Elephant Memories 13 Years In The Life Of The Elephant Family:

Elephant Memories Cynthia Moss, 2000 Cynthia Moss has studied the elephants in Kenya's Amboseli National Park for over twenty seven years. Her long term research has revealed much of what we now know about these complex and intelligent animals. Here she chronicles the lives of the members of the T families led by matriarchs Teresia, Slit Ear, Torn Ear, Tania and Tuskless. With a new afterword catching up on the families and covering current conservation issues, Moss's story will continue to fascinate animal lovers. One is soon swept away by this Babar for adults. By the end one even begins to feel an aversion for people. One wants to curse human civilization and cry out: Now God stand up for the elephants. Christopher Lehmann Haupt, New York Times. Moss speaks to the general reader with charm as well as scientific authority. An elegantly written and ingeniously structured account. Raymond Sokolov, Wall Street Journal. Moss tells the story in a style so conversational that I felt like a privileged visitor riding beside her in her rickety Land Rover as she showed me around the park. Sarah Blaffer Hrdy, New York Times Book Review. A prose poem celebrating a species from which we could learn some moral as well as zoological lessons. Chicago Tribune. Elephant Memories Cynthia Moss, 2012-08-06 A style so conversational that I felt like a privileged visitor riding beside her in her rickety Land Rover as she showed me around the park. The New York Times Book Review. Cynthia Moss spent many years living in Kenya's Amboseli National Park and studying the elephants there and her long term research has revealed much of what we now know about these complex and intelligent animals. In this book she shares a more up close and personal perspective chronicling the lives of the elephant families led by matriarchs Teresia, Slit Ear, Torn Ear, Tania and Tuskless including a rare look at calves and their development. This edition is also updated with a new afterword catching up on the families covering current conservation issues and celebrating a species from which we could learn some moral as well as zoological lessons. Chicago Tribune. One is soon swept away by this Babar for adults. By the end one even begins to feel an aversion for people. One wants to curse human civilization and cry out: Now God stand up for the elephants. The New York Times. Moss speaks to the general reader with charm as well as scientific authority. An elegantly written and ingeniously structured account. The Wall Street Journal. Any reader interested in animals will be captivated. Publishers Weekly. The Sounds of Life Karen Bakker, 2024-03-12 When we think of animal sounds we tend to think about birds or other highly sonic animals. However, scientists are learning that a much wider range of animals and even plants use sound and they are figuring this out with the help of AI and other digital technologies. This book tells the stories of scientists who are using these digital technologies to decode the hidden world of nonhuman sound. The author shows how digital technology so often associated with our alienation from nature is offering an opportunity to listen to plants and animals in powerful ways changing our understanding of nonhuman communication and reviving our connection to the natural world. This book is a story of discovery. Early chapters describe early 20th century discoveries about whale noise while subsequent chapters describe how digital technologies have revealed the surprising sonic worlds of elephants.

turtles corals and plants Through these stories we learn that many more plants and animals can make and sense sound and that these sounds are linked to complex communication and social behavior But as we learn this science is not merely about listening to nature in new ways it also creates new possibilities for both conservation and interspecies communication In the book s later chapters the author describes fascinating breakthroughs aided by robotics and AI that may enable people to communicate with other species She ends the book by exploring how conservationists are using bioacoustics to protect endangered species address the threat of noise pollution and create innovative responses to biodiversity loss and climate change Throughout the book the author describes the research of a diverse range of scientists with a particular emphasis on female and indigenous scientists And while she ultimately champions the potential of digital technology she is not naive to its limitations and is careful throughout to highlight the limits of technology Ultimately we see that bioacoustics aided by digital tech offers humanity a powerful window into the nonhuman world *Literature for Science and Mathematics* DIANE

Kemmerer,2015-05-01 Contemporary Earth and animal activists rarely collaborate perhaps because environmentalists focus on species and ecosystems while animal advocates look to the individual and neither seems to have much respect for the other This diverse collection of essays highlights common ground between earth and animal advocates most notably the protection of wildlife and personal dietary choice If earth and animal advocates move beyond philosophical differences and resultant divergent priorities turning attention to shared goals both will be more effective and both animals and the environment will benefit Given the undeniable seriousness of the environmental problems that we face including climate change and species extinction it is essential that activists join forces Drawing on a wide range of issues and disciplines ranging from wildlife management hunting and the work of NGOs to ethics ecofeminism religion and animal welfare this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals

