Final Solutions Mass Killing And Genocide In The 20th Century:

Final Solutions Benjamin A. Valentino, 2013-01-14 Benjamin A Valentino finds that ethnic hatreds or discrimination undemocratic systems of government and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed He shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society Mass killing in his view is a brutal political or military strategy designed to accomplish leaders most important objectives counter threats to their power and solve their most difficult problems In order to capture the full scope of mass killing during the twentieth century Valentino does not limit his analysis to violence directed against ethnic groups or to the attempt to destroy victim groups as such as do most previous studies of genocide Rather he defines mass killing broadly as the intentional killing of a massive number of noncombatants using the criteria of 50 000 or more deaths within five years as a quantitative standard Final Solutions focuses on three types of mass killing communist mass killings like the ones carried out in the Soviet Union China and Cambodia ethnic genocides as in Armenia Nazi Germany and Rwanda and counter guerrilla campaigns including the brutal civil war in Guatemala and the Soviet occupation of Afghanistan Valentino closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing

Purify and Destroy Jacques Semelin, 2007-08-17 How can we comprehend the sociopolitical processes that give rise to extreme violence ethnic cleansing or genocide A major breakthrough in comparative analysis Purify and Destroy demonstrates that it is indeed possible to compare the Holocaust the Rwandan genocide and ethnic cleansing in Bosnia Herzegovina while respecting the specificities of each appalling phenomenon Jacques Semelin achieves this in part by leading his readers through the three examples simultaneously the unraveling of which sometimes converges but most often diverges Semelin s method is multidisciplinary relying not only on contemporary history but also on social psychology and political science Based on the seminal distinction between massacre and genocide Purify and Destroy identifies the main steps of a general process of destruction both rational and irrational born of what Semelin terms delusional rationality He describes a dynamic structural model with at its core the matrix of a social imaginaire that responding to fears resentments and utopias carves and recarves the social body by eliminating the enemy Semelin identifies the main stages that can lead to a genocidal process and explains how ordinary people can become perpetrators He develops an intellectual framework to analyze the entire spectrum of mass violence including terrorism in the twentieth century and before Strongly critical of today s political instrumentalization of the genocide notion Semelin urges genocide research to stand back from legal and normative definitions and come of age as a discipline in its own right in the social sciences

Constructing Genocide and Mass Violence Maureen S. Hiebert, 2017-03-16 This book addresses two closely related questions what is the process by which the relatively short and violent genocides of the twentieth century and beyond have occurred Why have these

instances of mass violence been genocidal and not some other form of state violence repression or conflict Hiebert answers these questions by exploring the structures and processes that underpin the decision by political elites to commit genocide focusing on a sustained comparison of two cases the Nazi Final Solution and the Cambodian genocide The book clearly differentiates the structures and processes contained within a larger overall process that leads to genocidal violence Uncovering the mechanisms by which societies at least in the contemporary era come to experience genocide as a distinct form of destruction and not some other form of mass or political violence Hiebert is able to highlight a set of key process that lead to specifically genocidal violence Providing an insightful contribution to the burgeoning literature in this area this book will be of interest to students and scholars of genocide international relations and political violence

Beyond the Racial State Devin O. Pendas, Mark Roseman, Richard F. Wetzell, 2017-11-16 The racial state has become a familiar shorthand for the Third Reich encapsulating its raison d tre ambitions and the underlying logic of its genocidal violence The Nazi racial state s agenda is generally understood as a fundamental reshaping of society based on a new hierarchy of racial value However this volume argues that it is time to reappraise what race really meant under Nazism and to question and complicate its relationship to the Nazis agenda actions and appeal Based on a wealth of new research the contributors show that racial knowledge and racial discourse in Nazi Germany were far more contradictory and disparate than we have come to assume They shed new light on the ways that racial policy worked and was understood and consider race s function content and power in relation to society and nation and

above all in relation to the extraordinary violence unleashed by the Nazis The Killing of Cambodia: Geography, Genocide and the Unmaking of Space James A. Tyner, 2017-05-15 Between 1975 and 1978 the Khmer Rouge carried out genocide in Cambodia unparalleled in modern history Approximately 2 million died almost one quarter of the population Taking an explicitly geographical approach this book argues whether the Khmer Rouge s activities not only led to genocide but also terracide the erasure of space In the Cambodia of 1975 the landscape would reveal vestiges of an indigenous pre colonial Khmer society a French colonialism and American intervention The Khmer Rouge however were not content with retaining the past inscriptions of previous modes of production and spatial practices Instead they attempted to erase time and space to create their own utopian vision of a communal society The Khmer Rouge s erasing and reshaping of space was thus part of a consistent sacrifice of Cambodia and its people a brutal justification for the killing of a country and the birth of a new place Democratic Kampuchea While focusing on Cambodia the book provides a clearer geographic understanding to genocide in general and insights into the importance of spatial factors in geopolitical conflict **Istanbul** Nora Fisher, Nora Fisher-Onar, Susan C.
