become more customer centered **Records Classification: Concepts, Principles and Methods** Umi Asma' Mokhtar, Zawiyah Mohammad Yusof, 2017-05-19 Records Classification Concepts Principles and Methods Information Systems Context introduces classification an early part of the research lifecycle Classification ensures systematic organization of documents and facilitates information retrieval However classification systems are not prevalent in records management when compared to their use in other information fields This book views classification from the records management RM perspective by adopting a qualitative approach with case studies to gather data by means of interview and document content analysis Current development of information systems do not take into account the concept of classification from a RM perspective Such a model is required because the incorporation of information and communication technology ICT in managing records is inevitable The concept of classification from an RM perspective ought to be extended to the ICT team to enable the development of a RM system not limited to storage and retrieval functions but also with relation to disposal and preservation processes This proposed model introduces function based classification to ensure records are classified in context Gives a step by step functional model for constructing a classification system within an organization Advocates for the importance of practicing classification for records towards competent transparent and democratic organizations Helps organizations build their own classification system thus safeguarding information in a secure and systematic fashion Provides local case studies from Malaysia and puts together a generic globally applicable model **Using Functional Analysis in Archival Appraisal** Marcus C. Robyns, 2014-07-02 The identification of recorded information with continuing value that documents corporate and cultural memory is one of the archivist s primary tasks and he she accomplishes this mission in part through the process of appraisal But does traditional archival appraisal based on the concepts of primary and evidential values effectively serve the needs of institutional archivists and records managers In an age of scarcity and the challenge of electronic records can archivists and records managers continue to rely upon a methodology essentially unchanged since the early 1950s Using Functional Analysis in Archival Appraisal A Practical and Effective Alternative to Traditional Appraisal Methodologies shows how archivists in other countries are already using functional analysis which offers a better more effective and imminently more practical alternative to traditional appraisal methodologies that rely upon an analysis of the records themselves From this book information professionals will learn what functional analysis is and how it is already used around the world its useful application for a variety of record types and media including print non textual electronic and born digital records how functional analysis provides an alternative to a hierarchical arrangement scheme based upon record groups sub groups and series that mimics the structure of an institution or organization a recommended process for the practical and effective implementation of functional analysis Recordkeeping, Ethics and Law Livia Iacovino, 2006-07-20 Distributed networks such as the Internet have altered the fundamental way a record is created captured accessed and managed over time and therefore who controls has access to and is responsible for its authenticity Law and ethics provide

the major sources of regulatory controls over participants in such networks This book analyses the interrelationship of recordkeeping ethics and law in terms of existing regulatory models and their application to the Internet environment It proposes the legal and social relationship model as an analytical tool for identifying the rights and obligations of recordkeeping participants in networked business transactions within communities of common interest based on trust The model is also used to examine the legal concepts of property access privacy and evidence with particular reference to its Internet context As legal relationships have their basis in the law of obligations found in both common and civil law systems as well as archival science the model has a broad based application The approach in this book has been to reconcile a number of archival traditions the common strands rather than the differences in particular concepts of identity trust acts actors and social relationships as fundamental concepts to social regulation It is therefore primarily directed to archives and records academics and practitioners especially those working within the realm of electronic records in order to provide them with a sound theoretical and practical knowledge of the legal and ethical dimensions of records created in distributed environments
