A New Land Law Peter Sparkes, 2003-08-05 Peter Sparkes path breaking text on land law has been rewritten with two aims in mind to incorporate the seismic changes introduced by the Land Registration Act 2002 along with commonholds the explosion of human rights jurisprudence and the unremitting advance of judicial exposition and to accommodate the author's developing thinking on the structural aspects of the subject The book opens with a series of shorter chapters each exploring a fundamental building block registration houses flats and commonholds land ownership and its transactional powers social controls balanced by human rights to property fragmentation by time the doctrine of estates divisions of ownership and proprietary rights In terms of substantive chapters the book opens with discussion of the new transfer system paper based transfer alongside the evolution towards electronic conveyancing and the consequent changes to the proof of registered titles and to the registration curtain The new approach to adverse possession against registered titles has called for extended discussion as has the authoritative elucidation of the concept of adverse possession in Pye In terms of proprietary interests the fundamentals are seen as rights to transfer beneficial interests under trusts which are overreachable burdens which are enduring leases money charges such as mortgages which are redeemable and the obligations enforceable within the neighbour principle easements covenants and positive covenants being treated as a semi coherent whole An attempt has been made to assist students by moving some of the more arcane learning later into the book or into separate chapters where these matters might be more readily ignored by a candidate concerned primarily to prepare for an examination A massive amount of research and scholarship has gone into the book with impressive citation of cases articles and case notes and of other text books This newcomer on the scene is a considerable addition to the ranks of serious text books on land law and the author is to be congratulated The New Law Journal The scope of this work is ambitious it is a bold attempt to take the study of land law forward much more than a basic land law text book it would be a pleasure to be able to teach a course requiring students to cover the substance or the bulk of it whether in one or more modules a difficult blend of background and history massive referencing discussion of statute and case law all wrapped up in a text that is not too difficult to absorb The Law Teacher A most interesting and ground breaking book Michael Cardwell University of Leeds At last a brilliant land law book I think the approach is marvellous and will strongly recommend it to my students Keith Gompertz University of Central England takes a more modern approach to the area I am very impressed with the style layout and format It will be a good teaching tool and I am looking forward to using it Alison Dunn Newcastle Law School not baffling in the way land law texts tend to be Helen Taylor University of Teesside Excellent Professor Edward Burn City University

Land Law Ben Hopkins McFarlane (Nicholas Nield, Sarah), 2024 *The Distinction of Land and Goods in English, French, German and EU Law* Shaun Charlton, 2022-07-11 Most national law expositions leave a distinct impression of a naturalistic approach to the categorisation of property The view advocated in this study is that the accession or

severance of things to and from land as a natural scientific enquiry based exclusively on blends of physical attachment to or socially expressed intention in respect of land is misleading or at least not decisive National law accounts of the rules governing the distinction of land and goods need recalibrating to take account of the purpose or the legal reasons why land is being distinguished from goods This is well illustrated by the example of standing timber variously described doctrinally and in the national case law as integral parts of land or presently existing or future goods Purpose of classification reveals the many nuances of competing policy considerations and in turn better reflects the law as it stands The same principles may be applied to the case law of the CJEU

Land Law Kevin Gray, Susan Francis Gray, 2011-07-14 This seventh edition covers everything from the legal definition of land to the essential elements in a lease or tenancy and the function of covenants in the planning of land use

The Restrictive Covenant in the Control of Land Use Donald L. Sabey, Ann R. Everton, 2019-05-23 First published in 1999 this book breaks new ground by treating the restrictive covenant from the aspect of the control of land use At its heart is a detailed account of the discharge or modification mechanism a system of practical importance to professionals in law planning and land management This central component is furthered by an historical account of the development of the concept from *Tulk v Moxhay* the seminal case of 1848 to the present and by an assessment of its future in a legal system dominated by planning and environmental control It is a study of the way in which a particular equitable doctrine has grown from simple beginnings to become a tool of considerable practical importance enabling it to meet changing social and economic needs It charts the growth of a concept wherein principles of private and public law come together in the fields of property and planning and gives some pointers to possible reform of the law and the future role of the restrictive covenant

Indonesian Law 1949-1989 Pompe, 2023-09-20 This work is unique since it is the first comprehensive bibliography on Indonesian Law listing materials in various languages including Russian Japanese and Chinese The bibliography is divided into various fields of law and each chapter starts with an introduction on the related field The growing economic importance of Indonesia and the increasing trade relations with this country call for an instrument on how to find the law in Indonesia This bibliography will fill this gap as it includes all material on Indonesian law in a non Indonesian language which has been published since 1949

Making Sense of Land Law April Stroud, 2018-08-14 Taking a fresh and innovative approach to the subject *Making Sense of Land Law* is an essential textbook designed to help those coming to the subject for the first time Practical scenarios and diagrams are feature throughout making the subject come alive The Q A style of debate in the book is unique and takes the reader through the issues step by step This book is suitable as a core textbook but also as a revision guide or for self study This is an ideal text for a land law module at first or second year level as part of an LLB degree Also useful for undergraduates of other related disciplines in which an awareness of land and property law is required in an easy to digest and accessible manner such as planning estate management and business property and other built environment courses New to this Edition Fully revised and updated The latest on the law of

easements Discussion of the development in constructive and resulting trusts New Perspectives on Land Registration

Amy Goymour, Stephen Watterson, Martin Dixon, 2018-02-08 The Land Registration Act 2002 has been in force for almost fifteen years When enacted the legislation which replaced the Land Registration Act 1925 was intended to offer a clear and lasting framework for the registration of title to land in England and Wales However perhaps confounding the hopes of its drafters the legislation's interpretation and application has since generated many unanticipated problems which demand attention In this book's twenty chapters leading land law scholars Law Commissioners past and present judges and Registry lawyers unpick key technical controversies and expose underlying theoretical and policy concerns Core issues addressed in these chapters include the legitimate ambitions of registration regimes the nature and security of title afforded by registration the resolution of priority disputes affecting registered titles the relationship between the general law and the registration regime and new challenges presented by modern technological developments *Islamic Finance and Law*

Maha-Hanaan Balala, 2010-10-30 Islamic commercial and financial practice has not experienced the trial and error style of development that has characterised the development of the common law in the English speaking world Many of the principles rules and practices prevalent in the Islamic law of contract commerce finance and property remain the same as those outlined by the Quran and the Prophet Muhammad and expounded by scholars of jurisprudence as far back as the 13th century despite the advancement in time and sophistication of commercial interaction Hanaan Balala here demonstrates how in order to bridge the gap between the principles outlined by the Quran and the Prophet in the 7th century and commercial practice in the 21st century Islamic finance jurisdictions need to open themselves to learning from the experience including the mistakes of the English common law Islamic Finance and Law Theory and Practice in a Globalized World provides an analysis of the fundamental principles underlying the Islamic law of contract and commercial practice in comparison with their equivalents in common law in the English speaking world It seeks to draw parallels and differences where appropriate to facilitate the growth and development of Islamic commercial and financial law globally **Property Law** Alison

Clarke, Paul Kohler, 2005-12-01 An innovative examination of the law's treatment of property this student textbook provides an extremely useful and readable account of general property law principles It draws on a wide range of materials on property rights in general and the English property law system in particular looking at all kinds of property not just land It includes the core legal source materials in property law along with excerpts from social science literature legal theory and economics many of which are not easily accessible to law students These materials are accompanied by a critical commentary as well as notes questions and suggestions for further reading It will be of interest to undergraduate property law students and to non law students taking property law modules in courses covering planning environmental law economics and estate management
