**Financial Crises and Asia** Centre for Economic Policy Research (Great Britain), 1998 Asset price volatility on world financial markets and foreign exchange markets has increased significantly since the Mexican peso crisis of December 1994 The Asian financial crisis still underway will leave significant costs in its wake The notion that emerging markets can sort out their own problems if left to their own devices is no longer plausible and policymakers cannot afford to adopt a laissez faire attitude to this issue The traditional IMF response of containment is a debatable solution This report addresses these issues with emphasis on the important lessons that can be learned from the recent events in Asia **The Asian Financial Crisis** Klaus Veigel, 1999-05-18 Inhaltsangabe Abstract Macroeconomic stability and rapid export growth were the two key elements in starting the virtuous circles of high rates of accumulation efficient allocation and strong productive growth that formed the basis for East Asia's success World Bank 1993 Public perception of the Asian economies could hardly have shifted more since that time Currency depreciation rising corporate bankruptcy bank failures and sovereign bonds downgraded to junk bond status ended the euphoria in Asian emerging markets Almost overnight the reputation of the Newly Industrialized Countries NICs in East and South East Asia deteriorated from a model of efficient development to an example of worst crony capitalism Politicians rating agencies and investors were caught off guard by the development of the Asian financial crisis During the meeting of the Asia Pacific Economic Co operation forum APEC in November 1997 U S President Bill Clinton referred to the financial crisis in Asia as merely a few small glitches in the road Moody's and Standard and Poor's had upgraded the Philippines long term debt rating a few months earlier and downgraded the affected economies only when the crisis persisted for more than three months Comparing Thailand's situation to Mexico's economy prior to the peso crisis 1994 1995 the Morgan Stanley star analyst Barton Biggs wrote in January 1997 Thailand's problems are cyclical not secular Thailand is not Mexico in late 1994 On the numbers Thailand qualifies for the euro and is healthier than Germany The optimism seemed warranted by a history of high growth in the Asian countries Before the outbreak of the crisis Malaysia Indonesia Korea and Thailand had experienced uninterrupted growth of more than 5 percent of GDP per year for almost two decades The economic profession also experienced its Waterloo in Asia Economists not only failed to predict the crisis they also failed to recognize the vulnerability of the region Paul Krugman 1994 in his now famous article in Foreign Affairs was the only well known economist to doubt the sustainability of rapid growth in East and Southeast Asia Nevertheless even he did not predict this kind of collapse but rather a gradual economic slowdown of growth Despite the initial confusion among economists academic discussion about the Asian financial crisis quickly crystallized around two different explanations of the crisis One explanation **Comparative Development Experiences of Sub-Saharan Africa and East Asia** Ernest Aryeetey, 2017-11-01 Title first published in 2003 This comprehensive book focuses on the prevailing conditions in Asia and Africa under various macroeconomic and sectoral themes in order to provide in depth explanations for the divergent

**Twenty-First Century World Order and the Asia Pacific** J. Hsiung, 2001-08-10 After examining the global system's political volatility at the dawn of the new millennium the book looks at how some of the identifiable system wide trends e.g. globalization democratization fragmentation etc may find repercussions in the Asia Pacific The book also addresses the question of comprehensive security in comparison with other regions in a wide range of areas subsuming economic security geoeconomics environmental security ecopolitics and human security In addition the book recognizes the idiosyncrasies of the region such as the defensiveness of most Asian governments toward the protection of their financial markets against external forces following the regional financial crisis of the late 1990s

Capital Flows to Developing Countries and the Reform of the International Financial System Yilmaz Akyüz, Andrew J. Cornford, 1999 Recent financial crises whose effects have been particularly severe in developing countries have led to a wide ranging debate on international financial reform This debate has had to confront the implications of the huge growth of international capital movements one of whose consequences has been the increased privatization of external financing for developing countries The paper begins with surveys of major features of the post war evolution of the system of governance of the international financial system and of the principal trends in capital flows to

developing countries during the past three decades These set the stage for a selective review of appropriate policy responses to international financial instability with the main focus on proposals for remedying structural and institutional weaknesses in the global financial architecture through such means as greater transparency and improved disclosure strengthened financial regulation and supervision more comprehensive and even handed multilateral policy surveillance and bailing in the private sector by arrangements for orderly debt workouts In view of the continuing absence of effective measures at the global level for dealing with financial instability the paper puts special emphasis on the maintenance by developing countries of national autonomy regarding policy towards capital movements      *South Asia: Beyond The Global Financial Crisis* Amitendu Palit,2011-01-12 The book is an edited volume of different perspectives on the South Asian region and captures the political social and economic challenges facing the region following the financial crisis and the region s responses to these challenges      Newly Industrializing Countries After Asian Crisis Hans Wolfgang Singer,Neelambar Hatti,Rameshwar Tandon,2006      **Proceedings of the Second Inter-regional Debt Management Conference** United Nations Conference on Trade and Development,2001 This report presents the proceedings of the conference on debt management held by the UN Conference on Trade and Development UNCTAD in April 2000 The conference discussed recent trends in debt management policies and the likely impact of recent international financial developments for individual national debt offices The papers contained in the report consider a range of issues relating to debt management in the current economic environment risk management strategies and the role of computerised financial management systems in debt management      *Proceedings of the ... Inter-Regional Debt Management Conference* ,2001      *The Asian Financial Crisis and the Architecture of Global Finance* Gregory W. Noble,John Ravenhill,2000-09-11 An examination of the political and economic causes and consequences of the Asian financial crises      *Journal of Economic Literature* ,2001      **Regional Trading Arrangements** ,2003      Working Paper Series ,1999      Political Economy of International Monetary Interdependence Rameshwar Tandon,2007
