Thomas Graham, Jr., Damien J. LaVera, 2011-07-01 This anthology presents the complete text of thirty four treaties that have effectively contained the spread of nuclear biological and conventional weapons during the Cold War and beyond The treaties are placed in historical context by individual commentaries from noted authorities Thomas Graham Jr and Damien J LaVera which provide unique insights on each treaty s negotiation and implementation During the 1990s numerous arms control agreements were concluded under U N or U S leadership In 1995 one hundred sixty five nations agreed to indefinitely extend the Nuclear Nonproliferation Treaty Many nations ratified important chemical and biological weapons conventions a pact to reduce conventional forces in Europe and agreements to limit testing of weapons of mass destruction More recent treaties seeking to restrain small arms trafficking and ban land mines are also highlighted and analyzed Graham concludes with lessons learned from the collective negotiation and verification history of these treaties ongoing efforts to limit weaponry and general observations on the status and effectiveness of these agreements There is no comparable resource available for diplomats international lawyers and arms control specialists *The Arms Trade Treaty: A Commentary* Andrew

Clapham, Stuart Casey-Maslen, Gilles Giacca, Sarah Parker, 2016-07-28 The United Nations Arms Trade Treaty became binding international law in late 2014 and although the text of the treaty is a relatively concise framework for assessing whether to authorize or deny proposed conventional weapons transfers by States Parties there exists controversy as to the meaning of certain key provisions Furthermore the treaty requires a national regulatory body to authorize proposed transfers of conventional weapons covered by the treaty but does not detail how such a body should be established and how it should effectively function *The Arms Trade Treaty A Commentary* explains in detail each of the treaty provisions the parameters for prohibitions or the denial of transfers international cooperation and assistance and implementation obligations and mechanisms As states ratify and implement the Treaty over the next few years the commentary provides invaluable guidance to government officials commentators and scholars on the meaning of its contentious provisions This volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the Arms Trade Treaty regulates It covers international human rights trade disarmament humanitarian law criminal law and state to state use of force as well as the application of the treaty to non state actors US Department of State Dispatch ,1991 **Armored**

Treaty Between the Twenty Two Sovereign Nations on the Reduction of Their Conventional Armed Forces in Europe ,1990 **Tank Battles of the Cold War, 1948-1991** Anthony

Tucker-Jones,2021-06-30 As Anthony Tucker Jones shows in this highly illustrated wide ranging history for most of the Cold War the tank retained its pre eminence on the battlefield The Arab Israeli wars witnessed some of the biggest tank battles of all time and tanks played key roles in conflicts in Korea Vietnam and Afghanistan as well as in the Iran Iraq War and the wars fought between India and Pakistan But then in the mid 1960s anti tank weapons became ever deadlier and the Mechanised Infantry Fighting Vehicle MIFV which was designed to support infantry and fight tanks emerged and the heyday of the tank was over Chapters cover each major phase in the evolution of the tank and of tank warfare during the period from the battles fought in the late 1940s and 1950s with Second World War armoured vehicles like the T 34 and the Sherman through to the designs common in the 1960s and 1970s like the T 55 Centurion Challenger and M60 Patton to the confrontation between the M1 Abrams and the T 72 during the Gulf War in 1991 Technical and design developments are important elements throughout the story but so are dramatic changes in tactics and armaments which mean the tank has an increasingly uncertain role in modern warfare **Modern Armored Fighting Vehicles** Thomas Bruce,2018-09-13 Armored vehicles are essentially armed and armored high mobility off road vehicles While their mobility aspects are clearly very important there

are many high mobility off road vehicles not designed for military applications Therefore the key defining aspects of an Armored Fighting Vehicle AFV as the name implies is the armament they carry to inflict damage and the armor they possess as protection against damage There has within recent years been a great number of exciting and innovative developments in critical AFV technologies Key among these are significant enhancements to both armament and armor The primary armament of an AFV consists of relatively large caliber guns that fire a range of ballistic munitions including kinetic energy penetrators high explosive incendiary and shaped charge warhead tipped rounds Some guns are also capable of firing anti tank guided missiles In addition to the main weapon many AFV s are also equipped with a range of secondary weapons including machine guns grenade launchers mortar tubes and missile launchers These weapons and their capabilities in penetrating standardized armor is reviewed in detail in this volume AFV armor is designed to protect the vehicle against both threats fired by other AFVs and threats originating from any other source including buried mines infantry portable weapons air launched missiles artillery shells and improvised devices Protection against each type of threat often requires a unique type of armor solution These solutions are then layered onto the vehicle to provide the required protection Vehicle armor systems include applique armor spaced armor reactive armor cage armor netted armor electric armor spall systems dazzlers jammers and Active Protection Systems APS Each type of armor is covered in detail in this volume both at a system level and with respect to their integration into specific AFVs This volume covers the theory of AFV design of armament performance and of armor design and performance As well most modern AFVs are described and discussed A modern AFV is considered to be one that was either designed over the last 20 years or is likely to continue to see service with front line combat troops for the foreseeable future Main battle tanks light tanks reconnaissance vehicles tracked and wheeled armored personnel carriers infantry fighting vehicles and tank destroyers are covered
