A New Financial Market Structure for East Asia Yǒng-ch'ŏl Pak, Yunjong Wang, Takatoshi Itō, 2005. This book contends that the East Asian financial constitution lacks an appropriate infrastructure resulting in inefficient allocation of high savings and an over-inflated short-term debt market. It goes on to point out that despite high savings, East Asia's dependency on financial centers outside the region is also relatively high and that there is no strong region-wide network to connect various financial centers in East Asia. Against this economic background, the contributors make recommendations for the establishment of effective and stable capital recycling in East Asia. The financial intermediary function of the regional financial centers Hong Kong, Singapore and Tokyo is evaluated. Discussion focusses on the issues of building an organic network between the financial markets of major economies in the region and enhancing the future role and function of those regional financial centres. The policy implications of the future development of regional financial markets based on regional financial networks that could potentially act as intermediaries between the high savings and productive sectors in East Asia are also examined. Concentrating on the major issues identified as central to building a new financial market structure in East Asia, this book will be of appeal to those with a special interest in Asian studies and financial economics.

Press ECR Prize in Legal Scholarship Why Australia Prospered Ian W. McLean, 2016-05-24 This book is the first comprehensive account of how Australia attained the world's highest living standards within a few decades of European settlement and how the nation has sustained an enviable level of income to the present. *Why Australia Prospered* is a fascinating historical examination of how Australia cultivated and sustained economic growth and success. Beginning with the Aboriginal economy at the end of the eighteenth century, Ian McLean argues that Australia's remarkable prosperity across nearly two centuries was reached and maintained by several shifting factors. These included imperial policies favorable to demographic characteristics, natural resource abundance, institutional adaptability, and innovation, and growth-enhancing policy responses to major economic shocks such as war, depression, and resource discoveries. Natural resource abundance in Australia played a prominent role in some periods and faded during others, but overall, and contrary to the conventional view of economists, it was a blessing rather than a curse. McLean shows that Australia's location was not a hindrance when the international economy was centered in the North Atlantic and became a positive influence following Asia's modernization. Participation in the world trading system when it flourished brought significant benefits, and during the interwar period when it did not, Australia's protection of domestic manufacturing did not significantly stall growth. McLean also considers how the country's notorious origins as a convict settlement positively influenced early productivity levels and how British imperial policies enhanced prosperity during the colonial period. He looks at Australia's recent resource-based prosperity in historical perspective and reveals striking elements of continuity that have underpinned the evolution of the country's economy since the nineteenth century.

Reshaping Australia's Economy John Nieuwenhuysen, Peter Lloyd, Margaret Mead, 2001-12-12 This book draws together analysts to contribute to a major assessment and audit of the Australian economy. *The Oil & Gas Year Australia 2009*, **Financialization, New Investment Funds, and Labour** Howard Gospel, Andrew Pendleton, Sigurt Vitols, 2014-02-06 The book provides a comprehensive comparative treatment of the development of New Investment Funds (NIFs), private equity hedge funds, and sovereign wealth funds, and their impact upon labour and employment. Several countries are selected for in-depth treatment, with a chapter devoted to each: US, UK, Australia, Germany, Netherlands, Sweden, Italy, Poland, and Japan. The book examines variations in the level and type of fund activity between countries, considers influences upon these variations, and analyses differences in the impact of these funds on labour and employment. This analysis is located in a broader discussion of the nature and development of corporate financialization and comparative capitalism. Financialization has supported the development and growth of these funds, and many aspects of these funds exemplify the process of financialization. Each chapter reports the evidence on the impact of these funds on labour and employment. Case studies conducted by the authors supplement other evidence. Much of the evidence shows that private equity funds can have adverse effects on labour, such as reductions in employment, but there is also evidence of more positive effects in some cases, such as employment growth and adoption of high-commitment human resource practices. There is much

less evidence on the effects of activist HF's and SWFs with the impact on labour typically being indirect Between them the chapters show that variations in national regulation have a significant impact on both the development of fund activities and their effects With regard to labour effects employment and labour regulations do not seem to be of prime importance in explaining the level of fund activity but regulation supporting worker consultation and voice affects the capacity of labour representatives to influence the outcomes of fund activity on labour and employment
