Luiz Fernando de Paula,2012-07-26 Since the beginning of the 1990s Brazil has followed a pattern of economic development inspired by Washington Consensus This framework includes a set of liberalising and market friendly policies such as privatisation trade liberalization stimulus to foreign direct investment tax reform and social security reforms This book assesses the determinants and impacts of financial liberalisation in Brazil considering its two dimensions the opening up of the balance of payments capital account and the penetration by foreign bank of the domestic banking sector The author combines theoretical and empirical analyses Some make use of mathematical models and or statistical techniques however they are only used when they are strictly necessary to the analysis *Proceedings of the 2023 3rd International Conference on Financial Management and Economic Transition (FMET 2023)* Vilas Gaikar,Min Hou,Yan Li,Yan Ke,2023-10-13 This is an open access book 2023 3rd International Conference on Financial Management and Economic Transition FMET 2023 will be held on August 18 20 2023 in Changsha China At present the global economic situation is complex the recovery prospects are not clear and the economic growth rate is slowing down which is at the key stage of transforming the economic development mode and industrial transformation and upgrading With the transformation of the mode of economic development various problems and contradictions coexist and the problems of imbalance

uncoordinated and unsustainable development are prominent The contradiction between the downward pressure on economic growth and the relative overcapacity has intensified The problems of rising production and operation costs and insufficient innovation capacity coexist The contradiction between the slow growth of fiscal revenue and the increase of government rigid expenditure is prominent The irrational industrial structure the weak agricultural foundation the increasingly acute contradiction between economic development and resources and environment the large gap between urban and rural areas regional development and income distribution of residents and the obvious increase of social contradictions which are related to the vital interests of the public The economy and society are facing a series of opportunities and challenges Therefore it is expected to clarify the obstacles and obstacles to sustainable development and launch measures to deepen reform Macroeconomic growth and its development are highly correlated with the development of enterprises at the microeconomic level Since the outbreak of the international financial crisis the economy especially the real economy has faced the current situation of declining growth rate weak demand rising costs and shrinking profits The essence behind this phenomenon is the difficult problem of structural adjustment and transformation of development mode Now we need to transform to the path of refined and scientific management and achieve higher labor efficiency output with less resource input and lower capital consumption Through numerous micro economies we have achieved a wide ranging transformation of growth thus promoting the transformation of the national economy Among them financial management is of great significance We sincerely invite you to participate in FMET 2023 to discuss the relationship and development direction between economic transformation and financial upgrading

Economic Liberalization and Industrial Performance in Brazil Edmund Amann, 2000-08-10 In the past ten years the Brazilian economy has experience an unprecedented wave of market liberalization as import substitution has been progressively abandoned in favour of integration into the global economy Trade barriers have fallen privatizations have been implemented and government procurement has been cut back Although these policy shifts will be familiar to many their implications in terms of performance may not Using a comprehensive array of primary and secondary sources and in depth company case studies this book examines how one vitally important Brazilian industrial sector the non serial capital goods sector coped with the onset of liberalization While liberalization undoubtedly helped to promote greater efficiency in some areas of corporate performance the impact elsewhere was far less favourable This differentiated response raises some interesting and troubling theoretical and policy issues

Responsive and proactive market orientation and hospital financial performance The mediating effect of service program innovativeness

PURPOSE The study aims to investigate the direct and indirect relationships among market orientation service program innovativeness and the financial performance of hospitals Two types of market orientation responsive and proactive were considered along with two dimensions of service program innovativeness meaningfulness and novelty

METHODOLOGY The

study gathered data through a survey conducted on a random sample of 204 Polish hospitals Structural equation modeling was used to analyze the data test a conceptual model designed as a parallel two mediator model and validate the hypotheses

FINDINGS The work revealed both direct and indirect effects In terms of direct effects the study found that implementing a responsive market orientation positively influences the meaningfulness of a hospital s service program but has no impact on its novelty Conversely the implementation of a proactive market orientation has a positive influence on both the meaningfulness and novelty of the program Furthermore the meaningfulness and novelty of the program contribute positively to the hospital s financial performance In terms of indirect effects the study identified mediation phenomena a responsive market orientation positively affects a hospital s financial performance through the meaningfulness of the service program while a proactive market orientation enhances financial performance through the novelty of the program

IMPLICATIONS The study contributes to the current understanding confirming the positive impact of a proactive market orientation on innovations within the organization while contradicting the view that a responsive market orientation supports these innovations Additionally the results support the idea that innovations within the organization have a positive impact on its outcomes The study also reveals specific mechanisms that influence market orientation on organizational outcomes indicating that a responsive orientation affects a service provider s outcomes through the meaningfulness of its service program while a proactive orientation influences outcomes through the novelty of the program The practical recommendations for hospital managers are as follows a to achieve a high level of meaningfulness in the service program it is advisable to implement both responsive and proactive market orientations b to attain a high level of novelty in the program a proactive market orientation is recommended c to enhance the hospital s financial performance it is suggested to develop a service program that is both meaningful and novel and to implement both responsive and proactive market orientations

