homes will become smart homes But these systems have become omnipresent without our necessarily understanding them They are not just black boxes but invisible entities in our homes and everyday lives which work through hidden flows of data unknown agendas imaginary clouds mysterious sets of rules which we perhaps dismiss as algorithms or even AI without really understanding what that means On some level the superstitions and sense of wonder and ways of relating to the unknown and the supernatural deities spirits ghosts which humanity has felt in every culture throughout history have not gone away but started to become transferred and transmuted into new forms

The Village That Died for England Patrick

Wright, 2021-09-14 A reissue of Patrick Wright s 1995 classic about the military takeover of the village of Tyneham with a new introduction taking in Brexit and a new wave of British nationalism Shortly before Christmas in 1943 the British military announced they were taking over a remote valley on the Dorset coast and turning it into a firing range for tanks in preparation for D Day The residents of the village of Tyneham loyally packed up their things and filed out of their homes into temporary accommodation yet Tyneham refused to die Although it was never returned to its pre war occupants and owners Tyneham would persist through a long and extraordinary afterlife in the English imagination It was said that Churchill himself had promised that the villagers would be able to return once the war was over and that the post war Labour government was responsible for the betrayal of that pledge Both the accusation and the sense of grievance would

reverberate through many decades after that Back in print and with a brand new introduction this book explores how Tyneham came to be converted into a symbol of posthumous England a patriotic community betrayed by the alleged humiliations of post war national history Both celebrated and reviled at the time of its first publication in 1995 The Village that Died for England is indispensable reading for anyone trying to understand where Brexit came from and where it might be leading us **Kaapse bibliotekaris** ,2017 Issues for Nov 1957 include section Accessions Aanwinste Sept 1957

The Man Who Broke Michelangelo's Nose Felipe Pereda, 2024-08-20

Renaissance sculptor Pietro Torrigiano has long held a place in the public imagination as the man who broke Michelangelo's nose. Indeed, he is known more for that story than for his impressive prowess as an artist. This engagingly written and deeply researched study by Felipe Pereda, a leading expert in the field, teases apart legend and history and reconstructs Torrigiano's work as an artist. Torrigiano was in fact one of the most fascinating characters of the sixteenth century. After fighting in the Italian wars under Cesare Borgia, the Florentine artist traveled across four countries working for such patrons as Margaret of Austria in the Netherlands and the Tudors in England. Torrigiano later went to Spain where he died in prison, accused of heresy by the Inquisition for breaking a sculpture of the Virgin and Child that he had made with his own hands. In the course of his travels, Torrigiano played a crucial role in the dissemination of the style and the techniques that he learned in Florence, and he interacted with local artisanal traditions and craftsmen, developing a singular terracotta modeling technique that is both a response to the authority of Michelangelo and a unique testimony to artists' mobility in the period. As Pereda shows, Torrigiano's life and work constitute an ideal example to rethink the geography of Renaissance art, challenging us to reconsider the model that still sees the Renaissance as expanding from an Italian center into the western periphery.
