Handbook of Alternative Photographic Processes Jan Arnow, 1982-11-01 [Handbook of Alternative Photographic Processes](#) Jan Arnow, 1982 *Jill Enfield's Guide to Photographic Alternative Processes* Jill Enfield, 2020-02-21 Jill Enfield's Guide to Photographic Alternative Processes 2nd edition is packed with stunning imagery how to recipes techniques and historical information for emulating the ethereal dream like feel of alternative processing This fully updated edition covers alternative processing from its historical roots through to digital manipulation and contemporary techniques and how to combine them It features several new techniques alongside new approaches to older techniques including hand painting on silver gelatin prints ceramics and photography cyanotypes wet plate collodion digital prints and many more Enfield showcases the different styles and methods of contemporary artists together with suggestions for vegan and vegetarian friendly alternative processing transforming 2D images to 3D installations and how to apply darkroom techniques to digital captures Professionals students and hobbyists will discover how to bring new life and imagination to their imagery Whether in a darkroom using traditional chemicals at the kitchen sink with pantry staples or in front of the computer re creating techniques digitally you will learn how to add a richness and depth to your photography like never before *Blueprint to cyanotypes - Exploring a historical alternative photographic process* Malin Fabbri, Gary Fabbri, 2016-01-01 An excellent beginners guide to cyanotypes all you need to get started and some goodies for more advanced cyanotypers too About the book The cyanotype is often the first alternative process that people try It is relatively easy and safe enough to nurture a child's interest in photography It can also be seen as a gateway to further exploration of historic photographic methods In addition it gives experienced photographers and artists a great excuse to take their eyes off the computer screen and get their hands dirty *Blueprint to cyanotypes* is all you will need to get started with cyanotypes It offers the beginner a step by step guide from choosing material to making the final print It is full of information and tips Even the experienced cyanotypist may learn a thing or two *Blueprint to cyanotypes* is published by AlternativePhotography.com a website and information center dedicated to alternative photographic processes From Malin Fabbri the author Why a book on cyanotypes Of all the alternative processes the cyanotype is the one closest to my heart I made my first cyanotype in 1999 I was intrigued by the blue images and wanted to test the cyanotype process to see what it had to offer I bought chemicals and spent an evening coating paper and cloth The results of the next day's printing surprised me Although the alchemy of the darkroom had always captivated me developing a print in the sun was like a liberation One of the things I found most refreshing about the process was the unpredictability of the results Some of my best prints were the product of happy accidents The developing process is straightforward The chemicals are cheap and most of the other items used can be found around the house Pre coated paper is available but one of the benefits of working with cyanotypes is the great flexibility of material and paper available to you Cyanotypes print on anything made of natural fibre Cotton linen silk handmade paper watercolor paper and rags are just

number of alternatives Some artists even print on wood So if you want to explore a fun alternative photographic process or seriously want to experiment with producing unique fine art make a cyanotype
