**Topographic Mapping** John N. Hatzopoulos,Despina J. Hatzopoulos,2024-10-01 This book is addressed to students and professionals and it is aimed to cover as much as possible the broader region of topographic mapping as it has evolved into a modern field

called geospatial information science and technology More emphasis is placed on using scientific methods and tools materialized in algorithms and software to produce practical results For this reason beyond the written material there are also many educational and professional software programs written by the first author to help comprehend the individual methodologies developed The Target of this book is to provide the people who work in fields of applications of topographic mapping environment geology geography cartography engineering geotechnical agriculture forestry geointelligence etc a source of knowledge for the broader region so that to help them in facing relevant problems as well as in preparing contracts and specifications for such type of work assigned to professionals and evaluating such contracting results It also aims to be a reference for theory and practice for professionals in Topographic Mapping This book applies a didactics method where with a relatively small effort someone can digest a large volume of simple or complicated knowledge material at a desirable scientific depth within a relatively short time interval The objective that educated people must be smarter than the machine and not treat the machine as a black box being button pushers has been achieved through the first author s experience in the USA and Greece with relative success by adopting this didactics technique There are 14 chapters including Reference systems and Projections Topographic instruments and Geometry of coordinates Conventional construction of a topographic map Design and reproduction of a thematic map Digital Topographic mapping GIS Digital Terrain Models DTM DEM GPS GNSS methods of Photogrammetry Remote Sensing new technologies LIDAR IFSAR Augmented reality Mapping with UAS UAV Drones the method of Least Squares adjustment and Description of educational software accompanying the text The 3-D Global Spatial Data Model Earl F. Burkholder, 2017-07-28 Traditional methods for handling spatial data are encumbered by the assumption of separate origins for horizontal and vertical measurements but modern measurement systems operate in a 3 D spatial environment The 3 D Global Spatial Data Model Principles and Applications Second Edition maintains a new model for handling digital spatial data the global spatial data model or GSDM The GSDM preserves the integrity of three dimensional spatial data while also providing additional benefits such as simpler equations worldwide standardization and the ability to track spatial data accuracy with greater specificity and convenience This second edition expands to new topics that satisfy a growing need in the GIS professional surveyor machine control and Big Data communities while continuing to embrace the earth center fixed coordinate system as the fundamental point of origin of one two and three dimensional data sets Ideal for both beginner and advanced levels this book also provides guidance and insight on how to link to the data collected and stored in legacy systems
