growth of the entertainment broadcasting software and communications industries It reproduces articles written by an extensive list of leading thinkers US scholars represented in readings include James Boyle Lawrence Lessig Pamela Samuelson Mark Lemley Alfred Yen Julie Cohen Peter Jaszi and Eben Moglen Leading non US contributors include Alan Story Brian Fitzgerald and Peter Drahos These and other authors explain copyright origins the development of the law the theory of enclosure international trends recent developments and current and future directions Today the copyright system is often portrayed as an engine of growth and effective regulation as a predictor of economic development However critics see dangers in the expansion of intellectual property rights The articles in this volume focus principally on the digital age examining how copyright regulation is likely to affect goals of dissemination and access   *A Government of Wolves* John W. Whitehead,2013-06 A NATION OF SHEEP WILL BEGET A GOVERNMENT OF WOLVES EDWARD R MURROW America is fast moving into a state of lockdown Surveillance cameras drug sniffing dogs SWAT team raids roadside strip searches blood draws at DUI checkpoints mosquito drones tasers privatized prisons GPS tracking devices zero tolerance policies overcriminalization free speech zones these are all symptoms of the emerging police state in America A GOVERNMENT OF WOLVES paints a chilling portrait of a nation in the final stages of transformation into outright authoritarianism whose citizens have become little more than a nation of suspects to be cowed corralled and controlled Pulling from his extensive knowledge of constitutional law history and futuristic films John W Whitehead helps readers navigate this treacherous terrain and provides them with a blueprint for hopefully finding their way back to freedom   *Wld After Oil* Bruce Nussbaum,1984-06-29 From Simon Schuster The World After Oil is Bruce Nussbaum s exploration of the shifting axis of power wealth As Bruce Nussbaum describes in the race for the future as the book makes clear only those nations most capable of meeting the demands of the new age will realize its promise of wealth and power   Helicopters and North Sea Oil Peter Saxton,2023-11-23 A series of personal accounts by highly trained helicopter pilots including those with distinguished careers in the military and commercial flying who with divers ensured that essential staff could operate in North Sea oil exploration and oil supply They were the vital link in the process and operated in the most challenging circumstances often in high levels of danger and sometimes with loss of life for example the Piper Alpha Disaster which made national news And the ferrying of essential personnel and supplies could involve rescues as well routine flying missions The narrative is often technical but written to ensure good understanding for lay readers and it will of course appeal to the many with flying experience in the forces in commercial flying and government service Above all it is a series of graphic personal stories as recounted by individuals faced with extremes of climate weather technical engineering and aeronautical problems and often with human life at stake The people come to life and with domestic and social concerns and interests are real and believable people It is history of the North Sea oil episode in UK political and economic history and in conjunction with international oil politics is of huge importance to Britain s economy This is a period of progress to domestic oil independence

by about 1984 and so a key period with subsequent importance even to the present All aspects of the operations are covered within individual stories and include the broader questions of company policy regulation and trade union involvement

Computers for Social Change and Community Organizing John Downing,1991 Computers for Social Change and Community Organizing presents an original perspective on the uses of computers for community and social change based organizations Drawing on the experience of community organizers and administrators who use computers for social and political goals and computer consultants who tailor systems to the specialized needs of small non profit and membership groups the book offers valuable information and advice on traditional and innovative applications Computers for Social Change and Community Organizing aims to reach professionals who want to explore and use the computer efficiently and creatively including computer professionals working for social change administrators of small social service and community organizations leaders of self help organizations networks and coalitions paid and volunteer staff and leadership Chapters range from suggestions on data based implementation through reports on computer uses in neighborhood housing preservation and crime reduction to discussions of the broad issues surrounding the role of technology in democratic social movements This provocative book provides practical guidelines on computerizing for empowerment together with insights into the challenges faced by low budget organizations and contemporary social movements Computers for Social Change and Community Organizing incorporates material from the precedential first and second New York City Conferences on Computers for Social Change New Tools for Political and Community Organizing *The Social Significance of Telematics* Lars Qvortrup,1984-01-01 The assumption underlying this book is that we are facing a societal transformation a silent revolution in fact with consequences at least as far reaching as those of the Industrial Revolution The author of this book wants to intervene in the current discussion about this revolution a discussion which is normally colored by a resigned determinism maintaining that the transformation will come about all by itself as an automatic consequence of the development of technology As opposed to this the author wants to politicize the debate by insisting on the fact that this silent revolution is not inextricably tied to the automatically whirring computer discs of technological development but is dependent on a number of political choices **The Subject of Revolution** Jennifer L. Lambe,2024-08-27 From television to travel bans geopolitics to popular dance The Subject of Revolution explores how knowledge about the 1959 Cuban Revolution was produced and how the Revolution in turn shaped new worldviews Drawing on sources from over twenty archives as well as film music theater and material culture this book traces the consolidation of the Revolution over two decades in the interface between political and popular culture The subject of Revolution it proposes should be understood as the evolving synthesis of the imaginaries constructed by its many subjects including revolutionary leaders activists academics and ordinary people within and beyond the island s borders The book reopens some of the questions that have long animated debates about Cuba from the relationship between populace and leadership to the archive and its limits while foregrounding

the construction of popular understandings It argues that the politicization of everyday life was an inescapable effect of the revolutionary process as well as the catalyst for new ways of knowing and being **World Yearbook of Education 1988** Duncan Harris,2012-11-12 Published in the year 2005 World Yearbook of Education 1988 is a valuable contribution to Major Works Theorizing Surveillance David Lyon,2006-08 First published in 2006 Routledge is an imprint of Taylor Francis an informa company **Urban Circus** Catriona Rainsford,2013-05-21 A vivid personal account of Mexico s itinerant street performers **Shabba!** Frank Ingels,2008-10-09 A novel of suspense intrigue and technological secrets The aftermath of Desert Storm left a horrid suspicion of something gone terribly awry with our air combat capability The success of Desert Storm was blinding and so was the hint of disaster that lay in wait for the next armed conflict What did the evidence show in the Iraq conflict that so frightened those in the know How could they prove their suspicions Even more important how could they solve the puzzle and find an answer that would allow our air combat power to remain effective Curt Thomas one time CIA radar scientist now a little known professor is tasked to follow the leads and decipher the secrets of the new and awesome radar missile system that must exist He was once on the track of something akin but never could make it a working idea Now he must search intensively for the key that he missed before Learn why Thomas is led to China and to the keys he must have to protect our aircraft from certain death in the future The technology is real the danger is real and the conclusion is unusual and full of twists and turns *Data Protection, Computers, and Changing Information Practices* United States. Congress. House. Committee on Government Operations. Government Information, Justice, and Agriculture Subcommittee,1991 **Diversity of Information** United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Telecommunications, Consumer Protection, and Finance,1982
