Abstract—Adaptive workload prediction is a key challenge in proactive auto-scaling. In this paper, we propose a novel adaptive workload prediction algorithm that can predict the workload of a PaaS system in advance. The algorithm is based on the idea of using a machine learning model to predict the workload of a PaaS system. The algorithm is evaluated using a real-world dataset and the results show that it can predict the workload of a PaaS system with high accuracy.

Keywords—Proactive auto-scaling, workload prediction, machine learning, PaaS systems, cloud computing.
