

Final Year Project Proposal 1

Project Title:

Mechanical testing for high temperature polymers

Supervisor:

Assoc. Prof. Gan Chee Lip

Mentor:

Mr Eric Phua Jian Rong (JRPhua@ntu.edu.sg)

Description:

In offshore subsea drilling, different types of microelectronics devices and sensors are needed for logging while drilling (LWD). However, the high temperature, high pressure and even changes in electrochemistry in the operating environment, pose a challenge to the electronic packages' survivability. In this project, various modes of characterization are required to identify suitable high temperature polymeric gap fill materials in electronic packages. This project is focused mainly on testing.

Methodology:

High temperature polymeric materials will be used in this project for filling up electronic packages. Prior to that, selected polymers will be characterized to check their suitability for the environments which they would be placed in. Compatible polymers identified will be placed into actual packages, which will subsequently undergo mechanical reliability tests.

Equipment:

Bond shear testing, CSAM (IME)
Instron tester, Bend test (NTU)

Remarks:

Student will have the opportunity to carry out some work at the Institute of Microelectronics. Majority of work will still be carried out in NTU.

Maritime Safety Policy and International Law Henrik Ringbom, 2008-09-30 This book offers a comprehensive international law analysis of the European Union's maritime safety legislation. This is a relatively novel field of activity of the EU but its development has been very rapid. Since 1993 over 40 acts of EU law have been adopted dealing with a variety of subjects such as port State control, classification societies, vessel traffic management, ship construction, environmental protection and pollution sanctions. This legislation is analysed from the point of international law, notably the law of the sea and the international maritime conventions. Regional legislation in a field that is traditionally regulated primarily by means of international conventions is bound to create tensions with the related international conventions and with well established principles of international law. This study assesses how the EU has acted as a flag State, port State and coastal State and measures the trends in this development against the international legal framework. More detailed legal analyses are offered for specific aspects of EU legislation that are considered to be particularly interesting from an international law point of view. The relationship between EU law and international law within the internal EU legal system is also analysed from the specific perspective of maritime safety law.

The Foundations and Future of Financial Regulation Mads Andenas, Iris H-Y Chiu, 2013-11-20 Financial regulation has entered into a new era as many foundational economic theories and policies supporting the existing infrastructure have been and are being questioned following the financial crisis. Goodhart et al's seminal monograph *Financial Regulation: Why, How and Where Now?* (Routledge, 1998) took stock of the extent of financial innovation and the maturity of the financial services industry at that time and mapped out a new regulatory roadmap. This book offers a timely exploration of the *Why, How and Where Now* of financial regulation in the aftermath of the crisis in order to map out the future trajectory of financial regulation in an age where financial stability is being emphasised as a key regulatory objective. The book is split into four sections: the objectives and regulatory landscape of financial regulation; the regulatory regime for investor protection; the regulatory regime for financial institutional safety and soundness; and macro prudential regulation. The discussion ranges from theoretical and policy perspectives to comprehensive and critical consideration of financial regulation in the specifics. The focus of the book is on the substantive regulation of the UK

and the EU as critical examination is made of the unravelling and the future of financial regulation with comparative insights offered where relevant especially from the US Running throughout the book is consideration of the relationship between financial regulation financial stability and the responsibility of various actors in governance This book offers an important contribution to continuing reflections on the role of financial regulation market discipline and corporate responsibility in the financial sector and upon the roles of regulatory authorities markets and firms in ensuring the financial health and security of all in the future
