Cheremisinoff,1996-12-31 Damage from noise exposure of sufficient intensity and duration is well established and hearing loss may be temporary or permanent Fortunately noise exposure can be controlled and technology exists to reduce the hazards Aside from employer employee concern with the inherent hazards of noise added attention has been brought to focus on the subject through regulatory requirements Under the Occupational Safety and Health Act OSHA every employer is legally responsible for providing a workplace free of hazards such as excessive noise It has been estimated that 14 million US workers are exposed to hazardous noise This book is presented as an overview summary for employers workers and supervisors interested in workplace noise and its control We believe that in order to understand and control noise it is not necessary to be highly technical Noise problems can quite often be solved by the people who are directly affected Presented is an overview of noise the regulations concerning its control an explanation of specific principles and a discussion of some particular techniques **Noise Control Manual** David A. Harris,2013-03-09

Excessive noise levels are generally acknowledged to have adverse effects on our environment. Studies indicate that excessive noise levels can cause fatigue in exposed individuals, lower efficiency and productivity, impaired speech communication, and hearing loss. Excessive noise is almost everywhere today in the office, in schools, hospitals, and other institutional facilities in all classes of public buildings and in our factories. INDUSTRIAL NOISE: High noise levels in factories can make speech communication in the plant difficult and at times impossible. Foremen are often unable to hear warning shouts from co-workers. The problem of hearing loss due to excessive noise exposure is of particular concern to industry and to the federal government. In the early 1970s, the United States Congress passed the Occupational Safety and Health Act (OSHA), which sets criteria for health hazards and established limits for noise exposure of industrial workers. The OSHA Noise Standard was amended in 1982 to require audiometric testing of all employees exposed to noise levels of 85 dB or above for eight hours. A NOISE IN COMMERCIAL AND INSTITUTIONAL BUILDINGS: While noise levels in offices, stores, schools, and other commercial and institutional buildings seldom reach those encountered in many industrial environments, they often reach levels which are distracting to the occupants of such buildings. Impairment of speech communication among workers or inversely the lack of speech privacy are both deterrents to efficiency and productivity and are detrimental to the occupants' comfort and sense of well-being. *Handbook for Industrial Noise Control*, 1981. *Industrial Combustion Pollution and Control* Jr., Charles E. Baukal, 2003-10-15. This reference overflows with an abundance of experimental techniques, simulation strategies, and practical applications useful in the control of pollutants generated by combustion processes in the metals, minerals, chemical, petrochemical, waste incineration, paper, glass, and foods industries. The book assists engineers as they attempt to meet e. **Noise Pollution and Control Strategy** S. P. Singal, 2005. Noise Pollution and Control Strategy discusses the basics of acoustic propagation, reviews the problem of noise generation over all national and international situations, and gives various techniques available for noise measurements and assessment, health effects of noise, the standards adopted by various countries of the world, environmental impact assessment techniques, control measures, and status of noise measurement and abatement practices. In the last chapter, an effort has been made to lay an appropriate strategy to control noise. The book concludes with the future vision in the area of noise pollution and an up-to-date list of references and bibliography. The acoustical terminology in a separate appendix would be of great help as a ready reference. BOOK JACKET *Industrial Noise* United States. Occupational Health Program, 1967.
