Benston* George J. Benston, 2010 George J Benston professor of Finance Accounting and Economics at Emory University s Goizueta Business School died unexpectedly in January 2008 He was an impassioned advocate for corporate integrity and a unique scholar his research interests were as broad as those of any recent academician His colleagues have selected and organized his most important papers into two volumes This second volume consists of his publications in the fields of accounting and finance The editor has selected a broad range of papers from each of the major areas that are representative of Benston s work in th **The Economic Dynamics of Law** David M. Driesen, 2012-06-18 This book offers a theory of law and economics focused on change over time and aimed at avoiding systemic risks Wall Street Polices Itself David P. McCaffrey, David W. Hart, 1998 Wall Street Polices Itself How Securities Firms Manage the Legal Hazards of Competitive Pressures explains how the self regulatory system for U S securities firms

works within three tiers of supervision. Overseeing the whole system is the U S Securities and Exchange Commission which directly supervises such self regulatory organizations as the New York Stock Exchange and the National Association of Securities Dealers. In turn these organizations oversee the broker dealer firms that conduct the daily business of buying and selling securities. The system relies heavily on the firms internal supervisory systems to prevent violations of securities laws since they are in the best position to track their own internal activities. Firms may be fined or subjected to much more stringent penalties if their supervisory systems fail. A widely shared perception is that this sort of securities self regulation does fail often and repeatedly. Public investigations press reports books like *Liar s Poker* and *Den of Thieves* and such films as *Wall Street* have hammered broker dealer firms relentlessly since the early 1980s. However the surprising truth is that we do not really know what transpires in the regulatory operations of firms like Merrill Lynch or Salomon Smith Barney because the well publicized failures tell only part of the story. David P McCaffrey and David W Hart provide readers with a fuller picture by offering an in depth examination of how this regulatory system works the types of regulatory problems that broker dealer firms encounter why some firms have more problems than others and what experiences with the system can suggest about how to improve self regulatory systems in general. Drawing extensively upon prior work on securities regulation in the areas of economics law and management this book will greatly interest professionals in the securities industry and those in business regulation generally and will also appeal to students of corporate strategy and culture of legal and social issues in management and of regulation. *Derivative Financial Instruments Relating to Banks and Financial Institutions* United States.