Handbook of Mammalian Vocalization Stefan M Brudzynski,2009-12-08 Handbook of Mammalian Vocalization is designed as a broad and comprehensive but well balanced book written from the neuroscience point of view in the broad

sense of this term This well illustrated Handbook pays particular attention to systematically organized details but also to the explanatory style of the text and internal cohesiveness of the content so the successive chapters gradually develop a consistent story without losing the inherent complexity Studies from many species are included however rodents dominate as most of the brain investigations were done on these species The leading idea of the Handbook is that vocalizations evolved as highly adaptive specific signals which are selectively picked up by the brain The brain serves as a receptor and behavioural amplifier Brain systems will be described which allow vocal signals rapidly changing the entire state of the organism and trigger vital biological responses usually also with accompanying emission of vocalizations Integrative brain functions leading to vocal outcome will be described along with the vocalization generators and motor output to larynx and other supportive motor subsystems The last sections of the Handbook explains bioacoustic structure of vocalizations present understanding of information coding and origins of the complex semiotic semantic content of vocalizations in social mammals The Handbook is a major source of information for professionals from many fields with a neuroscience approach as a common denominator The handbook provides consistent and unified understanding of all major aspects of vocalization in a monographic manner and at the same time gives an encyclopaedic overview of major topics associated with vocalization from molecular cellular level to behavior and cognitive processing It is written in a strictly scientific way but clear enough to serve not only for specialized researchers in different fields of neuroscience but also for academic teachers of neuroscience including behavioural neuroscience affective neuroscience clinical neuroscience neuroethology biopsychology neurolinguistics speech pathology and other related fields and also for research fellows graduate and other advanced students who widely need such a source publication The first comprehensive handbook on what we know about vocalization in Mammals Carefully edited the handbook provides an integrated overview of the area International list of highly regarded contributors including Jaak Pankseep Washington State University David McFarland Oxford John D Newman NIH Unit on Developmental Neuroethology Gerd Poeggel Leipzig Shiba Keisuke Chiba City Japan and others tightly edited by a single well regarded editor who has edited a special issue in Behavioral Brain Research on the topic before

The Emperor's Embrace Jeffrey Masson, 2001-02-28 Jeffrey Moussaieff Masson's marvelous Jane Goodall New York Times bestseller When Elephants Weep made us re evaluate the emotional lives of animals And in his follow up New York Times bestseller Dogs Never Lie About Love Masson reflected with intelligence and originality Los Angeles Times Sunday Book Review on the emotional world of dogs Now in The Emperor's Embrace Masson offers a remarkable look at one of the most fulfilling roles in the animal world fatherhood With fascinating insight impeccable research and captivating writing controversial psychoanalyst Jeffrey Masson a new father himself introduces us to the world's best dads He takes us to such places as Antarctica as he explores how emperor penguin fathers incubate the eggs of their young by carrying them around on their feet for two months nestled beneath a special brood pouch And he tells us how once the babies hatch the fathers snuggle the babies on their feet until

