Harvard Architecture Review Vol 9 On Architectural Research:

Leadership in Architectural Research Hazem Rashed-Ali, Shelley Roff, 2009 *Experiential Visualization in Architectural Design Media* Vincent B. Canizaro, 2023-10-30 *Experimental Visualization in Architectural Design Media How It Actually Works* is a theoretical practical and interdisciplinary account of the tools used by architects and designers The book focuses on the how these tools influence their ability to envision and craft the future experiential reality of buildings and environments The book is structured around two parallel sets of questions The first concerns the effects of various media on the designer's understanding of their work in experiential terms The media considered include the process of design build standard media such as scale model building hand drawing drafting and extends into the now dominant digitally based design media of BIM digital modeling and emerging VR technologies such as Enscape The second line of questioning seeks patterns of use and other attributes designers deploy in practice to achieve an experiential and meaningful understanding of their work with and through each medium To answer these questions the author provides a detailed assessment of the pros and cons affordance and constraint of each form of mediation and a set of recommendations documenting how experienced designers enhance their visualization skills to support such experiential design This work is interwoven with interdisciplinary consideration of technology perception media studies history and bolstered by the direct experiences of design professionals This book will be of interest to researchers working in the field of architecture and design as well as practising architects designers and students who are seeking guidance on how to effectively design and consider the experience of their future built environments

Research Methods for the Architectural Profession Ajla Aksamija, 2021-03-03 *Research Methods for the Architectural Profession* introduces research as a systematic process describes how to formulate research questions provides an in depth explanation of different research methods qualitative quantitative and experimental and explains how to select appropriate research methods and execute research studies It describes the process of documentation knowledge dissemination and application of research results in architectural design and practice Most importantly it provides guidelines for integrating research into profession and uses extensive case studies and practice relevant examples to illustrate main concepts procedures and applications Integrating research into practice is essential for developing new knowledge solving design and technical problems overcoming different types of challenges present in the contemporary profession and improving the design outcomes Innovation requires a much stronger correlation between research and design and it is pertinent for the future of architectural practice that research becomes an integral part of architectural profession This book provides a roadmap for successfully integrating research into architectural design and for establishing innovative practices regardless of a firm's size Written by an architecture professor with an extensive research and professional background specifically focusing on integrating research into practice and richly illustrated with over 150 color images this reference will be useful for both students and practitioners

The Architectural Review, 1914 *German Façade Design* Randall

Ott, 2016-09-17 German architecture prior to the modern period has received less systemic analytical study than that of Italy France and Britain Scholarly discussion of broad traditions or continuities within Germanic or Central European facade design is even sparser Baroque era studies of the region mostly devote themselves to isolated architects monuments or movements Modernism's advent decisively changed this Germanic architecture enjoyed sudden ascendancy Yet even so study specifically of that region's facades still lagged nothing compares to the dozens of treatments of Le Corbusier's facade systems for example and how these juxtapose with French neoclassical or Italian Renaissance methods Given the paucity of multi period studies one can be forgiven for believing Germany's effervescence of radical modern works seems unprecedented This book takes up these multiple quandaries It identifies and documents a previously unrecognized compositional tradition characterized here as the screen facade and posits it as a counter narrative critiquing the essentialist authentic canon currently dominant in Western architectural history By crossing evenly over the dividing line between the historical and modern periods it offers valuable insights on indigenous roots underlying some aspects of Germany's invigorating early twentieth century architectural developments The book chronologically examines 400 years of closely related facades concentrated in Germany but also found in Austria the Czech Republic German speaking Switzerland and nearby areas of Central Europe While nearly 75 buildings are mentioned and illustrated a dozen are given extensive analysis and the book focuses on the works of three architects Schinkel Behrens and Mies Relationships between examples of these three architects' facades far transcend mere homage amongst masters Glimmers of the system they eventually codify are apparent as early as at Heidelberg Castle in 1559 and Nuremberg's Rathaus in 1622 The book argues that in Germany northern Gothic affinities for bisection intense repetition and rote aggregation intersected with southern Classical affinities for symmetry hierarchy and centrality thereby spawning a unique hybrid product the screen facade Instead of graphic formality this study is guided by on site perceptions propositional contrasts means of approach interpretive conflicts and emotion and it relates the design of these facades to concepts proposed by contemporary philosophers including Novalis Hegel Nietzsche Freud Adorno and most importantly Gadamer on hermeneutics