ORIGINALITY AND VALUE The study s originality and value stem from its exploration of specific direct and indirect mechanisms through which market orientation affects hospital financial performance filling a prior research gap By investigating these mechanisms the study enhances the overall understanding of hospital management

Does ESG performance have an impact on financial performance Evidence from Turkey

PURPOSE Stakeholders such as consumers nongovernmental organizations and public institutions have increasingly pressured companies to adopt corporate social responsibility CSR policies This trend has led to the integration of environmental social and governance ESG reporting into business strategies to achieve long term competitive advantages and enhance financial performance ESG reporting has become a critical tool for measuring corporate CSR efforts contributing to the institutionalization of nonfinancial reporting standards This study aims to determine how the adoption of ESG sub dimensions affects the financial performance of companies in Turkey

METHODOLOGY The study employed panel regression analysis on data from 21 companies listed in the

Borsa Istanbul 100 index over the period 2011 2020 to investigate the relationship between ESG sub dimensions and firm performance

FINDINGS The findings indicate that adopting the environmental and governance sub dimensions positively affects ROE and Tobin's Q. However, the adoption of the governance sub dimension negatively impacts Tobin's Q while positively influencing ROE. No statistically significant results were found regarding the impact of ESG sub dimensions on firms' ROA ratios.

IMPLICATIONS The results of the research based on the example of Turkey are important to determine how companies' social responsibility strategies in developing countries provide them with outputs in terms of environment, social, and governance, and whether social responsibility based activities are truly sustainable strategy for companies in developing countries. The findings highlight the importance of considering the macroeconomic structure, legal system, and financial development of countries when evaluating CSR activities. The regulatory environment plays a significant role as weaker legal protections can negatively affect the relationship between governance practices and firm performance. For practitioners, the insights suggest prioritizing environmental investments and carefully strategizing governance practices to align with investor expectations and regulatory frameworks.

ORIGINALITY AND VALUE By focusing on the BIST 100 companies, this study contributes to the limited literature on the role of ESG sub dimensions in shaping financial performance in developing markets. This research provides valuable insights into how environmental, social, and governance practices specifically impact the financial outcomes of firms in Turkey, offering a nuanced understanding that can inform both academic discussions and practical strategies in similar contexts.

The impact of strategic management on organizational creativity and its influence on the financial performance of SMEs: PURPOSE This research intends to help small and medium-sized enterprises (SMEs) in Ho Chi Minh City (HCMC) to understand the strategic management process. The study considers an inside and an outside in perspective and the intermediary role of organizational creativity in financial performance. It also aims to help SMEs achieve financial performance benchmarks and work towards sustainable development goals. This research is also significant and adds value to the performance management domain. Its overarching objective is to promote long-term business expansion through an exploration of the strategic management process and how organizational creativity and financial performance can be supported.

METHODOLOGY The sample data are collected from 411 SMEs in HCMC using convenience sampling. The data are rigorously screened and cleaned to select a reliable sample for analysis, and Smart PLS software is employed for data analysis to achieve the study's outcomes.

FINDINGS Factors such as the strategic management process, an inside-out perspective, an outside-in perspective, and the intermediary role of organizational creativity positively impact the financial performance of Vietnamese SMEs in HCMC.

IMPLICATIONS The results show that SMEs are making changes and influencing these factors to improve financial performance. This research contributes value and provides a holistic perspective on the strategic management process for Vietnamese SMEs in HCMC to improve financial performance.

ORIGINALITY AND VALUE

The study offers insight into strategic management and highlights the pivotal role of creativity in managing the financial performance of enterprises. The overarching goal is to achieve sustainable development in an increasingly competitive environment. The study also provides a solid foundation for SME managers to restructure their operations for enhanced financial performance. It also offers valuable insights for future scholars to consider and apply in expanding available research models.

Keywords: SME strategic management process, organizational creativity, financial performance, sustainable development goal, Sustainability performance, corporate governance and financial performance. Evidence from Poland and Central European listed companies.

PURPOSE: Businesses are regarded as the main agents that can help achieve sustainable development. Therefore, more and more firms of various characteristics integrate sustainability issues into their business strategies. There is ongoing debate on the relationship between sustainability engagement and firm performance with ambiguous results. Our study falls into this stream of research by adding the perspective of the Central European economy. The main objective of our paper is to examine the relationship between firm sustainability performance and its financial performance in the context of various corporate governance characteristics, in particular board attributes and ownership structure.

METHODOLOGY: Our research sample covers firms listed on the Warsaw Stock Exchange representing various indexes related to their size and sectors in 2015–2021. We measure sustainability performance with our original aggregated index created by integrating key firm ESG engagement characteristics. Financial performance is analyzed from two different perspectives: accounting perspective illustrated by profitability of assets (ROA) and market perspective illustrated by market value (MV/BV ratio). To achieve the research aims, several statistical methods were employed in the study, including selected descriptive statistics and panel regression models.

FINDINGS: Our results confirm a significant positive relationship between sustainability and financial performance as measured by ROA and MV/BV ratios. Additionally, we observe a significant positive relationship between gender diversity on the management board (the presence of women on the management board) and accounting performance. Our results provide an argument for firm engagement in sustainability initiatives as it may improve its profitability and market value.

