*Fungal Antigens* Edouard Drouhet,Garry T. Cole,Louis De Repentigny,Jean Latge,2013-11-11 Three years ago when Professor Garry Cole visited our Mycology unit at the Pasteur Institute we discussed the possibility of organizing a small International Symposium on Isolation Purification and Detection of Fungal Antigens limited to 8 American Canadian scientists and to 8 French participants The location chosen was the Pasteur Institute because of the historical and current importance of the Institute as a Center for Research in Immunology and Medical Mycology The interest demonstrated by all medical mycologists we contacted led us to expand the small original meeting to an international symposium in which all aspects of antigens of pathogenic and allergenic fungi and actinomycetes related to man animals and even plants would be discussed Our wish was also to hold this Symposium in the same week as the Anniversary meeting of the French Society of Medical Mycology which was founded at the Pasteur Institute 30 years ago with my colleagues Gabriel Segretain and Francois Mariat      Handbook of Applied Mycology Arora,1991-07-25 Contributors cover current knowledge relevant to the mycotic diseases of humans fish and shellfish Also covered is the use of molds to biologically control insects that yearly cause enormous crop losses and a consequent drain in the economy of the nations of the world The problems posed by fungi

*Monoclonal Antibodies* Johann H. Peters,Horst Baumgarten,2012-12-06 The present new version of this popular laboratory manual is at the same time the first one of this text in the English language and this makes me even a little proud as it reminds me of probably the first collection of monoclonal recipes in English written by myself which circulated for a couple of years in many laboratories In the meantime many researchers have put enormous effort into improving methods for monoclonal antibody production The procedures have become more and more standardized and by this have more and more lost the character of magic secrets Hinrich Peters and Horst Baumgarten who had followed this good tradition already in the previous edition written in German succeeded in making laboratory tricks teachable They had contributed their own experiences in cell culture and immunology and were able to engage a number of experienced authors to contribute to the work They were all willing to follow the general concept of this book which contains a brief theoretical background for the methods described and presents the procedures in a highly organized structure So the book has retained its shape as a cook book which I especially like      *Handbook of Experimental Immunology: Applications of immunological methods in biomedical sciences* Donald Mackay Weir,1986      Membrane Fusion Jan Wilschut,2019-11-14 This balanced volume provides a broad and coherent overview of recent progress in membrane fusion research highlighting an interdisciplinary treatment of the subject from the fields of biophysics biochemistry cell biology virology and biotechnology in a single volume

Featuring easy access sections on the general properties of membranes and applications of membrane fusion techniques this valuable sourcebook outlines membrane structure lipid polymorphism and intermembrane forces covers membrane fusion in model systems presents the fusogenic properties of enveloped viruses discusses the fusion and flow of intracellular membranes and cell cell fusion occurring during fertilization and myogenesis offers applications of membrane fusion techniques in cell biological research and biotechnology and more Supplying a comprehensive view of this exciting topic Membrane Fusion is a working resource for molecular cell and membrane biologists biophysicists biochemists virologists biotechnologists microbiologists immunologists physiologists and graduate and medical school students in biophysics biochemistry physiology virology cell biology and biotechnology
