Horngren, Karen Braun, 2007-02 The Demo Docs System of instruction replicates the classroom experience by providing more I get it moments outside of class We've talked to tons of POA instructors and our editors have even taken the accounting course numerous times to figure out the following issue in this course that is consistent Students understand or get it right after you do a problem in class but as soon as they leave class with each passing hour their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help or they just quit and get behind in the course On top of this you can end up getting behind in the course as well in order to keep everyone on track The Demo Docs system helps to recreate the I get it moments outside of class keeping both you and the students on track **Accounting Information for Business Decisions** Billie M. Suzanne Oliver, 2008-12-01 For Principle of Accounting Courses Students understand or get it right after you do a problem in class However as soon as they leave class their ability to do the problems and complete their homework

diminishes with each passing hour. Often times this results in students struggling to complete their homework on their own. Even worse, the frustration can lead to students quitting on the material altogether and falling behind in the course. As a result, an entire class can fall behind as instructors attempt to keep everyone on the same page. With the Financial and Managerial Accounting 2e Student Learning System, all features of the student textbook, study resources, and online homework system are designed to work together to provide students with more I Get It moments. The consistency, repetition, and strong details throughout the entire student learning system allow students to achieve success both inside and outside the classroom while keeping both instructors and students on track.
