annual Reports in Medicinal Chemistry*, 1990-10-10 Annual Reports in Medicinal Chemistry **Journal of the National Cancer Institute**, 1989 *Harold Garfinkel: Studies of Work in the Sciences* Harold Garfinkel, 2022-04-25 This volume includes an unpublished manuscript and selected portions of five seminars by Harold Garfinkel the founder of ethnomethodology on the topic of practices in the natural sciences and mathematics The volume provides a coherent and sustained account of his program for the study of ordinary and specialized social actions Presenting broader theoretical and methodological initiatives as well as discussions and summaries of exemplary studies of social phenomena within and beyond the sciences this work dates to the period in the 1980s during which the field of Science and Technology Studies was taking shape with ethnomethodological studies of scientific practice forming a major part of its development at the time Aside from their historical importance the manuscript and seminars present a distinctive perspective on the natural and social sciences that remains highly original and pertinent to research on science social science and everyday life today Offering critical insights and proposals relating to developments in Ethnomethodology and Conversation Analysis this volume will appeal to scholars of Sociology and Science and Technology Studies with interests in the work of Garfinkel The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license [Caught By Viruses](#) Michael G Rossmann, 2021-11-10 The current book attempts to give a glimpse of the scientific life of Michael Rossmann The book begins with his very interesting and moving autobiography His enormous energy must have been evident already from early childhood when he and his mother had to emigrate from Nazi Germany to England via The Netherlands Starting school with a new language was a challenge that he managed well with the assistance of understanding teachers Crystallography soon became the tool to explore new worlds unknown to everybody With a skill for mathematics he realized that the transform of a molecular structure in the diffraction pattern could be used for analysis of both symmetry and structural relationships This method molecular replacement MR also the initials of his name became one of his great successes of his career The previous book by him in this series *Selected Papers by Michael G Rossmann with Commentaries* covers his main contributions in this area With an interest in symmetry viruses became obvious objects to study Rossmann attacked these monstrously large molecular assemblies with his unfailing energy and his appetite for real challenges The amazing variation of molecular arrangements with icosahedral symmetry is truly amazing

This book includes a selection of reports of the structures of some giant viruses As always knowing the structure enhances the understanding of function greatly in the case of viruses the mechanism of infection is a key problem Rossmann has contributed many central insights in this area Thus this book is of interest both as an interesting personal story but also for research into viruses that repeatedly plague all living organisms on the planet right now in the form of the corona virus pandemic