Las Vegas in the Rearview Mirror Martino Stierli, 2013 An illustrated reevaluation of the seminal architectural manifesto *Learning from Las Vegas* It explores the significance of this controversial publication by situating it in the artistic architectural and urbanist discourse of the 1960s and 70s and by evaluating the book's enduring influence of visual studies and architectural research

Susan Sinclair, 2012-04-03 Following the tradition and style of the acclaimed *Index Islamicus* the editors have created this new *Bibliography of Art and Architecture in the Islamic World* The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages except Turkish between 1906 and 2011 This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies

Frank Lloyd Wright--the Lost Years, 1910-1922 Anthony Alofsin, 1993 New

definition to the little known work Wright produced during this period which he describes as Wright's primitivist phase. He traces this influence in his art through Wright's explorations of primitivist sources, innovations in sculpture, and an intensification of the architect's use of ornament. Less tangible but as important was Wright's view of himself, his art, and society. Alofsin uncovers the European impact on the architect's image of himself as a Urban Planning Theory since 1945 Nigel Taylor, 1998-06-11. Following the Second World War, modern systems of urban and regional planning were established in Britain and most other developed countries. In this book, Nigel Taylor describes the changes in planning thought which have taken place since then. He outlines the main theories of planning from the traditional view of urban planning as an exercise in physical design to the systems and rational process views of planning of the 1960s, from Marxist accounts of the role of planning in capitalist society in the 1970s to theories about planning implementation and more recent views of planning as a form of communicative action. **Finishing School**, 2003 **Highland Park and River Oaks** Cheryl Caldwell Ferguson, 2014-08-27. In the early twentieth century, developers from Baltimore to Beverly Hills built garden suburbs, a new kind of residential community that incorporated curvilinear roads and landscape design as picturesque elements in a neighborhood. Intended as models for how American cities should be rationally, responsibly, and beautifully modernized, garden suburban communities were fragments of a larger, if largely imagined, garden city, the mythical good city of U.S. city planning practices of the 1920s. This extensively illustrated book chronicles the development of the two most fully realized garden suburbs in Texas: Dallas's Highland Park and Houston's River Oaks. Cheryl Caldwell Ferguson draws on a wealth of primary sources to trace the planning, design, financing, implementation, and long-term management of these suburbs. She analyzes homes built by such architects as H. B. Thomson, C. D. Hill, Fooshee Cheek, John F. Staub, Birdsall P. Briscoe, and Charles W. Oliver. She also addresses the evolution of the shopping center by looking at Highland Park's Shopping Village, which was one of the first in the nation. Ferguson sets the story of Highland Park and River Oaks within the larger story of the development of garden suburban communities in Texas and across America to explain why these two communities achieved such prestige, maintained their property values, became the most successful in their cities in the twentieth century, and still serve as ideal models for suburban communities today. **The American Architect and the Architectural Review**, 1923 *Lebbeus Woods. Experimental architecture* Massimo Mucci, 2022-03-25. Nell'ampia produzione dell'architetto americano Lebbeus Woods, 1940-2012, alcuni progetti risalgono alla prima metà degli anni Novanta del secolo scorso, sono particolarmente rappresentativi del suo impegno nel ridefinire il ruolo politico dell'architettura nei processi di trasformazione della società. I tre progetti per le città di Zagabria, Sarajevo e L'Avana si distinguono per la ricerca originale e innovativa svolta dall'architetto su concetti quali *freespace*, *free zone*, *heterarchical city*, fino ad arrivare a temi progettuali di più ampia portata. Lo studio di questi progetti attraverso l'uso della rappresentazione dell'architettura come strumento di analisi compositiva permette di addentrarsi nelle procedure ideative e grafiche del progettista e di chiarire i punti di

