Modern Elementary Differential Equations Richard Bellman, Kenneth L. Cooke, 1995-01-01 Designed to introduce students to the theory and applications of differential equations and to help them formulate scientific problems in terms of such equations this undergraduate level text emphasizes applications to problems in biology economics engineering and physics This edition also includes material on discontinuous solutions Riccati and Euler equations and linear difference equations *Elementary Differential Equations with Linear Algebra* Albert L. Rabenstein, 1975 Designed for use by sophomore engineering or junior physical science majors this text is suitable for an introductory course in linear algebra and differential equations or a course in differential equations with a linear algebra prerequisite This text contains detailed coverage of applied topics and includes theorems specifically applicable to engineering students There is a new chapter on Stability and the Phase Plane approximately 300 new problems added throughout and several BASIC programs on nume

Elementary Differential Equations William E. Boyce, Richard C. DiPrima, Douglas B. Partial Differential Equations David. Bleecker,2018-01-18 Methods of solution for partial differential equations PDEs used in mathematics science and engineering are clarified in this self contained source The reader will learn how to use PDEs to predict system behaviour from an initial state of the system and from external influences and enhance the success of endeavours involving reasonably smooth predictable changes of measurable quantities This text enables the reader to not only find solutions of many PDEs but also to interpret and use these solutions It offers 6000 exercises ranging from routine to challenging The palatable motivated proofs enhance understanding and retention of the material Topics not usually found in books at this level include but examined in this text the application of linear and nonlinear first order PDEs to the evolution of population densities and to traffic shocks convergence of numerical solutions of PDEs and implementation on a computer convergence of Laplace series on spheres quantum mechanics of the hydrogen atom solving PDEs on manifolds The text requires some knowledge of calculus but none on differential equations or linear algebra
