the anatomy of the Republic of Korea's financial reform policy since 1979 in order to place the nation's financial reform plan of 1993 in a proper context. Financial deregulation in the Republic of Korea initiated in 1979 coincided with similar programs in South America and East Asia. The reforms were successful in spite of a mild form of financial repression and a deregulation policy that ran an erratic course. The republic moved decisively in 1993 toward a conventional type of financial liberalization by announcing a blueprint of reforms to be implemented over a five year period ending in 1997. This paper examines the anatomy of the Korean financial reform policy since 1979 in order to place its financial reform plan of 1993 in the proper context. The report presents a conceptual framework of the Korean financial system and policies, examines interest rate reforms on various levels and discusses changes in the credit allocation system that were undertaken in earlier phases of the reforms. The book goes on to review the rationale of the final financial reform phase, the sequencing of its various elements and the assessment. Broad conclusions are presented.
