Fighting The Drug Problem Wilton Park Papers:

Fighting the Drug Problem Nicholas Hopkinson,1990 The Politics of Drug Control M. Bentham,1998-10-05 The Global Politics of Drug Control sets the drug problem into a theoretical framework which aids understanding of the phenomenon by focusing on changing international values and norms In the early literature on drug use drugs were considered primarily as a social problem and the focus was on seeking a national policy However in the 80s the problem was increasing requiring international cooperation and action bringing the concerned to the arena of international relations scholars The book focuses on changing values and norms in the international community that allow the discipline of international relations to add something new to the current debate on the subject This book should appeal to all those interested in the current discussions on the drug phenomenon as well as to students and academics in the area of international relations and related disciplines

Fighting the Drug Problem Nicholas Hopkinson,1990 Several times a year people in positions of influence from many countries and from diverse professional backgrounds attend international conferences at Wilton Park The Wilton Park Papers are reports on the proceedings and papers delivered at these conferences **Forest Politics** David Humphreys,2014-04-08 An important and timely book from the Foreword by Stanley Johnson A complete and absorbing history of a decade of intense international politics offers many insights for future negotiators of sustainable solutions Stephen Bass International Institute for Environment and Development Skillfully navigates the jungle of forest politics leaving us in no doubt that the verbal commitment to save the world s forests has yet to be translated into action on the ground The way forward must clearly lie in political commitments and international cooperation if forests are to continue to preserve life on Earth Francis Sullivan World Wide Fund for Nature Global deforestation and its attendant processes including soil degradation climate change and the loss of biological diversity emerged as international political issues during the 1980s prompting politicians to seek consensus on programmes and policies for the conservation and sustainable management of forests Yet global initiatives have been bedevilled by tensions between the North and South and between governments industry local communities and indigenous peoples Meanwhile rates of deforestation in the tropics are increasing and international political efforts are demonstrably failing Forest Politics carefully traces the evolution of international cooperation on forests from the inception of the controversial International Tropical Timber Organization and the failed Tropical Forestry Action Programme in the mid 1980s to the creation of the Intergovernmental Panel on Forests in the mid 1990s The book also provides a detailed analysis of the negotiating stances of the parties involved in the divisive negotiations that took place prior to the 1992 Earth Summit in Rio de Janeiro and the equally factious negotiations for the International Tropical Timber Agreement of 1994 It provides a fascinating insight into the nature of such processes illustrating the difficulties that arise when concepts such as global commons come into conflict with national sovereignty Complete with annexes of important political documents and making extensive use of primary source material and interviews with participants Forest Politics presents case studies of all the

major forest negotiations over the last 13 years It is an essential reference point for policy makers environmental campaigners and students and required reading for all those who care about the future of the world s forests David Humphreys is Research Fellow in Global Environmental Change at the Open University Originally published in 1996

Conference 385 7 11 September 1992 European Cooperation in the Fight Against the Drugs Trade Discussions at the conference were dominated by law enforcement approaches as this is currently the main area of international cooperation As the report indicates a great deal of hard work and considerable resources have already been expended in law enforcement and interdiction measures to reduce drugs supply routes to Europe Some weaknesses exist but are generally identified

although how to cope with the ramifications of organised crime and with the vulnerabilities of the eastern part of the continent has yet to be specifically addressed at international level
