Finance Et Societe Comparative Law On Financial Activities And Business Ethics:

Entrepreneurship, Finance, Governance and Ethics Robert Cressy, Douglas Cumming, Chris Mallin, 2012-11-07 This book covers topics that are at the intersection of business ethics and governance as they pertain to entrepreneurship and finance. It is the first focused work that links entrepreneurship and finance to governance and business ethics rather than explore them separately. The chapters highlight with empirical data the strong interplay between ethics in organizational efficiency and financial activity and the role of legal settings and governance in facilitating ethical standards. They discuss novel and timely topics particularly given the recent financial crisis and discussions on regulating ethical behaviour. This book will encourage future scholars to investigate the role of law and governance in mitigating corruption and facilitating integrity in entrepreneurship and finance.

Research Handbook on Law and Ethics in Banking and Finance Costanza A. Russo, Rosa M. Lastra, William Blair, 2019 The global financial crisis evidenced the corrosive effects of unethical behaviour upon the banking industry. The recurrence of misbehaviour in the financial sector including fraud and manipulations of market indices suggests the need to establish a banking culture that conforms to the highest standards of ethical and professional behaviour. This Research Handbook on Law and Ethics in Banking and Finance focuses on the role that law should play and the effectiveness of newly introduced regulations and supervisory actions as a driver for ethical conduct so as to reconnect the interests of bankers and financiers with the interests of society.

EU Banking and Capital Markets Regulation Filippo Annunziata, Michele Siri, 2025-01-10 The relationship between EU and national law has taken up new forms and dimensions in the context of EU financial legislation. The wide reforms introduced in the EU financial architecture over the past years raised new issues and opened new perspectives stimulating paramount discussions and debates that are far from being settled. Issues concerning the interplay between EU and national law relate to all the dimensions of EU financial legislation: the principles and solutions that are consolidating in this area are also likely to set the standard within other fields of EU policy and legislation. Considering for example legal sources the need to foster higher levels of harmonisation among the legislations of member states needs to be balanced against the complex mechanism of options and discretions as well as with the application of the principle of proportionality embedded in most of the fundamental texts of European financial legislation. Enforcement and institutional interplay are striking examples of the complexities of the new system. The application of traditional principles comes at grips with the continuous effort by EU institutions and by the European Supervisory Authorities (ESAs) to set the ground for a stronger backbone of common principles for the application of EU legislation. This volume explores these topics in a new multi-disciplinary perspective that cuts across all relevant areas of European financial markets law.
