## **Financing Foreign Trade In Eastern Europe Problems Of Bilateralism And Currency Inconvertibility:**

**Financing Foreign Trade in Eastern Europe** John S. Garland, 1977      The Politics of International Economic Relations Jeffrey A. Hart, Joan Edelman Spero, 2013-06-17 The first and definitive book of its kind Joan Spero's The Politics of International Economic Relations has been fully updated to reflect the sweeping changes in the international arena With the expertise of co author Jeffrey Hart the fifth edition strengthens the coverage of political and economic relations since the end of the Cold War economic polarization in developing nations and the roots of economic decline in centrally planned economies A new chapter on industrial policy and competitiveness debates further illustrates the changing dynamics of International Political Economy Ideal as a supplement to the International Relations course or as the core text in International Political Economy Spero and Hart's The Politics of International Economic Relations continues to give students the breadth and depth of scholarship needed to understand the politics of world economy      **International Commodity Control** Fiona Gordon-Ashworth, 2024-02-01 Originally published in 1984 at a time when international commodity control was brought from the periphery to the centre of international trade policy this book provided a new and more comprehensive approach to and an analytical appraisal of international commodity controls from their origins in the 1920s to their widespread acceptance as an important element in international trade policy in the 1970s The first part establishes the economic and institutional background against which controls were introduced and includes sections on a wide range of issues such as the changing structure of world commodity trade and the roles of GATT UNCTAD and the former EEC Part 2 considers the principal control mechanisms which have been used at the international level and review the national counterparts and alternatives Part 3 assesses on a commodity by commodity basis how the control worked in practice It covers all the international commodity agreements to 1982 and also considers examples of raw material cartels      The Institutions of Comecon Giuseppe Schiavone, 1981-06-18      **The Economics Of Soviet Bloc Trade And Finance** Franklyn D Holzman, 2019-06-26 Reflecting Professor Holzman's important work this book deals with major issues relating to both East West and intra bloc trade Professor Holzman explores the transition in Soviet bloc economies over the past fifteen years from balanced hard currency trade to large deficits with the West and the consequent development of a huge hard currency debt He compares the causes and treatments of deficits in planned economies with those in market economies and explores the dramatic differences in foreign trade behavior exhibited by Eastern and Western nations and the difficulties that arise when these conflicting systems interact in world markets He also assesses the impact of Western economic warfare on the Soviet Union and makes recommendations for future U S trade policy The author next turns to the issue of intra bloc trade In its early years the USSR economically exploited the smaller East European nations but many argue that the Soviet Union now subsidizes trade with its partners in the Council for Mutual Economic Assistance in exchange for political military and ideological support an argument that Professor Holzman strongly challenges He also contends that CMEA when viewed as a

preferential trade group or customs union has been markedly unsuccessful On another level Professor Holzman assesses the causes and possible cures for the serious chronic problems related to currency inconvertibility rigid bilateralism and inability to use exchange rates as tools of economic adjustment In an international economy growing ever more interdependent the issues raised in these previously uncollected essays will continue to gain in importance as East and West meet in trade

**The American Role in the Global Economy** Susan J. Whitson,1988      **Comecon** J. J. Brine,1992 Comecon or the Council for Mutual Economic Assistance was founded by Joseph Stalin in 1949 to counteract the Marshall Plan and reinforce the bonds between the Soviet Union and the people s democracies of Eastern Europe Other Soviet Bloc nations later joined Comecon and for forty years it dominated the trade policies of the Soviet Bloc and profoundly influenced their domestic economic development and relations with the West Comecon collapsed in 1991 after the countries of Eastern Europe rejected communism It was often compared with the West European Common Market but differed vastly in its aims structure powers and activities Its influence is a critical factor in assessing both the economic failures of the Soviet Bloc and the problems facing former member states as they make the transition to free market economies This detailed annotated bibliography is an essential guide to the extensive English language literature about Comecon from its founding until its demise Chapters cover Comecon s history structure and law socialist economic integration the organization s arrangements for international trade and finance environment natural resources and energy labor industry and agriculture science and technology Comecon like the rest of the Soviet Bloc collapsed suddenly but its legacy will color international relations and worldwide economic issues for years to come An understanding of its institutions mechanisms and policies remains vital hi appreciating the economic organization of the former Soviet empire This bibliography will therefore be indispensable to policymakers economists historians and political scientists

**The Politics of International Economic Relations** Joan Edelman Spero,Jeffrey A. Hart,2003 The sixth edition of this text gives greater emphasis to economic globalization and focuses on changes that continue to reshape the international arena Coverage of political and economic relations economic polarization in developing nations and the forces of economic change in former communist countries      *Catalog of Copyright Entries.