IMPLICATIONS: for theory and practice. Our study not only contributes to the corporate finance and sustainability literature by providing evidence on the relationship between sustainability performance and financial performance in the context of the Central European economy but also provides insights for corporate governance research in terms of board attributes and different types of ownership structures. The policy suggestions derived from our findings can benefit both managers and regulators focusing on the sustainable development paradigm and ultimately enhancing overall stakeholder well-being.

ORIGINALITY AND VALUE: The originality of our research stems from investigating the relationship between sustainability performance and firm performance from both an accounting and a market perspective and using the original sustainability index developed for the purpose of the study. Additionally, we address potential gaps in existing research by incorporating several corporate governance characteristics to clarify their importance for a firm.

performance Keywords sustainability performance firm performance ownership structure board attributes corporate governance listed companies ESG performance financial performance Firm size as a moderator of stakeholder pressure and circular economy practices Implications for economic and sustainability performance in SMEs PURPOSE This study examines the interplay between stakeholder pressure internal and external circular economy CE practices firm size and their impact on the sustainability and economic performance of Small and Medium sized Enterprises This research underscores firm size as a key moderator in the relationship between stakeholder pressures and CE adoption aiming to provide a comprehensive understanding of this dynamic in SMEs METHODOLOGY Based on a cross sectional survey of 124 SMEs in Estonia Latvia and Lithuania with respondents primarily being owners and managers of firms a three step approach tested the proposed model for CE practices First Confirmatory Factor Analysis CFA was used to ensure that the observed variables represented latent constructs Second Ordinary Least Squares OLS and Weighted Least Squares WLS regression methods were used to control for factors influencing CE adoption Finally the interaction terms assessed the moderating role of firm size FINDINGS The research shows that firm size moderates these effects with external stakeholder pressure significantly influencing CE adoption more than internal pressure These finding underscores how firm size shapes SMEs responses to stakeholder pressure when adopting CE practices IMPLICATIONS This study provides empirical evidence that stakeholder pressure significantly influences SMEs in the Baltic States to adopt CE practices thus impacting economic and sustainability performance Smaller firms can enhance CE practices by strategically managing stakeholders whereas larger SMEs should align with external stakeholder expectations for more effective CE initiatives leading to improved organizational performance ORIGINALITY AND VALUE This study demonstrates how stakeholder pressures drive CE practices and impact organizational sustainability and economic performance Firm size plays a crucial role as a moderator amplifying the influence of external stakeholder pressure on CE practices Keywords Stakeholder Pressure Circular Economy Practices Small and Medium sized Enterprise Sustainability Performance Economic Performance Baltic States Capital structure specificity in knowledge intensive industries A comparative study of EU countries PURPOSE This paper aims to examine and compare the capital structure patterns and financial decision making determinants of knowledge based firms and traditional industries in selected EU countries over the period 2000 2023 The study seeks to uncover sector specific features focusing on the unique financial behaviors of knowledge intensive enterprises compared to their traditional counterparts It also explores how factors such as asset structure profitability and growth opportunities influence capital structure decisions within these industries thus providing implications for financial management in innovation driven sectors METHODOLOGY The methodology involves analyzing data from 12 EU countries categorized by industry sectors M and J for knowledge based firms and other sectors for traditional firms and firm size The research applies panel data modeling to evaluate the differences and influences on capital structure within these groups FINDINGS The study reveals that knowledge based firms exhibit distinct capital

structure characteristics including a higher reliance on intangible assets and lower ratios of long term debt compared to traditional firms Specifically the findings indicate that intangible assets are positively correlated with total and long term debt in knowledge based firms meaning that an increase in intangible asset value is associated with a corresponding increase in total and long term debt levels This relationship aligns with the modified pecking order theory which posits that firms prioritize funding sources based on their perceived cost and risk The determinants of capital structure such as profitability and growth opportunities also demonstrate differing impacts revealing the unique financial strategies employed by knowledge based firms IMPLICATIONS This research highlights the importance of adapting financial strategies to the specific needs of knowledge based firms which often face unique challenges due to their reliance on intangible assets Policymakers can use these findings to design targeted financial policies that support the growth and sustainability of innovation driven enterprises such as by offering incentives for intangible asset financing or by reducing barriers to accessing long term debt For practitioners the insights highlight the need to align financial decision making with sector specific characteristics to optimize capital structure and drive competitive advantage ORIGINALITY AND VALUE This research makes a unique contribution by providing one of the first comparative analyses of capital structure determinants across knowledge based and traditional firms in multiple EU countries over an extended timeframe 2000 2023 Unlike prior studies which often focus on individual sectors or countries this study offers a comprehensive and cross sectoral perspective enriching the understanding of how financial theories operate in diverse economic and institutional contexts By addressing the financial behaviors of knowledge intensive firms the research bridges a critical gap in the literature and informs both academia and practice Keywords capital structure knowledge based firms traditional industries panel data regression EU countries innovation driven enterprises modified pecking order theory sector specific analysis

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts.

The Secret History is a exceptional and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