contatto e le distanze rispetto alle tendenze architettoniche di quegli anni I lavori grafici sono qui considerati espressioni di un pensiero teorico critico sull'architettura elaborato attraverso l'uso esplorativo simultaneo del disegno e della scrittura intrecciati tra loro su più livelli semantici in una catena di invenzioni figurative Questo permette di riconoscere nell'opera di Woods l'uso del disegno come progetto e di capire aspetti non conosciuti del suo linguaggio architettonico approfondendone la genesi compositiva all'interno di un quadro culturale caratterizzato da temi a lui vicini come quello della *experimental architecture* il Deco struttivismo la trasformazione

Leading Collaborative Architectural Practice Erin Carraher, Ryan E. Smith, 2017-02-22 The groundbreaking guide to modern leadership in architectural practice Leading Collaborative Architectural Practice is the leadership handbook for today's design and

construction professionals Endorsed by the American Institute of Architects this book describes the collaborative approach to leadership that is becoming increasingly prevalent in modern practice gone are the days of authoritative star architects today's practice is a brand and requires the full input of every member of the team This book builds off of a two year AIA research project to provide a blueprint for effective leadership the ability awareness and commitment to lead project teams who work together to accomplish the project's goals Both group and individual hands-on exercises help facilitate implementation and extensive case studies show how these techniques have helped real world firms build exemplary success through collaborative teamwork and leadership Highly illustrated and accessible this approach is presented from the practicing architect's point of view but the universal principles and time tested methods also provide clear guidance for owners contractors engineers project managers and students Build a culture of collaboration commitment and interpersonal awareness Adopt effective leadership techniques at the team project or practice level Handle conflict and resolve communication issues using tested approaches Learn how real world projects use effective leadership to drive success The last decade has seen a sea change in architectural leadership New practices no longer adopt the name and identity of a single person but create their own identity that represents the collaborative work of the entire group Shifts in technology and changing workplace norms have made top-down management structures irrelevant so what does it now mean to lead Forefront presents effective contemporary leadership in the architectural practice and real world guidance on everyday implementation **Choice**, 1992 **Guide to Natural Ventilation in High Rise Office Buildings** Antony Wood, Ruba Salib, 2013 This guide sets out recommendations for every phase of the planning construction and operation of natural ventilation systems in these buildings including local climatic factors that need to be taken into account how to plan for seasonal variations in weather and the risks in adopting different implementation strategies All of the recommendations are based on analysis of the research findings from richly illustrated international case studies This is the first technical guide from the Council on Tall Buildings and Urban Habitat's Tall Buildings Sustainability Working Group looking in depth at a key element in the creation of tall buildings with a much reduced environmental impact while taking the industry closer to an appreciation of what constitutes a sustainable tall building and what factors affect the sustainability threshold for tall

Modern American Poetry and the Architectural Imagination Jo Gill, 2023-02-28 Modern American Poetry and the Architectural Imagination The Harmony of Forms assesses the relationship between architectural and poetic innovation in the United States across the twentieth century Taking the work of five key poets as case studies and drawing on the work of a rich range of other writers architects artists and commentators this study proposes that by examining the sustained and productive if hitherto overlooked engagement between the two disciplines we enrich our understanding of the complexity and interrelationship of both The book begins by tracing the rise of what was conceived of as modern and often international style architecture and by showing how poetry and architecture in the early decades of the century developed in dialogue and

within a shared and often transnational context It then moves on to examine the material aesthetic and social conditions that helped shape both disciplines offering new readings of familiar poems and bringing other pertinent resources to light It considers the uses to which poets of the period put the insights of architecture and vice versa In closing Gill turns to modern and contemporary architects written accounts of their own practice in memoirs and other commentaries and examines how they have assimilated or resisted the practice and vision of poetry
