Romera, 2023-01-03 **Designing Web-Based Applications for 21st Century Writing Classrooms** George Pullman, Gu Baotong, 2016-12-05 Designing Web Based Applications for 21st Century Writing Classrooms brings together for the first time a group of scholars and teachers who have been developing on their own initiative web based solutions to technical and professional writing instructional problems In industry the perennial question is whether to buy or build but in academia for various reasons buy is rarely an option Individual faculty members do not have the money to pay for software solutions and often their interests are too local or small scale to warrant institutional level involvement In addition the design of commercial applications from vendors typically does not take into account the unique needs and considerations of teachers of writing and often reflects a design ideology quite different from theirs This is why so many writing teachers have turned to open source solutions and in the process of learning how to tweak them to make them more responsive to their specific needs why so many of these teachers have developed programming and design skills Beyond exigency the motivation for becoming proficient at interface and database design comes from the observation that the nature of writing is changing dramatically Text is no longer an object It has become a place of interaction consumers are becoming producers And the work of technical and professional communication indeed the work of writing teachers more generally is becoming increasingly involved in the design and implementation of places of interaction Words have become data texts are becoming communities *Handbook of Research on Effective Online Language Teaching in a Disruptive Environment* LeLoup, Jean W., Swanson, Pete, 2021-11-26 The COVID 19 pandemic radically and rapidly and perhaps forever changed the K 20 educational landscape In March 2020 K 12 schools and institutions of higher education were forced to pivot quickly to online and remote teaching This new paradigm resulted in

Developing Reflective TESOL Practitioners Through Teacher Education Andrzej Cirocki, Mark Wyatt, Xuesong (Andy) Gao, 2024-06-26 This textbook provides insights from Asian contexts into how reflective practice is nurtured on Teaching English to Speakers of Other Languages TESOL and English Language Teaching ELT teacher education programmes There is increasing recognition worldwide that given the centrality of reflective practice to teachers ongoing professional development supporting teachers to become reflective practitioners should be integral to teacher education programmes Consequently tertiary level courses in areas such as TESOL and ELT tend to promote reflective practice supported by theoretical input from the burgeoning literature on reflection much of which is produced in the West Relatively under represented in the literature are global perspectives on reflective practice there are consequently relatively few accounts as to how reflective practice is embedded in teacher education programmes in different parts of the world including Asia Hence this book addresses a gap Contributing authors from fourteen countries provide insights into the ways in which teachers are helped to grow as reflective practitioners on their teacher education programmes in their unique contexts This textbook showcases how reflective teaching practices are developed supported by frameworks for critical reflection and in interaction with local educational policies These distinctive accounts aid readers in reflecting on the ways in which reflective practice is supported in their own teacher education contexts and in considering ways of enhancing the reflective dimension of their programmes This textbook showcases innovative reflective activities and can be used as a principal text or as supplemental reading on a range of TESOL and ELT teacher education courses
