

FILM TERMINOLOGY

SHOTS AND FRAMING

- **Shot:** a single piece of film uninterrupted by cuts.
- **Establishing Shot:** often a long shot or a series of shots that sets the scene. It is used to establish setting and to show transitions between locations.
- **Long Shot:** a shot from some distance. If filming a person, the full body is shown. It may show the isolation or vulnerability of the character (also called a Full Shot).
- **Medium Shot:** the most common shot. The camera seems to be a medium distance from the object being filmed. A medium shot shows the person from the waist up. The effect is to ground the story.
- **Close Up:** the image being shot takes up at least 80 percent of the frame.
- **Extreme Close Up:** the image being shot is a part of a whole, such as an eye or a hand.
- **Two Shot:** a scene between two people shot exclusively from an angle that includes both characters more or less equally. It is used in love scenes where interaction between the two characters is important.

CAMERA ANGLES

- **Eye Level:** a shot taken from a normal height; that is, the character's eye level. Ninety to ninety-five percent of the shots seen are eye level, because it is the most natural angle.
- **High Angle:** the camera is above the subject. This usually has the effect of making the subject look smaller than normal, giving him or her the appearance of being weak, powerless, and trapped.
- **Low Angle:** the camera films subject from below. This usually has the effect of making the subject look larger than normal, and therefore strong, powerful, and threatening.

CAMERA MOVEMENTS

- **Pan:** a stationary camera moves from side to side on a horizontal axis.
- **Tilt:** a stationary camera moves up or down along a vertical axis.
- **Zoom:** a stationary camera where the lens moves to make an object seem to move closer to or further away from the camera. With this technique, moving into a character is often a personal or revealing movement, while moving away distances or separates the audience from the character.
- **Dolly/Tracking:** the camera is on a track that allows it to move with the action. The term also refers to any camera mounted on a car, truck, or helicopter.
- **Boom/Crane:** the camera is on a crane over the action. This is used to create overhead shots.

LIGHTING

- **High Key:** the scene is flooded with light, creating a bright and open-looking scene.
- **Low Key:** the scene is flooded with shadows and darkness, creating suspense or suspicion.
- **Bottom or Side Lighting:** direct lighting from below/the side, which often makes the subject appear dangerous/ evil.
