1918-20 Angus Konstam,2022-04-28 A fascinating look at the British naval intervention in the Baltic in 1918 20 and at the British Soviet and Baltic nationalist fleets that fought Following the Russian Revolution of October 1917 the Baltic states became a battleground between Russian Reds and Whites German troops and emerging Baltic independence forces In November 1918 the British government decided to intervene to protect British interests and to support the emerging Baltic states This initial small force of cruisers and destroyers was eventually augmented by other British warships including aircraft carriers a monitor as well as a handful of submarines and torpedo boats Opposing them was the far more powerful Russian Baltic Fleet now controlled by the Bolsheviks The campaign that followed involved naval clashes between the two sides the most spectacular of which was an attack on the Soviet naval base of Kronstadt in June 1919 by a force of small British torpedo boats They torpedoed and sunk the Russian cruiser Oleg an action which effectively bottled the Baltic fleet up in port for the remainder of the campaign Finally in early 1920 the British squadron was withdrawn following Soviet recognition of Estonia Latvia and Lithuania This New Vanguard title explores the naval side of this little known but strategically crucial campaign fought by the war weary navies of Britain and Russia and by warships of the emerging Baltic states Describing the political background to the conflict and the key points of the naval campaign as well as the warships involved this is a concise and fascinating account of an overlooked naval campaign that helped reshape the map of Europe

Innovating Victory Vincent O'Hara,Leonard R Heinz,2022-04-15 Innovating Victory Naval Technology in Three Wars studies how the world's navies incorporated new technologies into their ships their practices and their doctrine It does this by examining six core technologies fundamental to twentieth century naval warfare including new platforms submarines and

aircraft new weapons torpedoes and mines and new tools radar and radio Each chapter considers the state of a subject technology when it was first used in war and what navies expected of it It then looks at the way navies discovered and developed the technology s best use in many cases overcoming disappointed expectations It considers how a new technology threatened its opponents not to mention its users and how those threats were managed Innovating Victory shows that the use of technology is more than introducing and mastering a new weapon or system Differences in national resources force mixtures priorities perceptions and missions forced nations to approach the problems presented by new technologies in different ways Navies that specialized in specific technologies often held advantages over enemies in some areas but found themselves disadvantaged in others Vincent P O Hara and Leonard R Heinz present new perspectives and explore the process of technological introduction and innovation in a way that is relevant to today s navies which face challenges and questions even greater than those of 1904 1914 and 1939