the mother returns from her time at sea feeding them a special milk like substance until her arrival Masson a superb storyteller showcases the extraordinary behavior of outstanding fathers heroes among animals including the wolf and why wolves make good fathers and dogs don't the beaver who encourages his young to cling to his tail as he navigates through ponds the sea horse the only male animal that gives birth to its young the marmoset the South American monkey who carries his babies for the first two years of their lives wherever he goes Masson also examines nature's worst fathers lions langurs bears and humans He shows that when a father does care for his young as with the beaver we immediately look for a biological and not an emotional explanation But Masson demonstrates that for these animals as with humans fatherhood is a profound all encompassing experience Groundbreaking compelling inspirational Masson's unique look at one of nature's most venerable institutions takes us to animal habitats around the world yet always returns to the heart For animal lovers fathers mothers sons and daughters everywhere The Emperor's Embrace is a book that will forever change our perceptions of parenthood and family love *The Oxford Handbook of Animal Ethics* Tom L. Beauchamp, R.G. Frey, 2011-11-17 This text is designed to capture the nature of the questions as they stand today and to propose solutions to many of the major problems in the ethics of how we use animals **Elephant Trails** Nigel Rothfels, 2021-11-30 Why have elephants and our preconceptions about them been central to so much of human thought From prehistoric cave drawings in Europe and ancient rock art in Africa and India to burning pyres of confiscated tusks our thoughts about elephants tell a story of human history In *Elephant Trails* Nigel Rothfels argues that over millennia we have made elephants into both monsters and miracles as ways to understand them but also as ways to understand ourselves Drawing on a broad range of sources including municipal documents zoo records museum collections and encounters with people who have lived with elephants Rothfels seeks out the origins of our contemporary ideas about an animal that has been central to so much of human thought He explains how notions that have been associated with elephants for centuries that they are exceptionally wise deeply emotional and have a special understanding of death that they never forget are beloved of the gods and suffer unusually in captivity and even that they are afraid of mice all tell part of the story of these amazing beings Exploring the history of a skull in a museum a photograph of an elephant walking through the American South in the early twentieth century the debate about the quality of life of a famous elephant in a zoo and the accounts of elephant hunters Rothfels demonstrates that elephants are not what we think they are and they never have been *Elephant Trails* is a compelling portrait of what the author terms our elephant

Heavens on Earth Michael Shermer, 2018-01-09 A scientific exploration into humanity's obsession with the afterlife and quest for immortality from the bestselling author and skeptic Michael Shermer In his most ambitious work yet Shermer sets out to discover what drives humans' belief in life after death focusing on recent scientific attempts to achieve immortality along with utopian attempts to create heaven on earth For millennia religions have concocted numerous manifestations of heaven and the afterlife and though no one has ever returned from such a place to report what it is really like or that it even

exists today science and technology are being used to try to make it happen in our lifetime From radical life extension to cryonic suspension to mind uploading Shermer considers how realistic these attempts are from a proper skeptical perspective Heavens on Earth concludes with an uplifting paean to purpose and progress and how we can live well in the here and now whether or not there is a hereafter **American Scientist** ,1942 Aging is a Group-Selected Adaptation Joshua Mitteldorf,2017-02-03 Although books exist on the evolution of aging this is the first book written from the perspective of aging as an adaptive program It offers an insight into the implications of research on aging genetics The author proposes the Demographic Theory of Senescence whereby aging has been affirmatively selected because it levels the death rate over time helping stabilize population dynamics and prevent extinctions Extraterrestrial Altruism Douglas A. Vakoch,2013-09-14 Extraterrestrial Altruism examines a basic assumption of the Search for Extraterrestrial Intelligence SETI that extraterrestrials will be transmitting messages to us for our benefit This question of whether extraterrestrials will be altruistic has become increasingly important in recent years as SETI scientists have begun contemplating transmissions from Earth to make contact Technological civilizations that transmit signals for the benefit of others but with no immediate gain for themselves certainly seem to be altruistic But does this make biological sense Should we expect altruism to evolve throughout the cosmos or is this only wishful thinking Is it dangerous to send messages to other worlds as Stephen Hawking has suggested or might humankind benefit from an exchange with intelligence elsewhere in the galaxy Would extraterrestrial societies be based on different ethical principles or would we see commonalities with Earthly notions of morality Extraterrestrial Altruism explores these and related questions about the motivations of civilizations beyond Earth providing new insights that are critical for SETI Chapters are authored by leading scholars from diverse disciplines anthropology astronomy biology chemistry computer science cosmology engineering history of science law philosophy psychology public policy and sociology The book is carefully edited by Douglas Vakoch Director of Interstellar Message Composition at the SETI Institute and professor of clinical psychology at the California Institute of Integral Studies The Foreword is by Frank Drake This interdisciplinary book will benefit everybody trying to understand whether evolution and ethics are unique to Earth or whether they are built into the fabric of the universe **Animals and Nature** Rod Preece,2011-11-01 No one tradition alone offers a sufficient respect for other species Taken together they may offer a prospect for saner human animal relations From the book Western conceptions of objectivity and individuality have resulted in a readier appreciation of the worth of the animals and nature than has been recognized This provocative book takes issue with the popular view that the Western cultural tradition in contrast to Eastern and Aboriginal traditions has encouraged attitudes of domination and exploitation towards nature particularly animals Preece argues that the Western tradition has much to commend it and that descriptions of Aboriginal and Oriental orientations have often been misleadingly rosy simplified and codified according to current fashionable concepts Animals and Nature is the result of six years intensive study into comparative religion literature

The Kalahari Environment David Thomas, Paul A.

