Professionalism in journalism in the era of new media Jacek Sobczak, Jędrzej Skrzypczak, 2015-12-31 The term professionalization arouses controversies in academic discussion let alone the issue of professionalization of journalism Journalism considerably departs from the ideal model of professionalization There is no structured knowledge that directly

applies to journalists although we can talk about defined skills and the practical principles of the journalist's profession. Considering the process of the professionalization of journalism we can indicate three significant determinants namely professional autonomy, separate professional standards, self-regulation principles and serving the public interest. However, it is particularly important to ask about the condition of the journalist's profession nowadays. The ongoing technological revolution on the one hand and the political and legal transformations accompanied by market trends such as the tabloidization of the media, so-called infotainment first and foremost, and citizen journalism on the other, have all generated great doubts about the status of journalists. This calls for a redefinition of the professional position and role of journalists in modern societies. All these transformations may pose a serious threat to the model of traditional journalism and the social and professional position of journalists. The book introduced here consists of four parts presenting various aspects of professionalization of journalism. The first part treats of diverse topics concerning the essence of this issue as well as the legal status of journalist's profession. The second part features texts devoted to the issues of digital media. Part three deals with the disturbing phenomenon of hate speech. The main theme of the last part of the book concerns the issue of lobbying in the process of establishing intellectual property rights. The texts presented here have been written by scholars in the fields of law, media studies and political science on the one hand and practitioners, journalists from several countries of Europe on the other. The editors hope that the publication will contribute to the ongoing discussion concerning both the journalists and journalism status in the era of dynamic technological transformation.

Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.

Handbook of Election News Coverage Around the World Jesper Strömbäck,Lynda Lee Kaid,2009-09-10 The Handbook of Election Coverage Around the World focuses on the news coverage of national elections in democracies around the globe It

brings together and compares election news coverage within a single framework offering a systematic consideration of various factors. Considering the prominence and power of the press in the election process, this volume will offer unique breadth in its global consideration of the topic. The volume will appeal to scholars in political communication, political science, mass media and society, and others studying elections and media coverage around the world. *Chinese Communication Theory and Research* Wenshan Jia, Xing Lu, D. Ray Heisey, 2002-06-30. A systematic examination of Chinese communication scholarship and comprehensive critique of its theories and methodologies are long overdue, and in this new collection of essays by a multicultural group of scholars, both aims are achieved. Focusing on such relatively new fields as Chinese health communication and Chinese communication on the internet, the volume addresses key questions about the state and the future of its field. Both challenging and complementing the Western views of communication, it advances theories of cultural and intercultural communication while at the same time broadening our understanding of the relevance of Chinese communication studies to communication studies overall and the ways in which this subdiscipline points the way toward a new and more complicated future. The essayists, whose origins include the United States, Taiwan, Hong Kong, and China, bring their many perspectives to bear on what is the most comprehensive and inclusive review of Chinese communication research literature published in English. Of great benefit to Western and Eastern communication theorists, philosophers of social science, and Asian studies scholars, *Chinese Communication Theory and Research* is an invaluable guide to an increasingly complex and significant field of study.
