King,2013-03-28 A touching and provocative exploration of the latest research on animal minds and animal emotions from the renowned anthropologist and author The Washington Post Scientists have long cautioned against anthropomorphizing animals arguing that it limits our ability to truly comprehend the lives of other creatures Recently however things have begun to shift in the other direction and anthropologist Barbara J King is at the forefront of that movement arguing strenuously that we can and should attend to animal emotions With *How Animals Grieve* she draws our attention to the specific case of grief and relates story after story from fieldsites farms homes and more of animals mourning lost companions mates or friends King tells of elephants surrounding their matriarch as she weakens and dies and in the following days attending to her corpse as if holding a vigil A housecat loses her sister from whom she s never before been parted and spends weeks pacing the apartment wailing plaintively A baboon loses her daughter to a predator and sinks into grief In each case King uses her anthropological training to interpret and try to explain

what we see to help us understand this animal grief properly as something neither the same as nor wholly different from the human experience of loss The resulting book is both daring and down to earth strikingly ambitious even as it s careful to acknowledge the limits of our understanding Through the moving stories she chronicles and analyzes so beautifully King brings us closer to the animals with whom we share a planet and helps us see our own experiences attachments and emotions as part of a larger web of life death love and loss      **Animal Biography** André Krebber,Mieke Roscher,2018-10-19

While historiography is dominated by attempts that try to standardize and de individualize the behavior of animals history proves to be littered with records of the exceptional lives of unusual animals This book introduces animal biography as an approach to the re framing of animals as both objects of knowledge as well as subjects of individual lives Taking an interdisciplinary perspective and bringing together scholars from among others literary historical and cultural studies the texts collected in this volume seek to refine animal biography as a research method and framework to studying capturing representing and acknowledging animal others as individuals From Heini Hediger s biting monitor Hachik and Murr to celluloid ape Caesar and the mourning of Topsy s gruesome death the authors discuss how animal biographies are discovered and explored through connections with humans that can be traced in archives ethological fieldwork and novels and probe the means of constructing animal biographies from taxidermy to film literature and social media Thus they invite deeper conversations with socio political and cultural contexts that allow animal biographies to provide narratives that reach beyond individual life stories while experimenting with particular forms of animal biographies that might trigger animal activism and concerns for animal well being spur historical interest and enrich the literary imagination      **Elephants!** Laurence Pringle,2021-08-03 Learn all about the elephant in this nonfiction picture book that explores every aspect of these giant mammals This latest title in the Strange and Wonderful series allows young readers to journey into the lives of elephants in various habitats throughout the world Kids will learn how elephants use their trunk how they communicate what they eat and about their family groupings The book also shows how we can ensure that elephants continue to live and thrive Combining careful research and beautiful illustrations this book is perfect for those who have an interest in animals and conservation
