**China, Russia, and Twenty-first Century Global Geopolitics** Paul J. Bolt, Sharyl Cross, 2018 This book provides a comprehensive analysis of the Chinese Russian bilateral relationship grounded in a historical perspective and discusses the implications of the burgeoning strategic partnership between these two major powers for world order and global geopolitics The volume compares the national worldviews priorities and strategic visions for the Chinese and Russian leadership examining several aspects of the relationship in detail The energy trade is the most important component of economic ties although both sides desire to broaden trade and investments In the military realm Russia sells advanced arms to China and the two countries engage in regular joint exercises Diplomatically these two Eurasian powers take similar approaches to conflicts in Ukraine and Syria and also cooperate on non traditional security issues including preventing coloured revolutions cyber management and terrorism These issue areas illustrate four themes Russia and China have common interests that cement their partnership including security protecting authoritarian institutions and re shaping

aspects of the global order They are key players not only influencing regional issues but also international norms and institutions The Sino Russian partnership presents a potential counterbalance to the United States and democratic nations in shaping the contemporary and emerging geopolitical landscape Nevertheless the West is still an important partner for China and Russia Both seek better relations with the West but on the basis of mutual respect and equality Lastly Russia and China have frictions in their relationship and not all of their interests overlap The Sino Russian relationship has gained considerable momentum particularly since 2014 as Moscow turned to Beijing attempting to offset tensions with the West in the aftermath of Russia s annexation of Crimea and intervention in Ukraine However so far China and Russia describe their relationship as a comprehensive strategic partnership but they are not allies

### **Foundations of empiricism** James K.

Feibleman,2012-12-06 For some centuries now the western world has endeavored to choose between rationalism and empiricism or when a choice was found impossible somehow to reconcile them But the particular brands of both which were taken for granted in confronting the problem were sUbjective individual human reasoning stood for rationalism and private sense experience for empiricism Since Plato it has been known that reasoning and feeling are often in conflict No wonder that a standard for deciding between them or for harmonizing the two was found difficult to come by Fortunately due to the revival of realism a way out presented itself and we could now consider rationalism and empiricism on some kind of objective basis In other words rationalism is a theory about something outside us and reasoning involves the utilization of a logic which in no wise depends upon our knowledge of it Similarly sense experience reveals the existence of data which can be reached through the senses but which in no way relies upon experience for its existence Thus both reasoning and sensing bring us fragmentary news about an external world which contains not only logic and value but also the prospects for their reconciliation The implicit philosophy of nominalism is self liquidating Where is the proposition which asserts or takes for granted the sole reality of actual physical particulars to get its reality The meaning of it as a proposition has no place among the particulars

### **The Philosophical Review** Jacob Gould

Schurman,James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham,1907 An international journal of general philosophy

### **As If Peoples Mattered** Zelim

Skurbaty,2021-11-22 Ours is an era of decline for the nation state and one of world wide concern for the problems surrounding sub state groups minorities peoples and indigenous populations The often violent resurgence of conflicts between these groups and States in even the stable democracies poses a challenge to international law as well as to liberal

political principles In this volume an expert in international minority rights provides not only significant clarification of the legal issues involved but also trenchant insights taken from a wide range of humanitarian disciplines from philosophy and systems theory to neuro linguistic programming NLP and transactional analysis TA The result is a meticulously researched book exploring from a variety of perspectives the terms peoples and minorities in international law as well as relationships between minorities peoples and indigenous rights individuation and self determination Of special interest is the attempt of the author to explain the existence of double standards in international minority rights dubbing them games with the help of transactional analysis and to redefine and reframe the basic terms such as international law sovereignty self determination etc The straightforward claim of the author is that the proposed theories can help both members of minorities and those in executive positions to gain insights on the cognitive level and make more congruent community oriented decisions on the practical level The book will hold particular appeal for all those interested in the international law of human rights politics and philosophy as well as students seeking a multi disciplinary perspective on these much debated areas

Ernesto Vivares, 2013-05-02 The crisis of the current global financial order is challenging us to critically reflect on how this order has been driven and the development outcomes produced by its central political and economic actors There is a great deal of academic knowledge about the role of the international financial institutions powerful states and capital markets in international development but there is little understanding of how regional dynamics and regional institutions influence global governance and developing countries This book offers an independent and grounded investigation concerning the political economic role of Regional Development Banks through a study of the world's leading regional development bank the Inter American Development Bank IDB The book examines the political economy of the IDB and its role in regional and national development during the neoliberalisation processes of the 1990s In particular the investigations explore the IDB's power in regional and national development via its technical political and financial interventions to frame policy alternatives absorb opposition forces support specific coalition forces and justify a particular direction of development all in order to legitimize specific political economic projects directed by market led pro reform coalitions aligned with global financial forces and financial development guidelines This book will be relevant to scholars and professionals interested in the international and regional political economy of development financing

**Liberty Beyond Neo-Liberalism** S. Slaughter, 2005-08-02 Under the conditions of economic globalization the prevailing liberal philosophy of governance is becoming increasingly problematic Liberty Beyond Neo Liberalism critiques three varieties of liberal engagement with the processes of globalization and their ability to temper the harmful effects of the process Steven Slaughter proposes an alternate approach global civic republicanism which seeks to retrieve the civic and public character of the state in order to protect it from economic vulnerability and to constitute a resilient form of liberty

**China and Global Nuclear Order**  
Nicola Horsburgh, 2015-02-12 This book offers an empirically rich study of Chinese nuclear weapons behaviour and the impact of this behaviour on global nuclear politics since 1949 China's behaviour as a nuclear weapons state is a major determinant of global and regional security For the United States there is no other nuclear actor with the exception of Russia that matters more to its long term national security However China's behaviour and impact on global nuclear politics is a surprisingly under researched topic Existing literature tends to focus on narrow policy issues such as misdemeanours in China's non proliferation record the uncertain direction of its military spending and nuclear force modernization or enduring opaqueness in its nuclear policy This book proposes an alternative context to understand both China's past and present nuclear behaviour its engagement with the process of creating and maintaining global nuclear order The concept of global nuclear order is an innovative lens through which to consider China as a nuclear weapons state because it draws attention to

the inner workings institutional and normative that underpin nuclear politics It is also a timely subject because global nuclear order is considered by many actors to be under serious strain and in need of reform Indeed today the challenges to nuclear order are numerous from Iranian and North Korean nuclear ambitions to the growing threat of nuclear terrorism This book considers these challenges from a Chinese perspective exploring how far Beijing has gone to the aid of nuclear order in addressing these issues     Weekly Compilation of Presidential Documents ,1991     *Public Papers of the Presidents of the United States* United States.
