Finance Core Business Program:

On the Role of Paradigms in Finance Kavous Ardalan, 2016-05-13 Social theory can usefully be conceived in terms of four key paradigms: functionalist, interpretive, radical humanist, and radical structuralist. The four paradigms are founded upon different assumptions about the nature of society and each generates distinctive theories, concepts, and analytical tools. Finance theory is based on the functionalist paradigm, and for the most part, finance theorists are unaware of the philosophical tradition to which they belong. By relating finance to the four paradigms, Ardalan's work offers a concise understanding of the multifaceted nature of finance. He recommends that theorists adopt a diversity of paradigms and discusses its benefits by application to the following phenomena: the development of academic finance, the mathematical language of academic finance, the mathematics of academic finance, money, corporate governance, markets, technology, and education.

Computational Finance and Its Applications II M. Costantino, C. A. Brebbia, 2006 Featuring papers from the Second International Conference on Computational Finance and its Applications, the text includes papers that encompass a wide range of topics such as risk management, derivatives pricing, credit risk, trading strategies, portfolio management, and asset allocation and market analysis. **The Harvard Business School Guide to Careers in Finance** Helen Lee, Ying Liu, Harvard University Finance Club, 2000 The Harvard Business School Guide to Careers in Finance 2001 is an indispensable resource for anyone considering a job search in finance or investment banking.
