Jonathan McCollum, David G. Hebert, 2014-09-11 Historical ethnomusicology is increasingly acknowledged as a significant emerging subfield of ethnomusicology due to the fact that historical research requires a different set of theories and methods than studies of contemporary practices and many historiographic techniques are rapidly transforming as a result of new technologies In 2005 Bruno Nettl observed that the term historical ethnomusicology has begun to appear in programs of conferences and in publications Nettl 2005 274 and as recently as 2012 scholars similarly noted an increasing concern with the writing of musical histories in ethnomusicology Ruskin and Rice 2012 318 Relevant positions recently advanced by other authors include that historical musicologists are all ethnomusicologists now and that all ethnomusicology is historical Stobart 2008 yet we sense that such arguments while useful and theoretically correct may ultimately distract from careful consideration of the kinds of contemporary theories and rigorous methods uniquely suited to historical inquiry in the field of music In *Theory and Method in Historical Ethnomusicology* editors Jonathan McCollum and David Hebert along with contributors Judah Cohen Chris Goertzen Keith Howard Ann Lucas Daniel Neuman and Diane Thram systematically demonstrate various ways that new approaches to historiography and the related application of new technologies impact the work of ethnomusicologists who seek to meaningfully represent music traditions across barriers of both time and space Contributors specializing in historical musics of Armenia Iran India Japan southern Africa American Jews and southern fiddling traditions of the United States describe the opening of new theoretical approaches and methodologies for research on global music history In the Foreword Keith Howard offers his perspective on historical ethnomusicology and the importance of reconsidering theories and methods applicable to this field for the enhancement of musical understandings in the present and future *Routledge Handbook of Historical International Relations* Benjamin de Carvalho, Julia Costa Lopez, Halvard Leira, 2021-06-28 This handbook presents a comprehensive concise and accessible overview of the field of Historical International Relations HIR It summarizes and synthesizes existing contributions to the field while presenting

Fathers of the Lega George Newth, 2023-08-25 This book investigates the historical roots of the Italian Republic's oldest surviving political party the populist far right Lega Nord tracing its origins to post war Italy The author examines two main case studies the Movements for Regional Autonomy MRAs the Piedmontese Movement for Regional Autonomy the MARP and the Bergamascan Movement for Autonomy the MAB both of which formed a first wave of post war populist regionalism from 1955 until 1960 The regionalist leagues which later emerged in both Piedmont and Lombardy in the 1980s and which would later form part of the Lega Nord represented in many ways a revival of the MRAs populist regionalist discourse and ideology and therefore a second wave of post war populist regionalism Despite this neither the MRAs nor the twenty year gap between these waves of activism have received the attention they deserve Drawing on a series of archival and secondary sources this book takes an innovative approach which blends concepts and theories from historical sociology and political science It also provides a nuanced examination of the continuities and discontinuities between the MRAs and the Lega from the 1950s until time of publication This contributes to debates not only in

contemporary Italian history but also populism and the far right While rooted in historical approaches the book's interdisciplinarity makes it suitable for students and researchers across a variety of subject areas including European history modern history and political history *The French Historical Revolution* Peter Burke, 2015-01-20 This book provides a critical history of the movement associated with the journal *Annales* from its foundation in 1929 to the present This movement has been the single most important force in the development of what is sometimes called the new history Renowned cultural historian Peter Burke distinguishes between four main generations in the development of the *Annales* School The first generation included Lucien Febvre and Marc Bloch who fought against the old historical establishment and founded the journal *Annales* to encourage interdisciplinary collaboration The second generation was dominated by Fernand Braudel whose magnificent work on the Mediterranean has become a modern classic The third generation deeply associated with the cultural turn in historical scholarship includes recently well known historians such as Emmanuel Le Roy Ladurie Jacques Le Goff and Georges Duby This new edition brings us right up to the present and contemplates the work of a fourth generation including practitioners such as Roger Chartier Serge Gruzinski and Jacques Revel This new generation continued much of the cultural focus of the previous *Annales* historians while diversifying further and becoming increasingly reflexive a move that owes much to the sociocultural theories of Michel Foucault Michel de Certeau and Pierre Bourdieu Wide ranging yet concise this new edition of a classic work of analysis of one of the most important historical movements of the twentieth century will be welcomed by students of history and other social sciences and by the interested general reader

