Anantha Nageswaran, Gulzar Natarajan, 2019-04-25 Financialisation or the disproportionate importance of financial considerations in economic decisions has been a defining feature of the economic history of the last twenty five years The wave of deregulation that accompanied the neoliberal agenda in the US aided by the dominance of US dollar and American economy has resulted in the globalisation of finance This book examines

the rise of financialisation globally while charting its drawbacks and prescribing suggestions for a definitive overhaul of the structure Bringing together various strands of the latest research and evidence generated in recent years empirical analysis and views of reputed experts in the field it presents a counter point to the canonical ideas of analysing financial market dynamics and financial globalisation It proposes a revision of the current monetary policy paradigm to correct its excessive focus on equity markets and their wealth effect embrace a more symmetric response to the economic cycle and a mandate to focus on financial stability as much as price stability Ecological Sensitivity and Global Legal Pluralism Oren

Perez,2004-06 The tension between trade liberalisation and environmental protection has received remarkable attention since the establishment of the WTO It has been the subject of a wide ranging debate and is one of the central themes of the anti globalisation movement This book explores that debate It argues that by focusing on the WTO the debate has failed to recognise the institutional and discursive complexity in which the trade environment conflict is embedded A legal investigation of this nexus requires a framework of inquiry in which this complexity can be elucidated a model of global legal pluralism The first theoretical part of the book Chapters One and Two responds to this challenge by developing a pluralistic model which recognises the trade and environment conflict as the product of multiple dilemmas constituted and negotiated by a myriad of institutional and discursive networks As such this conflict cannot be understood or addressed through one dimensional models Viewing the trade environment conflict through a pluralistic perspective yields important practical insights It means that this conflict cannot be resolved by uniform economic or legal formulae Dealing with this conflict requires rather polycentric and contextual strategy The empirical part of the book Chapters Three to Seven explicates this thesis by examining several global legal domains ranging from the WTO to private transnational regimes such as transnational litigation international construction law and international financial law This part demonstrates how the different discursive and institutional structures of these domains have influenced the contours of the trade environment conflict and considers the policy implications of this diversity from a pro environmental perspective **The Indian**
