The Regulation of Mobile Money Sunduzwayo Madise, 2019-03-26 The emergence of mobile money and other new forms of payment has changed the sovereign foundations of money Starting as a Department for International Development funded project in Kenya mobile money has now spread to many developing countries This book looks at the regulatory issues that mobile money poses and the potential risks to the financial system It undertakes a comparative study of mobile money regimes in Kenya Mala i Tanzania and South Africa Although the main study is on Mala i the lessons learnt are valuable to Sub Saharan Africa in understanding the regulatory issues surrounding mobile money The main argument that this book makes is that the traditional regulatory architecture of supervising the financial services is ill suited to supervise new forms of money like mobile money With no

requirement for a bank account mobile money is not subject to prudential regulation Mobile money is now considered a key developmental tool to achieve financial inclusion among the poor rural based unbanked and underbanked As opposed to traditional additive forms of financial inclusion mobile money is transformative In most jurisdictions where it has been launched mobile money has largely been regulated using light touch with regulation following innovation This work however proposes an approach based on the concept of really responsive regulation This approach is best suited to embrace mobile money as it passes from the pre financial inclusion to the post financial inclusion phases of its evolution This book will appeal to students and academics in the financial regulation field **Encyclopedia of the Developing World** Thomas M.

Leonard,2013-10-18 A RUSA 2007 Outstanding Reference Title The Encyclopedia of the Developing World is a comprehensive work on the historical and current status of developing countries Containing more than 750 entries the Encyclopedia encompasses primarily the years since 1945 and defines development broadly addressing not only economics but also civil society and social progress Entries cover the most important theories and measurements of development relate historical events movements and concepts to development both internationally and regionally where applicable examine the contributions of the most important persons and organizations and detail the progress made within geographic regions and by individual countries International Economic Policy for the Polycrisis Konrad Raczkowski,Piotr Komorowski,2024-09-17

The struggle for world leadership between China and the United States resulting in Russia s war with Ukraine among other things underscores the reality of structural changes in the global economy and the global system This book explains that a new era of egocentrism and polycrisis in a multipolar system has emerged in international economic policy with a strong drive toward interventionism and protectionism of national economies Dynamic economic imbalances are becoming a constant factor in disrupting international competitiveness and forcing changes in both monetary policy and general economic policy This prompts a new more pragmatic definition of fundamental concepts in the theoretical sphere as well as an up to date and viable cause and effect narrative that is not disconnected from decision making processes in the economic and political spheres This book provides a comprehensive diagnosis of the current global economy landscape and evaluates the processes affecting the economic and financial realities and the effectiveness of economic policies The recent dynamics have rendered much of the existing literature outdated or confined to individual economies economic systems and regions The book describes the evolution of international economic policy offering a comparative analysis of foreign trade theories especially in the context of macroeconomic trends and the impact of international trade in goods and services in the new balance of power of the global economy Targeted primarily at academics students and researchers in economics finance international relations and management it will also serve as a valuable resource for policymakers shaping and implementing contemporary state economic policies **Algorithmic Training, Future Markets, and Big Data for Finance**

Digitalization Raza, Hamad,Riaz, Ahsan,Riaz, Nimra,Ramakrishnan, Suresh,2025-01-08 Algorithmic training future markets

and big data are at the forefront of the digitalization revolution in finance driving innovation and reshaping the industry's landscape. The integration of algorithms in financial decision making enables faster accurate predictions and automated processes optimizing trading strategies and risk management. As financial markets evolve, future-oriented technologies including artificial intelligence and machine learning offer new areas for growth with algorithms refining their effectiveness in response to real-time data. Big data provides vast amounts of information that can be analyzed to identify trends, enhance customer experiences, and inform investment strategies. Together, these elements transform finance into a more agile, data-driven system, increasing digitalization and creating new opportunities for growth, efficiency, and innovation.

Algorithmic Training: Future Markets and Big Data for Finance Digitalization explores the most current and transformative trends in the world of digital finance, from digital currencies to blockchain, fintech, financial inclusion, and artificial intelligence. It offers a comprehensive analysis of how technology is revolutionizing financial services, products, and access for individuals and institutions alike. This book covers topics such as data science, financial technology, and machine learning and is a useful resource for business owners, computer engineers, entrepreneurs, economists, finance professionals, academicians, and researchers.

Perspecta 47 James Andrachuk, Christos C. Bolos, Avi Forman, Marcus A. Hooks, 2014-08-22 Investigating money's ambiguous position in architecture with reflections on topics that range from the aesthetics of austerity to the underwriting of large-scale art projects. Money plays a paradoxical role in the creation of architecture. Formless itself, money is a fundamental form-giver. At all scales and across the ages, architecture is a product of the financial environment in which it is conceived, for better or worse. Yet despite its ubiquity, money is often disregarded as a factor in conceptual design and is persistently avoided by architectural academia as a serious field of inquiry. It is time to break these habits. In the contemporary world in which economies are increasingly connected, architects must creatively harness the financial logics behind architecture in order to contribute meaningfully to the development of the built environment. This issue of *Perspecta*, the oldest and most distinguished student-edited architectural journal in America, examines the ways in which money intersects with architectural discourse, design practice, and urban form in order to encourage a productive relationship between money and the discipline. Contributions from a diverse group of scholars, practitioners, and artists create a dialogue about money's ambiguous position in architecture, reflecting on topics that range from the aesthetics of austerity to the underwriting of large-scale art projects to the economic implications of building information modeling.

Post-Referendum Sudan: National and Regional

Questions Wassara, Samson Samuel, Al-Abdin, Al-Tayib Zain, 2015-03-02 The fate of Sudan by then the largest country in Africa was clearly decided when results of the referendum vote were announced in February 2011 Policy makers scholars and the international community began to grapple with critical issues that might arise after the independence of South Sudan and how different stakeholders were likely to react during the period of uncertainty Political developments in Sudan were long term outcomes of post cold war revolutions in the world system after the Soviet Union collapsed A domino effect of such events swept across Eastern Europe with some manifestations in the Horn of Africa The fall of Mengistu Haile Mariam marked the beginning of the redrawing of the map of Africa and posed a challenge to the long held principle of preservation of colonial borders that had been enshrined in the Charter of the Organisation of African Unity The precedent set by the independence of Eritrea seemed to encourage southern Sudan to press forward for independence through a two pronged approach of armed struggle and diplomacy led by the Sudan People's Liberation Army Movement This book attempts to understand national regional and continental dimensions of the unresolved issues that could result in the escalation of conflict in the Sudan It examines internal dynamics of the Sudan after secession of the south and how these dynamics might affect neighbouring countries in the geopolitical regions the Horn of Africa the Great Lakes Region and Central Africa A section of the book is dedicated to dynamics within South Sudan as a new state Post conflict South Sudan as country was marked by extreme poverty lack of infrastructure and prevalence of inter communal armed violence This book proposes possible policies to prevent the country from descending into a state of economic and social chaos The book provides the argument that equitable and rational transformative socio economic programmes and policies could greatly reduce potentials for conflict This book calls on policy makers to pursue policies that could lead to concrete projects planned to alleviate poverty and provision of basic social services such as education health and safe water The book comes to the conclusion that political stability will depend on collective actions of stakeholders to ensure that peace prevails both in the north and the south to guarantee human security in the region