Shaw, 1991-02-21 This book provides an integrated thorough and up to date review of the nature and development of the Kalahari environment an environment of great ecological and geomorphological diversity Its complex climatic and geological history and its long association with human societies attempting to utilise its natural resources are aspects of increasing scientific interest The book has evolved from the authors own research in the Kalahari and attempts to provide explanations and answers to some of the many questions raised about this region ranging from the commonly asked is it really a desert to more specific and detailed concerns The interdisciplinary approach will make the book of interest to researchers lecturers and advanced students in earth sciences environmental studies tropical geomorphology and Quaternary science The extensive bibliography will also make the book a very important source of reference

Being with the Dead Hans

Ruin, 2019-01-29 Philosophy Socrates declared is the art of dying This book underscores that it is also the art of learning to live and share the earth with those who have come before us Burial with its surrounding rituals is the most ancient documented cultural symbolic practice all humans have developed techniques of caring for and communicating with the dead The premise of *Being with the Dead* is that we can explore our lives with the dead as a cross cultural existential a priori out of which the basic forms of historical consciousness emerge Care for the dead is not just about the symbolic handling of mortal remains it also points to a necropolitics the social bond between the dead and living that holds societies together a shared space or polis where the dead are maintained among the living Moving from mortuary rituals to literary representations from the problem of ancestry to technologies of survival and intergenerational communication Hans Ruin explores the epistemological ethical and ontological dimensions of what it means to be with the dead His phenomenological approach to key sources in a range of fields gives us a new perspective on the human sciences as a whole

Dolphin

Diaries Denise L. Herzing, 2011-07-05 Dr Denise Herzing began her research with a pod of spotted dolphins in the 1980s Now almost three decades later she has forged strong ties with many of these individuals has witnessed and recorded them feeding playing fighting mating giving birth and communicating *Dolphin Diaries* is an account of Herzing's research and her surprising findings on wild dolphin behavior interaction and communication Readers will be drawn into the highs and lows the births and deaths the discovery of unique and personalized behaviors the threats dolphins face from environmental changes and the many funny and wonderful encounters Denise painstakingly documented over many years This is the perfect book for anyone who loves these incredibly versatile and intelligent creatures and wants to find out more than the dolphin show at the zoo can offer Herzing is a true pioneer in her field and deserves a place in the pantheon of naturalists and scientists next to Dian Fossey and Jane Goodall

Anatomy of Love: A Natural History of Mating, Marriage, and Why We Stray (Completely Revised and Updated with a New Introduction) Helen Fisher, 2016-02-01 A contemporary classic about love now completely revised and updated From love at first sight and infidelity to hook up culture and slow love Dr

Helen Fisher the biological anthropologist and renowned expert on the science of love Scientific American explains it all in this thoroughly revised classic on the evolution and future of human sex romance and partnership Examining marriage and divorce in 58 societies and adultery in 42 cultures she argues that we are returning to patterns of business sex and love that echo our ancient past and she is optimistic about our future Kissing Cousins Frances Bartkowski, 2008-09-18 Since DNA has replaced blood as the medium through which we establish kinship how do we determine with whom we are kin Who counts among those we care for The distinction between these categories is constantly in flux How do we come to decide those we may kiss and those we may kill Focusing on narratives of kinship as they are defined in contemporary film literature and news media Frances Bartkowski discusses the impact of stories of origin on our regard for nonhuman species She locates the role of totems and taboos in forming and re forming kinship categories groupings that enable us to tie the personal to the social and explores the bestiary among the oldest of literary forms The bestiary is the realm in which we allegorize the place of humans and other species a menagerie encompassing animals we know as well as human animal chimeras and other beings that challenge the natural order of the world Yet advances in reproductive technologies the mapping of genomes and the study of primates continually destabilize these categories and recast the dynamic between the natural and the cultural Bartkowski highlights the arbitrariness of traditional kinship arrangements and asks us to rethink our notions of empathy and ethics She shows how current dialogues concerning ethics and desire determine contemporary attitudes toward issues of care and suggests a new framework for negotiating connection and conflict