Historical Organization Studies Mairi Maclean, Stewart R. Clegg, Roy Suddaby, Charles Harvey, 2020-11-26 We are now entering a new phase in the establishment of historical organization studies as a distinctive methodological paradigm within the broad field of organization studies This book serves both as a landmark in the development of the field and as a key reference tool for researchers and students For two decades organization theorists have emphasized the need for more and better research recognizing the importance of the past in shaping the present and future By historicizing organizational research the contexts and forces bearing upon organizations will be more fully recognized and analyses of organizational dynamics improved But how precisely might a traditionally empirically oriented discipline such as history be incorporated into a theoretically oriented discipline such as organization studies This book evaluates the current state of play advances it and identifies the possibilities the new emergent field offers for the future In addition to providing an important work of reference on the subject for researchers the book can be used to introduce management and organizational history to a student audience at both undergraduate and postgraduate levels The book is a valuable source for wider reading providing rich reference material in tutorials across organizational studies or as recommended or required reading on courses with a connection to business or management history Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0

license **The Prospect of Global History** James Belich, John Darwin, Margret Frenz, Chris Wickham, 2016-02-11 The Prospect of Global History takes a new approach to the study of global history seeking to apply it rather than advocate it The volume seeks perspectives on history from East Asian and Islamic sources as well as European ones and insists on depth in historical analysis The Prospect of Global History will speak to those interested in medieval and ancient history as well as modern history Chapters range from historical sociology to economic history from medieval to modern times from European expansion to constitutional history and from the United States across South Asia to China *Historical Sociology* Frank Stephen Granger, 1911 **Encyclopedia of Social Theory** Austin Harrington, Barbara L. Marshall, Hans-Peter Müller, 2006 The Encyclopedia of Social Theory contains over 500 entries varying from concise definitions of key terms and short biographies of key theorists to comprehensive surveys of leading concepts debates themes and schools The object of the Encyclopedia has been to give thorough coverage of the central topics in theoretical sociology as well as terms and concepts in the methodology and philosophy of social science Although 106 theorists are given entries the emphasis of the work is on the elucidation of ideas rather than intellectual biography The Encyclopedia covers the leading contemporary domains of debate on social theory and the classical legacies of social thinkers from the nineteenth and early twentieth centuries giving proper balance to both the European and North American traditions and to important new developments in the global self understanding of sociology Social theory has become one of the most vigorous specialisms of sociology in recent years This is in part due to the considerable overlaps of social theory with other disciplinary areas such as cultural and media studies anthropology and political theory and to the cross disciplinary nature of theoretical approaches such as feminism and psychoanalysis and new fields such as postcolonial studies The editors have therefore worked to produce in the Encyclopedia of Social Theory a first call reference for students and researchers across the social sciences and humanities with an interest in contemporary theory and the modern history of ideas The Encyclopedia has been authored by leading international specialists in the field under the direction of a well balanced editorial team It is comprehensively cross referenced and all larger entries carry bibliographies There is a full index **European Integration, Processes of Change and the National Experience** S. Börner, M. Eigmüller, 2015-06-02 In order to better understand processes of European integration this book offers a new perspective that compares past experiences of change to current transitional moments at the European level It addresses key questions about European society EU integration and social change to reveal the social construction of emergent polities and societies **Entanglements of Modernity, Colonialism and Genocide** Jack Palmer, 2018-05-08 This book offers a novel sociological examination of the historical trajectories of Burundi and Rwanda It challenges both the Eurocentric assumptions which have underpinned many sociological theorisations of modernity and the notion that the processes of modernisation move gradually if precariously towards more peaceable forms of cohabitation within and between societies Addressing these themes at critical historical junctures precolonial colonial and postcolonial the

