Casting the Parthenon Sculptures from the Eighteenth Century to the Digital Age Emma M. Payne, 2021-04-08 Through the 19th century as archaeology started to emerge as a systematic discipline plaster casting became a widely adopted technique newly applied by archaeologists to document and transmit discoveries from their expeditions The Parthenon sculptures were some of the first to be cast In the late 18th century and the first years of the 19th century the French artist Fauvel and Lord Elgin's men conducted campaigns on the Athenian Acropolis Both created casts of parts of the Parthenon sculptures that they did not remove and these were sent back to France and Britain where they were esteemed and displayed alongside other original sections Henceforth casting was established as an essential archaeological tool and grew exponentially over the course of the century Such casts are now not only fascinating historical objects but may also be considered time capsules capturing the details of important ancient works when they were first moulded in centuries past This book examines the role of 19th century casts as an archaeological resource and explores how their materiality and spread impacted the reception of the Parthenon sculptures and other Greek and Roman works Investigation of their historical context is combined with analysis of new digital models of the Parthenon sculptures and their casts Sensitive 3D imaging techniques allow investigation of the surface markings of the objects in exceptionally fine detail and enable quantitative comparative studies comparing the originals and the casts The 19th century casts are found to be even more accurate but also complex than anticipated through careful study of their multiple layers we can retrieve surface information now lost from the originals through weathering and vandalism **Supports in Roman Marble Sculpture** Anna

Anguissola, 2018-02-15 The first study of a crucial aspect of Roman stone sculpture exploring the functions and aesthetics of non figural supports **Exhibiting Antonio Canova** Christina Ferando, 2025-10-01 Exhibiting Antonio Canova Display and the Transformation of Sculptural Theory argues that the display of Canova's sculptures in the late eighteenth and early nineteenth centuries acted as a catalyst for discourse across a broad range of subjects By enshrining his marble figures alongside plaster casts of ancient works bathing them in candlelight staining and waxing their surfaces and even setting them in motion on rotating bases Canova engaged viewers intellectually physically and emotionally These displays inspired

discussions on topics as diverse as originality and artistic production the association between the sculptural surface flesh and anatomy the relationship between painting and sculpture and the role of public museums Beholders discussions also shaped the legacy of important sculptural theories They helped usher in their modern definitions and created the lenses through which we experience and interpret works of art establishing modern attitudes not just towards sculpture but towards cultural patrimony in general

Italian Literature before 1900 in English Translation Robin Healey, 2011-12-15 Italian Literature before 1900 in English Translation provides the most complete record possible of texts from the early periods that have been translated into English and published between 1929 and 2008. It lists works from all genres and subjects and includes translations wherever they have appeared across the globe. In this annotated bibliography Robin Healey covers over 5 200 distinct editions of pre 1900 Italian writings. Most entries are accompanied by useful notes providing information on authors works translators and how the translations were received. Among the works by over 1 500 authors represented in this volume are hundreds of editions by Italy's most translated authors Dante Alighieri Machiavelli and Boccaccio and other hundreds which represent the author's only English translation. Teaching with Objects David Gordon Mitten, Donato Attanasio, Amy Katherine Jones, 2010 This beautifully illustrated publication focuses on a spectrum of papers that were given at a major symposium honoring Gordon Mitten longtime Curator of Ancient Art and a professor in the classics department at Harvard University.

The Sculptural Environment of the Roman Near East Yaron Z. Eliav, Elise A. Friedland, Sharon Herbert, 2008 Public sculptures were the mass media of the Roman world. They populated urban centers throughout the empire serving as a plastic language that communicated political religious and social messages. This book brings together twenty eight experts who otherwise rarely convene text based scholars of the Greco Roman Jewish and Christian realms from the fields of classics history and religion and specialists in the artistic traditions of Greece and Rome as well as art historians and archaeologists. Utilizing the full spectrum of ancient sources the book examines the multiple at times even contradictory meanings and functions that statues served within the complex world of the Roman Near East. Moreover it situates the discussion of sculpture in the broader context of antiquity in order to reevaluate long held scholarly consensus on such ideas as the essence of Hellenism the culture that emerged from the encounter of Greco Romans with the Near East and the everlasting conflict among paganism Christianity and Judaism.
