The World, the Text, and the Indian Scott Richard Lyons, 2017-03-27. Since the rise of the Native American Renaissance in literature and culture during the American civil rights period, a rich critical discourse has been developed to provide a range of interpretive frameworks for the study, recovery and teaching of Native American literary and cultural production. For the past few decades, the dominant framework has been nationalism, a critical perspective placing emphasis on specific tribal nations and nationalist concepts. While this nationalist intervention has produced important insights and questions regarding Native American literature, culture and politics, it has not always attended to the important fact that Native texts and writers have also always been globalized. *The World, the Text, and the Indian* breaks from this framework by examining Native American literature not for its tribal, national significance but rather its connections to global, transnational and cosmopolitan forces. Essays by leading scholars in the field assume that Native American literary and cultural production is global in character; even claims to sovereignty and self-determination are made in global contexts and influenced by global forces. Spanning from the nineteenth century to the present day, these analyses of theories, texts and methods from trans-indigenous to cosmopolitan, George Copway to Sherman Alexie, and indigenous feminism to book history, interrogate the dialects of global indigeneity and settler colonialism in literary and visual culture.
