Statistics Made Simple for School Leaders Susan Rovezzi Carroll,David J. Carroll,2002-10-16 The chief executive officer of a corporation is not much different from a public school administrator While CEOs base many of their decisions on data for school administrators this type of research may conjure up miserable memories of searching for information to meet a graduate school requirement However the value of data based decision making will continue to escalate and the school community students teachers parents and the general public expect this information to come from their administrators Administrators are called on to be accountable but few are capable of presenting the mountain of data that they collect in a cohesive and strategic manner Most statistical books are focused on statistical theory versus application but Statistics Made Simple for School Leaders presents statistics in a simple practical conceptual and immediately applicable manner It enables administrators to take their data and manage it into strategic information so the results can be used for action plans that benefit the school system The approach is user friendly and leaves the reader with a confident can do attitude to communicate results and plans to staff and the community *Combinatorial Optimization Problems in Planning and Decision Making* Michael Z. Zgurovsky,Alexander A. Pavlov,2018-09-24 The book focuses on the next fields of computer science combinatorial optimization scheduling theory decision theory and computer aided production management systems It also offers a quick introduction into the theory of PSC algorithms which are a new class of efficient methods for intractable problems of combinatorial optimization A PSC algorithm is an algorithm which includes sufficient conditions of a feasible solution optimality for which their checking can be implemented only at the stage of a feasible solution construction and this construction is carried out by a polynomial algorithm the first polynomial component of the PSC algorithm an approximation algorithm with polynomial complexity the second polynomial component of the PSC algorithm also for NP hard combinatorial optimization problems an exact subalgorithm if sufficient conditions were found fulfilment of which during the algorithm execution turns it into a polynomial complexity algorithm Practitioners and software developers will find the book useful for implementing advanced methods of production organization in the fields of planning including operative planning and decision making Scientists graduate and master students or system engineers who are interested in problems of combinatorial optimization decision making with poorly formalized overall goals or a multiple regression construction will benefit from this book Basic Statistics for the Tertiary Level' 2007 Ed. , *Basic Statistics and Pharmaceutical*

The Chasm Separating Basic Statistics Education from its Necessities William J. Adams,2013-05-20 The fairly large sample of current basic statistics books I gave thought to recently may in my view be characterized as number pushers with a large number of illustrations intended to convey a sense of the importance of statistics to the study of real world problems What s wrong with that Nothing provided that what I submit to be the necessities of statistics education are given the attention they warrant are not smothered by glitz overwhelming attention to number pushing do not receive shortshrift or are not mentioned at all Am I being too critical I invite you to give thought to fifteen issues questions that are the core of the aforementioned chasm and render your verdict Food for thought in support of the issues questions raised along with answers discussion are included Many students and those who apply statistics to their fields of interest subscribe to the view that to apply statistics to a problem situation all you need do is throw your data into a computer and let it do its thing The further they travel along this road of thought the more we can expect misunderstanding of statistics and when it comes to publication statistical junk I believe that the only way to change the direction of this road of thought is to incorporate into our teaching of basic statistics what is feasible of the necessities of statistics education For further discussion of the necessities of basic statistics education I recommend the book I coauthored with my colleagues Irwin Kabus and Mitchell Preiss Statistics Basic Principles and Applications 2nd ed Kendall Hunt Publishing Co 2000 or the revised 2nd ed W J Adams Xlibris 2009
