## **Financial Crisis In Asia Foreign Direc:**

**The Financial Crisis in Asia and Foreign Direct Investment** United Nations Conference on Trade and Development, 1998      The Asian Financial Crisis: New International Financial Architecture Shalendra Sharma, 2003-10-03

The Asian financial crisis of 1997-98 shook the foundations of the global economy. What began as a localized currency crisis soon engulfed the entire Asian region. What went wrong and how did the Asian economies long considered miracles respond? How did the United States, Japan and other G-7 countries react to the crisis? What role did the IMF play? Why did China remain conspicuously insulated from the turmoil raging in its midst? What lessons can be learnt from the crisis by other emerging economies? This book provides answers to all the above questions and more. It gives a comprehensive account of how the international economic order operates, examines its strengths and weaknesses and what needs to be done to fix it. The book will be vital to students of economics, international political economy, Asian and development studies.      **Asian Foreign Direct Investment in Europe** Prana Krishna Biswas, Robert Dytas, 2021-07-14

This book analyses the most recent trends in Foreign Direct Investment from the major Asian economies to the EU, focusing on China and Japan's FDI in the EU and Poland in particular. The authors assert that from a European perspective there is a strong need for further Asian FDI into EU nations which will establish mutual benefits. This is the first book to explore the outflow of FDI from Asian nations to other countries, especially to EU member states, whereas the extant literature focuses on the inflow of FDI to Asian nations. The authors analyse a multidimensional range of issues covering macroeconomics, finance, technology and examine the governments, local authorities and institutions that support such investments. FDI has an instrumental role in the development of host countries. Large scale capital flow becomes a vehicle for providing foreign technology, knowledge, skills and other inputs for the integration with international marketing, production and distribution networks and for improving the economic competitiveness of firms and economic performance of the host country. The analysis in the book is presented using statistical and econometrical approaches, emphasising a profound level of investigation which will be particularly useful for graduate and PhD students of International Economics, Business and Trade.      *Foreign Direct Investments in Asia* Chalongphob Sussangkarn, Yung Chul Park, Sung Jin Kang, 2011-02-25

This book covers nine countries of ASEAN and the East Asian area, including major Asian countries, and compares their respective policies to attract Foreign Direct Investments (FDI). Through comparative study of FDI promotion policies, this book will give policy makers in the area of FDI promotion an overview and comparison of the FDI policies of other countries. In addition, researchers at graduate, post graduate or professional level will gain from the econometric methodology and detailed definitions of various spillover effects: horizontal and vertical, which will be beneficial to their research. In addition to FDI policy comparison, this book focuses on the various spillover effects of FDI. It separates it into categories: own productivity effects, intra industry spillover effects and inter industry spillover effects, forward and backward linkage effects. While most other studies have only taken econometric tests

on own productivity and intra industry spillovers a key advantage to this book is that it also covers the separate effects of inter industry linkages Through policy comparison and econometric tests on various spillover effects on economic growth employment and exports this book will give policy makers and researchers an innovative and constructive guide to FDI