book argues that the recent experiences of extremely violent social conflict in Burundi and Rwanda cannot be seen as an object apart from the concerns of sociologists as it is commonly presented. Instead, these experiences are situated within a specific route to and through modernity, one entangled with Western modernity. A contribution to an emerging global historical sociology, *Entanglements of Modernity: Colonialism and Genocide* will appeal to scholars of sociology and social theory with interests in postcolonialism, historical sociology, multiple modernities, and genocide. *A Social Theory of the Nation-State* Daniel Chernilo, 2008-03-25. A Social Theory of the Nation State construes a novel and original social theory of the nation state. It rejects nationalistic ways of thinking that take the nation state for granted as much as globalist orthodoxy that speaks of its current and definitive decline. *Marx and Weber on Oriental Societies* Lutfi Sunar, 2016-05-06. The Orient was central to the work of Marx and Weber, both figures building their theories around the question of why modernity appeared to emerge only in the West. While Marx's account focused on the accumulation of capital in the West, Weber's explanation for this phenomenon centred on Western rationalization. Extending recent work comparing the social theories of Marx and Weber, this book examines their approaches to Oriental societies, showing how, in spite of the differences in their respective theorizations of the historical and political development of the West, their work on the form of modern society in the Orient converges, each complementing the other. Fully conversant with recent scholarly work on Marx and Weber, this comprehensive re-examination of the points of convergence and departure in their work requires us to re-evaluate both their positions in the history of sociology and their relevance to contemporary social questions. As such, it will appeal to scholars of social and political theory and classical sociology. *Civilization, Modernity, and Critique* Lubomír Dunaj, Jeremy Smith, Kurt Mertel, 2023-05-25. *Civilization, Modernity, and Critique* provides the first comprehensive, cutting-edge engagement with the work of one of the most foundational figures in civilizational analysis, Johann P. J. J. In order to do justice to J. P. J.'s seminal and wide-ranging contributions to sociology, social theory, and history, it brings together distinguished scholars from a variety of disciplinary backgrounds and geographical contexts. Through a critical interdisciplinary dialogue, it offers an enrichment and expansion of the methodological, theoretical, and applicative scope of civilizational analysis by addressing some of the most complex and pressing problems of contemporary global society. A unique and timely contribution to the ongoing task of advancing the project of a critical theory of society, this volume will appeal to scholars of sociology and social theory with interests in historical sociology, critical theory, and civilizational analysis. *Comprehending the Complexity of Countries* Hans Kuijper, 2022-01-18. This book argues for computer-aided collaborative country research based on the science of complex and dynamic systems. It provides an in-depth discussion of systems and computer science, concluding that proper understanding of a country is only possible if a genuinely interdisciplinary and truly international approach is taken, one that is based on complexity science and supported by computer science. Country studies should be carefully designed and collaboratively carried out, and a new generation of country students should pay more attention to the fast-growing potential.

of digitized and electronically connected libraries In this frenzied age of globalization foreign policy makers may to the benefit of a better world profit from the radically new country studies pleaded for in the book Its author emphasizes that reductionism and holism are not antagonistic but complementary arguing that parts are always parts of a whole and a whole has always parts *Regional Economic Development and History* Marijn Molema, Sara Svensson, 2019-10-17 Regional Studies is inextricably intertwined with history Cultural and institutional legacies inform choices between different policy options meaning that the past plays a crucial role in how we think about regional economic development planning and policy Through a selection of accessible theoretical methodological and empirical chapters this book explores the connections between regional development and history Drawing on the expertise of scholars in several disciplines it links history to topics such as behavioural geography interdependence divergence and regional and urban policy This innovative book will be of interest to researchers across regional studies planning economic geography and economic history **RELIGION, CULTURE AND SUSTAINABLE DEVELOPMENT -Volume I** Roberto Blancarte Pimentel, Robert Charles Elliot, Robert Holton , 2010-12-18 Religion Culture and Sustainable Development is a component of Encyclopedia of Social Sciences And Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Religion Culture and Sustainable Development with contributions from distinguished experts in the field discusses matters of great relevance to our world such as Religion values Culture and Sustainable Development These three volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs
