Time and Decision George Loewenstein, Daniel Read, Roy F. Baumeister, 2003-02-27 How do people decide whether to sacrifice now for a future reward or to enjoy themselves in the present Do the future gains of putting money in a pension fund outweigh going to Hawaii for New Year s Eve Why does a person s self discipline one day often give way to impulsive behavior the next Time and Decision

takes up these questions with a comprehensive collection of new research on intertemporal choice examining how people face the problem of deciding over time Economists approach intertemporal choice by means of a model in which people discount the value of future events at a constant rate A vacation two years from now is worth less to most people than a vacation next week Psychologists on the other hand have focused on the cognitive and emotional underpinnings of intertemporal choice Time and Decision draws from both disciplinary approaches to provide a comprehensive picture of the various layers of choice involved Shane Frederick George Loewenstein and Ted O Donoghue introduce the volume with an overview of the research on time discounting and focus on how people actually discount the future compared to the standard economic model Alex Kacelnik discusses the crucial role that the ability to delay gratification must have played in evolution Walter Mischel and colleagues review classic research showing that four year olds who are able to delay gratification subsequently grow up to perform better in college than their counterparts who chose instant gratification The book also delves into the neurobiology of patience examining the brain structures involved in the ability to withstand an impulse Turning to the issue of self control Klaus Wertenbroch examines the relationship between consumption and available resources showing for example how a high credit limit can lead people to overspend Ted O Donoghue and Matthew Rabin show how people s awareness of their self control problems affects their decision making The final section of the book examines intertemporal choice with regard to health drug addiction dieting marketing savings and public policy All of us make important decisions every day many of which profoundly affect the quality of our lives Time and Decision provides a fascinating look at the complex factors involved in how and why we make our choices so many of them short sighted and helps us understand more precisely this crucial human frailty

Medical Ethics Emmanuel Adu Addai,2021-06-03 This

paper presents a review of the history of medical ethics and applies the concepts and principles of medical ethics and morality to the clinical health care setting It investigates the relationship between the moral ethical practices of the physician and the success of the doctor patient relationship and patient satisfaction The scientific methodology employed by the author includes both qualitative and quantitative analyses using the case study approach and a patient survey Among the research findings is a conclusion that although physicians may not always be able to adhere to every ethical practice in each situation it is imperative that they inculcate the values and virtues of a good doctor honesty objectivity respect and confidentiality in order to maintain the best possible doctor patient relationship
