"This book is intended for graduate or undergraduate students in the human services. It is not intended to be an entry-level text in accounting for nonprofit organizations. Rather, it is to familiarize the student with the financial terms, concepts, required forms and procedures to be used in the nonprofit human service agency... This book tries to teach key concepts and skills in each of the major areas of the financial management process. The book is divided into sections relating to parts of the process. Section I is an overview that covers the systems concept and unique characteristics of nonprofit organizations. Section II covers the planning and acquisition of resources by the agency... Section III covers distribution of the acquired resources through internal control, budgeting, and investments. Section IV covers the recording and reporting of the agency's financial activities."
